HOUSE OF ROSES—ONE OF THE RANGE DEVOTED TO GROWING ROSES FOR CUT FLOWERS.

Helena, January, 1918.

To Our Patrons:

It is with pleasure we present you with our Catalog for 1918—the Twenty-eighth year of business in Montana for The State Nursery & Seed Co., and of which nearly 30,000 copies will be distributed this season.

In its pages will be found listed every really valuable variety of plant and seed which we have found to be suited to our rigorous climate.

On account of the unusual shortage in seed crops in many items, we found it impossible to attach prices to many seeds listed, both Vegetable and Field—without delaying the publication of the Catalog. Whenever prices are not quoted with the description of the seeds mentioned, they will be found on the Red Insert between pages 96-97.

Our Nurseries, Greenhouses and Trial Grounds have been kept up to their usual high standard, and improvements are continually being added, one of the chief during the past season being the installation of two additional large steam boilers for heating purposes.

The illustrations on the following pages, from actual photographs, will give our reader some idea of the extent of the plant devoted to our business in its various branches, and of our ability to promptly care for all orders entrusted to our care.

STATE NURSERY AND SEED COMPANY

DIRECTORS:

CONRAD KOHRS T E. MILLS W. E. MILLS The enormous increase in the volume of our business last season, caused some unavoidable delays in the filling of our orders. We wish to extend our thanks to those who so kindly waited a few days until we caught up with the rush, and to state that we have increased our force and facilities to amply care for them promptly in the future.

T. E. MILLS, Pres. & Gen. Mgr.
WALTER CARD, Sec'y. & Treas.
and Mgr. Seed Department.

SEED WAREHOUSE

Located on Great Northern Tracks, Opposite the Great Northern Depot.

Helena, Montana.

This commodious new fireproof warehouse will give our customers some idea of our ability to handle and care for the largest orders in any branch of seeds, either Field or Garden.

This building is equipped with the latest and most improved machinery for cleaning and re-cleaning of all seed stock, all operated by Electric power, and is in charge of an expert in this line.

The careful selection and grading of our field seeds at this part of our plant is one of the things we are proud of, and on which our customers may fully rely.

EXHIBIT OF VEGETABLES
(Not for Competition)

State Fair, Helena, Mont., Sept., 1917.

The above photograph gives but an inadequate impression of the actual exhibit as staged. The exhibit consisted of 208 VARIETIES, all produced on our trial grounds during the season of 1917, and was visited and admired by thousands at the State Fair. This exhibit was one of the largest ever staged in the United States—grown on one place, and is one of the strongest arguments that could be offered to show that Montana can and does produce vegetables of the finest table and market quality of any section in the United States.

The photograph of the result of a part of our Onion tests in our trial grounds will convince many that these favorite vegetables can be grown as well in this section as any other. Numberless specimens from the crop here depicted weighed from 2 lbs. to $2\frac{1}{2}$ lbs. each.

VIEW IN NURSERY

A Block of Several Thousand Young Poplars.

The above photograph shows the enormous quantity in which our Nursery Stock is produced to supply the demands made upon us for this class of stock in this section. Our trees are noted for their hardiness and general good qualities for the climate of Montana, both for private planting and city park purposes.

HOUSE OF CHRYSANTHEMUMS

House of Chrysanthemums.

The photograph on the left shows one of several houses of this justly favorite fall flower which are yearly required to supply the demands of our cut flower trade. A visit to our Greenhouses (fifty-five) when these wonderful queens of the fall flowers are in bloom is like a visit to fairyland, and is annually enjoyed literally by thousands.

Our Nurseries and Greenhouses are located at the foot of the great Continental Divide, at an altitude of 4400 feet.

PLANT DEPARTMENT

IMPORTANT—READ CAREFULLY

PLANTS BY EXPRESS

We always advise express for plants because we can send larger plants this way than by mail. Unless instructed to the contrary, we send pot grown plants in their pots, but it saves expressage to ship without pots, not merely because of the lessened weight, but by reason of the special discount allowed by the express companies on plants out of pots; so if you want plants without pots, please say so, and when received, customers should see that they get the special discount of 20 per cent from the ordinary rate. We always enclose extra plants of our own selection only, to aid in defraying express charges on orders not sent postpaid.

IMPORTANT

PLEASE REMEMBER THAT THE CUSTOMER PAYS THE EXPRESS, FREIGHT OR POSTAGE ON EVERYTHING IN THIS CATALOGUE UNLESS OTHERWISE STATED.

PARCELS POST

Most plants can be sent by parcels post, and the smaller trees and shrubs also. Wherever possible we have given postpaid prices. We cannot, however, be held responsible after delivery to the postoffice, and we must in all cases be the judge of the best method of shipment.

All Orders are acknowledged the day they are received by us.

If you do not receive your order as quickly as you feel that it should arrive, please to remember—that all orders are filled in rotation—that possibly your order is a little early and some part of it is not quite ready to ship, or the weather may be too cold to ship with safety, etc., etc.

In writing with reference to an order, ALWAYS refer to the number furnished you on card acknowl-

edging the order.

REGARDING PREMIUMS

In conformity with the law passed at the 1917 session of the Montana Legislature, which prohibits absolutely the giving or offering of premiums in any form, we have discontinued this form of advertising.

However, we will endeavor to more than offset any apparent disadvantage of this method by furnishing more goods, of better quality than is possible under that plan.

CATALOGUES ISSUED

JANUARY—Our complete general catalogue, covering everything for the Farm and Garden—profusely illustrated. (This one.)

EASTER—A special Flower and Plant List, of Plants and Cut Flowers for Easter decorations and remembrances to friends.

Little Dorritt—A single Sweet Alyssum, of great value for borders and small beds.

ALYSSUM.

Double-An excellent variety for borders, window boxes, and urns.

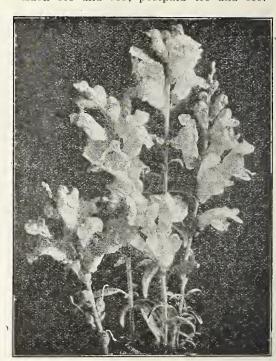

......10c; doz., \$1.00 Each Each (Postpaid) ______15c; doz.,\$1.15

Sweet Alyssum.

AMARYLLIS.

Johnsonii-A most popular bulbous plant responding readily to house culture, and bearing large lily-like flowers of bright crimson striped with a creamy white. Each 35c and 50c; postpaid 45c and 60c.

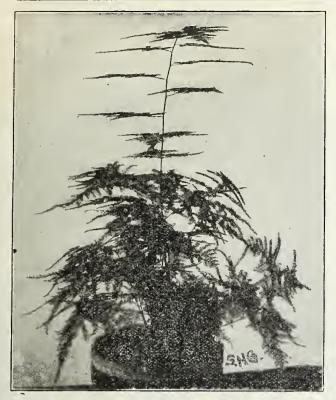

Antirrhinum,

ANTIRRHINUM (Snapdragon.)

A very desirable and satisfactory plant for the garden a very free bloomer and excellent for cutting. Colors white, pink, yellow and red.

ANTHURIUM.

A beautiful decorative plant for the window or conservatory. Has large dark metallic leaves, ranging from 20 to 30 inches long by 6 to 12 inches wide. Large red or pink flowers borne on long stiff stems well above the foliage and lasting from three to six months. Each.....

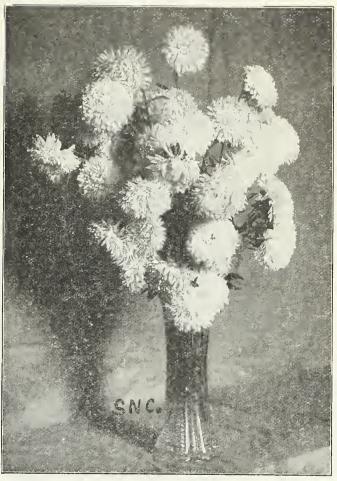

ASPARAGUS PLUMOSUS.

Asparagus Plumosus (Asparagus Fern)—Owing to its graceful foliage and ease of culture, this is perhaps more in demand than any other house plant. We grow these in thousands. The smaller plants listed are the right size for Table Dishes, while the larger are suitable for Lardinianes, atc. Jardinieres, etc.

Each

ASPARAGUS SPRENGERI.

Late Branching Aster. ASTERS.

A Field of Our Asters.

Araucaria Excelsa.

This is much liked owing to the ease with which it can be grown and moreover it grows to a large size—highly ornamental. A splendid Xmas gift.

Nicely grown plants, each....\$2.00 to \$2.50

Aspidistra.

The "one" plant that will grow for those who have "no luck" with plants. Invaluable for hall or porch decoration.

Lurida—A beautiful green-leaved variety.

Lurida Variegata—Green background striped with white.

.....\$1.00 and \$1.50 Each (Postpaid)\$1,25 and \$1.75

BEGONIAS

Begonias are one of the best known and most popular house plants today. With their magnificent range of colors both in bloom and foliage, and many of them of the most floriferous nature even under adverse conditions, it is little wonder that they are in such great demand. Our collection embraces the best varieties known to the trade.

Tuberous Begonias.

Tuberous Begonias are the most prolific bloomers with the largest flowers of any of the genus. The range of colors is bewildering, of wonderful value for summer decoration, and easy culture. Plants each, 35c and 50c. Tubers each, postpaid, 10c.

FIBROUS ROOTED BEGONIAS.

Alba Picta Rosea-Dark green foliage spotted with silver; flowers pink.

Argenta Guttala—Brilliant bronze green foliage spotted with white and white flowers.

Bertha de C. Rocher—A handsome sort, with bright deep pink

bloom.

Childsii—Beautiful glossy foliage, white flowers.
Festii—(Beefsteak Begonia)—An old favorite, with large fleshy round foliage, deep almost bronzy green, of a reddish color on the underside, bearing large spikes of rosy pink blooms late in winter or early spring.

Sandersonii—Scarlet, a winter bloomer. Luminosa—Brilliant dark scarlet, a constant flowering variety. Marguerite—Flowers salmon pink, foliage a bronze and green. Metallica—Velvety foliage, rosy white bloom.
Rubra—Deep coral pink flowers, and one of the best for house

culture.

Thurstonii—Rosy white flowers, foliage a bronze and green.

Any of the above varieties, each 15c, 25c and 50c. Postpaid, 20c, 35c and 60c.

Glorie de Chattelaine-A recent acquisition of great merit, with rosy pink flowers, produced in great profusion. A wonderful Xmas Begonia.

Glorie de Lorraine—Another splendid Xmas Begonia covering itself with a mass of exquisite and delicate pink blossoms.

Price—Chattelaine and Lorraine—each 25c and 50c

Postpaid35c and 60c

BEGONIAS-(Continued.)

Begonia Rex.

BEGONIA REX. Painted Leaf Begonias.

Kaiser Wilhelm-Deep velvety green leaf with darker

Gloire de Lorraine.

BELLIS-(See Daisies, Page 11.)

BOUGAINVILEA (Sanderiana.)

This variety bears rosy blossoms in abundance. Each, 25c; postpaid......30c

BROWALLIA—(Amethyst.)

A well known and very free flowering plant, literally covering itself with rich blue flowers and continuously in bloom.

Each, 15c; postpaid......20c

CANARYBIRD VINE.

The demand for this lovely climber is always a large one owing to its great suitability for porches and trellises. Most persons prefer plants we'll started to the uncertainty of seeds planted out of doors.

CANNAS

Bed of Cannas, in Yard of T. C. Power, Esq., Helena, 1917.

These wonderful bedding plants are too little known in this section. No plant which can be used in Montana will make the display that a well grown bed of Cannas will, if only planted early as the late frosts will allow, and given a liberal supply of water and manure, in a sunny exposure.

Their gorgeous coloring of bloom with the tropical effect

Florence Vaughan—Golden yellow, spotted red.

Madam Crozy—Scarlet with golden edge, dwarf.

King Humbert—Orange scarlet, with deep bronze foliage.

One of the finest Cannas extant.

Louisiana—A beautiful scarlet, very tall. Burbank—Clear yellow, green foliage.

Chas, Henderson—Deep crimson, standard bedder.

Prince Weid—Fiery velvety blood red.

Professor Rodenwaldt—Large and effective, deep crimson scarlet.

> Each, 25c; postpaid.....

CENTAUREA (Dusty Miller.)

An excellent border plant and often remains in good condition right to the middle of November.

Each	 	10c;	doz.,	\$1.00

CHRYSANTHEMUMS

THE EXCLAMATION POINTS OF NATURE.

Owing to the early frosts of this section, it is impractical to grow these most beautiful of all fall plants to maturity. But they can be most successfully and easily grown in the garden until September, when they should be lifted and potted. Then in the house, they will give a wealth of bloom and beauty that will far more than repay you for the slight trouble entailed in their cultivation and a careful selection of varieties will insure the lover of these flowers a glorious display until Christmas.

Type of Large Flowering Varietics.

LARGE FLOWERING VARIETIES.

Pink Gem-An exhibition variety of a splendid soft, pleasing pink. Refined in effect with splendid foliage.

Virginia Poehlmann—One of the earliest varieties. White with delicate shading of pink in center.

Golden Glow—A pretty golden shade, flowers from six to eight inches across. October.

White Ivory—Dwarf white. November.

A. J. Balfour—Dwarf deep pink. November.

Chadwick—Christmas flowering; white tinged with pink.

Golden Chadwick—Lovely golden yellow; a new variety. Christmas flowering.

October Sunshine—Yellow.
Comoleta—A very clear bright yellow; fine early pot plant.
Maj. Bonnaffon—A beautiful incurved glossy yellow. One of the best.

August Dasse—Golden yellow, strong stems.
White Chieftain—Large incurved white. November.

Gertrude Peers-Crimson, large and grows in bushy form. Chrysalora—A large incurved, yellow; strong and robust.
Chas. Razar—A fine large white, splendid stem and foliage.
Pattic—A very delicate pleasing shade of pink.
Wells Late Pink—Light pink. One of the finest.

W. H. Lincoln—A clear yellow; strong, stiff stems.

FANCY SINGLE VARIETIES.

These fill a unique position in that they come between the larger standard varieties and the pompons. Emilie—A soft rose pink and lasts well.

Sylvia Slade—Rosy garnet, with broad white ring around the disc.

Peter Pan—Star shaped, of a delicate fawn color.

Mary Richardson—Has color like sunshine on old gold, with a salmon bronzy tinge.

Ena Reimers—Beautiful terra cotta shade, good stiff stems.

Alexander Rowbottom—Deep bright crimson. Mensa—Purest white: a splendid variety.

Pink Beauty—Beautiful pink: very handsome variety.

W. Buckingham—A grand vigorous pink.
Golden Mensa—Quite new and proving popular.
Garza—White, Anemone flowered. Very handsome.

POM-PON CHRYSANTHEMUMS.

Small flowering and valuable for cutting. Make dainty and picturesque house plants, the masses of blooms being pink, white, yellow and bronze. They flower in the house from October to December; can be grown outdoors in summer and roots lifted in fall for the house. We have the following varieties:

Baby—Miniature yellow; flowers half inch in diameter. Elva—Choicest white pom-pon.

Acto-Bright rose

Rick Douglas—Rich red.

Klondike—A favorite yellow.

Helen Newberry—White.

Mrs. Frank Ben—The favorite of all the Pom-pons. Color a reddish yellow.

Diana—Pure white, very fine.
Lillian Doty—Large pink, a splendid sort.

EARLY FLOWERING VARIETIES.

(Especially Adapted for Pot Plants.)

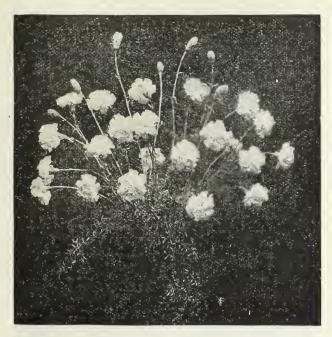

Kathleen Thompson—Crimson.
Source d'Orr—Orange, shaded gold.
Butlers Caprice—Rosy pink.
Lilac Cap—Deep lilac.

White Cap—Pure white. Yellow Cap—Pure yellow.

Lizzie Adcock-Deep yellow.

Prices for all Chrysanthemums-Plants ready March

CARNATIONS

Carnations.

Carnations are today the most popular flower grown in this country and are more in demand for cut flowers than any other. Something of the enormous demand for these flowers may be gathered by our readers when it is realized that we devote one entire range of glass—requiring about 50,000 plants to fill the beds, to the production of this flower alone, to supply the wants of our customers. The following list comprises the cream of these fragrant flowers.

CARNATIONS—White.

Matchless—Well named The Matchless White. Flowers extra large and wonderfully fragrant.
White Wonder—"The largest and most productive white," and very popular.

CARNATIONS—Scarlet.

Pocohontas—Large blooms, of a deep rich maroon red. One of the finest deep red Carnations yet introduced.

Beacon—One of the best scarlet Carnations we know of.

Belle Washburn—A beautiful brilliant red. Nebraska-A wonderful scarlet carnation.

CARNATIONS—Pink.

Alice—A beautiful shade of clear blush pink; flowers when fully developed 3 to 3½ inches.

Alice Coombs—Flesh pink, with large well fringed blooms. Pink Sensation—Very large, color a soft pink.

Mrs. C. W. Ward—Deep pink.

Good Cheer—Bright pink.

Enchantress—Salmon pink.

Nancy—Shell pink, fringed, a handsome flower.

Philadelphia—The ideal rose pink Carnation. Ideal in color, productiveness and size of bloom.

Superb—A handsome salmon pink. Very large and free flowering.

Benora—Variegated variety, white, marked with red, long stiff, erect stems, with large blossoms.

Any of the above varieties:

Each, 15c; postpaid..... Doz., \$1.50; postpaid..... .\$1.65 Large blooming plants, 25c and 50c

Cineraria,

We can supply magnificent specimens of this elegant house plant in bloom from December to April. A most beautiful gift plant in a rich variety of color.

Each These can only be sent by express.

One of the finest plants for a gift winter that can be selected. Plants in blocm from November to March 1st... each 50c, \$1, \$1.50 and \$2. Colors: Red, pink, salmon pink, white. By exp. only. Dormant semi - dor-mant bulbs. March 1st to June 1. Each 25c and 50c. Postpaid.

CYPERUS ALTERNI-FOLIUS--Umbrella

Plant) An unusually fine plant decorafor tive purposes of extremely easy culture. Requires plenty of water and may be grown as a semi-aquatic. Each 20e to

50c. Postpaid 25cto 60c.

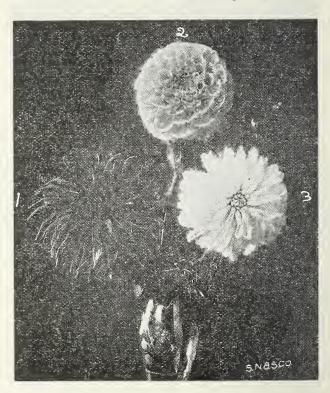

DAHLIAS

The list of these exquisite and free flowering plants which we offer, is composed of the sorts which we have found after careful test to be best suited to this climate. In case the stock of dormant roots is exhausted, of some varieties, we supply good strong plants from 4-inch pots. In many sections these are used almost exclusively.

CULTURE.

Plant in a well drained position and where they will receive the greatest amount of sun. The soil should be made loose and a liberal amount of fertilizer added before planting. Well decayed stable manure is very satisfactory as a fertilizer. Do not set out plants until all danger of frost is over. This should be specially noted in the case of potted plants. Dahlias should be lifted immediately after the first killing frost and stored in a cool place over winter.

(For Price of Dahlias See Page 10.)

THREE BEAUTIFUL DAHLIAS.

1—Cactus Dahlia—Tos Abelin. 2—Show Dahlia—Lucy Fawcett. 3—Decorative Dahlia—Kaiserin Augusta Victoria.

CACTUS DAHLIAS.

These are of a lighter formation and much used for cut flowers

Sparkler—Very bright scarlet. Spitfire—A fiery scarlet.

Kreimhilda—Free bloomer; pink with white center. Mrs. J. P. Mace—Delicate blush pink and early bloomer. Shooting Star—Pure yellow with very fine form.

Brunhilda—Dark maroon.

Jamaica—Rich plum color.

J. H. Jackson—The best Dahlia yet out; almost black. Harbor Light—Orange red overlaid with flame color.

Tos Abelin—A brilliant fiery red; a fine, large, refined flower of perfect incurved form; produced in the greatest profusion on long stiff stems. A fine cut flower.

Earl of Pembroke—Bright plum color. Very fine.

Genl. Buller—Rich velvety crimson tipped white. St. Catherine—Deep golden yellow, shaded red.

CACTUS-DAH LIAS-(Cont.)

Goldland-A primrose yellow of great merit.

Alight - Rich orange scarlet.

H. F. Robinson-Clear golden yellow.

Iceherg — Ivory white.

Mrs. Jewett—Deep salmon.

Sehneckoinigen —Pure glisten-ing white, with most perfectly arranged petals. A very valuable variety for cut flowers.

Sparkler—Cactus Type.

PEONY-FLOWERED DAHLIAS.

This beautiful type has large artistic flowers, best compared to the semi-double peonies in general form. They all flower very freely and are borne on long strong stems, making excellent material for cutting and delightfully fragrant

Queen Wilhelmina-Immense large white,

Rheingau—Showy brilliant scarlet.

Geisha—The showiest and most attractive of this type yet introduced; of an effective and rich combination of scarlet and gold.

Teuner—Very red sepals with light purple corolla.

White Beauty—Red sepals with white corolla, single. Each.....15c; doz., \$1.50 Each (Postpaid)\$1.65 Dozen (Postpaid)\$1.65 Larger plants, 25c, 35c and50c

Forget-Me Not.

Fusehia-Little Beauty.

GENISTA FRAGANS

A simply beautiful and highly fragrant early spring blooming plant of bushy habit and extremely free flowering nature. The flowers are yellow, of small pea flower shape, and borne in spikes which almost cover the plant. In great demand for Easter decoration.

Large sizes by express only.

GERANIUMS

The following list of these popular plants both for house use and bedding purposes will be found to contain only the best and most desirable varieties known. We are constantly testing and trying out new varieties, and only when we have proved them suitable for this section do we add them to our list.

STANDARD VARIETIES. (Double.)

Helen Michell—This is a recent introduction of great merit. It is a semi-double, of a clear scarlet color, with very large florets and truss. Foliage a lustrous green, of a bushy compact habit of growth. Very bushy compact habit of growth. early and free bloomer.

Beautie Poitevine-Salmon pink, the best of its color.

Henriot—Rose overlaid violet, white eye.

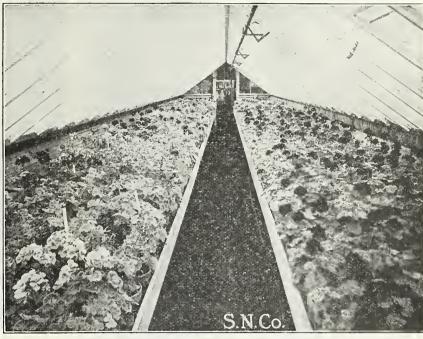

Hubert Charron—Red shading to white center.

La Favorite—White one of the best.

Louis Madeline—A deep pleasing rose color.

Marquis de Castellaine—Crimson, with immense trusses of bloom

M. Jules Dispot—Combination of red, violet and lilac, quite dark.

One of Our Many Geranium Houses.

Red Wing-Bright scarlet, striking bedder, good for cutting. A. Nutt-Dark crimson, the best bedder of all. A great demand for this every year.

Divinite—Orange red; thick heavy foliage.

Flamme Pointivine-Rose vermilion, large blooms.

Jean Madeline-Fine light rose color.

Jean Viaud-Grand pink bedder.

Le Barde-Genuine Watermelon color, extraordinary bedder.

Madonna-Snow white, good bedder.

M. Paul Blondeau-Bright rose, very large flower.

Col. Gillan-Bright scarlet maroon, markings very brilliant.

Gen. Wolseley-Rosy scarlet, showy and effective. Mme. L. Moyot-White center, vermilion border. Mme. J. Cibiel-Salmon pink, white eye and bor-

Mme. P. Morlan-Rosy Salmon, free bloomer. Michele Savery-Salmon pink, shading to white. Sentinel-Dark crimson, round flowers.

Searamouche—Salmon, shading to white at tip of petals.

Vermilion—Large brilliant flowers.

Vera Oulianesk-White, clear, round, perfect

Yvette Prost-Rosy pink, fine for cutting or window boxes.

Helen Michell.

GERANIUMS (Continued)

Geranium Mme. J. Cibiel.

Gen, Wolseley.

Ivy Leaved Geranium.

IVY LEAVED GERANIUMS.

This class of Geraniums is rapidly growing in popularity and never fails to please those who desire a really valuable window plant. They are very free bloomers, and lend themselves splendidly to house culture.

Pierre Crozy—A single free bloomer of intense scarlet. Mrs. J. G. Day—Crimson.

Leopard-Lavender pink dotted with crimson.

Mrs. Hawley—Rose.
Souvenir de Chas. Turner—Deep bright pink.
Achievement—Rose with white eye.

La Eleganta—Beautiful variegated foliage.
Wm. Tracy—Double light pink, a rather short habit of growth. Very fine.

VARIEGATED AND SCENTED GERANIUMS.

Happy Thought-Leaves yellow center bordered with

green. Flowers rose.

Madame Salleroi—Bushy variety, used for borders; goes well with Lobella. No bloom.

Mountain of Snow—Fine foliage variety, silver edge flow-

ers red.
Mrs. Pollock—Foliage yellow, green and red variegation.

Flowers red.

Corinda-A sweet scented hybrid of the Pelargonium type. Balm-The well known large foliaged rose scented geran-

Lemon-The small foliaged old-fashioned Lemon Geranium. Very fragrant.

Rose-Scented Geranium—Very popular. Flowers pink.
Shrubland Pet—A new Rose-Scented Geranium, with pink blossoms, and of free branching growth. Foliage highly fragrant.

GERANIUMS—(Continued)

PELARGONIUMS (Martha Washington Geraniums)

Easter Greeting-One of the most desirable plants of this class that can be grown. Its flowers, which are borne in great profusion from March until late fall, are of a fiery amaranth red, each petal bearing a blotch of deep brown or black and very large, often measuring from two to three inches in diameter. It is of a very compact and bushy habit, and of easy house culture.

Easter Morn-A sport from Easter Greeting, duplicating that variety in all respects but color which is of a great deal lighter shade. A splendid companion plant to its parent.

Crimson King-Intense crimson, free flowering.

King Oscar-Blush pink, shaded maroon and red.

Mrs. Bradshaw—Pure white, a profuse bloomer.

Princess May-Very light pink.

W. C. Boyce-A beautiful shade of salmon.

THE PANSY GERANIUM.

Madam Layal—This is another of the plants a favorite with our grandmothers, and is rapidly coming into another well deserved reign of popularity. Of the most easy house culture and a most profuse bloomer.

PELARGONIUM-Easter Greeting.

GLADIOLUS

A very attractive summer flowering bulb and one in which wonderful improvements have been made. To get the very attractive should be planted in a good sandy loam and where they get the most sun possible. Good spreadings of well rotted stable manure is the best fertilizer. Care should be taken in planting, bulbs being set from 4 to 6 inches deep and from 4 to 5 inches apart each way. In the fall, before frost, the bulbs should be lifted the stems cut off: place the bulbs in a cellar or some place away from the frost until

planting time in the spring.

America—Large flesh-pink flowers.

Augusta—Pure white with blue antlers.

Mrs. Frances King-Light scarlet.

Brenchleyensis-Vermilion scarlet.

Princeps—Rich crimson, with white blotches on lower petals. Price, each, 5c; (Postpaid).....doz., 60c

Hanging Baskets, Porch and Window Boxes

Hanging Baskets.

Sample of the Beautiful Effect Attained in Porch Decoration by Hanging Baskets and Porch Boxes.

Hanging Baskets can be sent by express to almost any point with safety, but porch and window boxes do not pernait of shipment in this manner. If you will send us the sizes of the boxes you desire to fill, we will take pleasure in promptly mailing you a list of the plants suitable for the same and their cost prepaid to you. Always give the exposure—North—East—West or South in writing for list of plants suitable for porch boxes. In making porch boxes, it will be found that a width of 7 inches, and a depth of 8 inches, inside measurement, is sufficient. If the place to be filled is six feet or over in length, it will be found best to make the box in two or more sections, for convenience in handling. Always see that holes are bored in the bottom to allow for the necessary drainage.

HANGING BASKETS

Prices vary with the class and values of the plants with which the baskets are filled. We can assure our customers that our selections and filling, by artists in this line, can not fail to satisfy even the most critical taste.

Each, 10 inches wide....\$1.00 to \$2.00

Each, 12 inches wide....\$1.50 to \$3.0\$

Each, 14 inches wide....\$2.50 to \$5.00

HELIOTROPE

Heliotropes will succeed in or out of doors. Their exquisite perfume makes them a favorite everywhere.

Centifleur-One of the newer forms of medium lavender color, with enormous heads of bloom.

Elizabeth Dennison—A very compact large flowered form al-

most violet in color.

Florence Nightingale-A lavender colored type, very floriferous

HIBISCUS

PANSIES

Who does not love a pansy? The flowers with faces. We are the most extensive growers of these favorites in the entire Northwest, and have spared no pains or expense to procure the finest strains the finest strains known. Our Pansies are all from strains which combine hardiness, beauty of color, size of bloom and length of stem. A strain which does not measure up to this high standard when tested by our expert growers, is at once discarded. The result of this policy has been that we can scarcely grow enough of these selected strains to supply the demand. We are continually increasing the space devoted to them.

- Prince E. C. d'Arenberg—(H. T.)—A brilliant fiery scarlet shaded with maroon. Of most exquisite form with massive petals.
- X Hadley—(H. T.)—Deep rich velvety crimson. Large double flowers on long stiff stems. Very fragrant and a prolific bloomer.
- Francis Scott Key—(H. T.)—Red, shading to cerise, very double, and a free bloomer.

Gruss an Teplitz.

- X Gruss an Teplitz—(H. C.)—This is a wonderful Rose, of a dazzling fiery crimson. It is a very free grower, and unlimited flowering qualitics. Should be in every collection.
- H. E. Richardson—(H. T.)—This is another good velvety crimson Rose; free flowering and fragrant.
- X Irish Fireflame—(H. T.)—This Rose is of an old-gold, which has the appearance of being overlaid with a ruddy crimson flame, giving a distinct impression of a flame of fire. The flowers are large, but single and deliciously perfumed. Always in bloom.
- X Red Radiance—(H. T.)—This is a sport from the Pink Radiance, of which it is an exact counterpart, except in color, which is of a clear bright red.
- Edward Mawley—(H. T.)—Velvety crimson, deep and rich. Huge faultless petals arranged into perfect blooms. Richly fragrant and very free flowering, bearing every flower rigidly erect.

Mrs. Sarah Yates—(H. T.)—A fine crimson Rose and free blooming.

Tea and Hybrid Tea Roses (Pink)

- A. Ophelia—(H. T.)—A recent introduction, and one that has taken Rose lovers by storm. In color it is a brilliant salmon-flesh pink, with the heart of the flower a glowing peach pink, the whole showing orange yellow shadings. Very floriferous, a vigorous grower, and bears its blooms erect on long stiff stems. Very fragrant.
- La France—(H. A.)—Although introduced in 1867 this wonderful Rose still preserves its popularity. Of a silvery Rose, with pink shades, and satin-like petals of wonderful beauty and unequaled fragrance. A continuous summer bloomer.

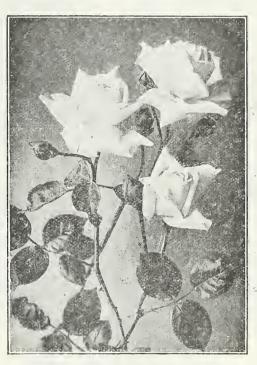

Radiance.

- X Radiance—(H. T.)—A hardy, vigorous grower flowers of a brilliant rosy carmine, when open shaded with opaline pink. Very fragrant and a continuous bloomer. We cannot recommend this Rose too highly. Its wonderful success in this section has created a demand unequaled by any other Rose, and we have endeavored to grow enough to supply our customers with this wonderful pink rose in hardy large sizes. Our specimen plants of this cannot be equaled. See page 33 for prices.
- X Duchess of Normandy—(H. T.)—This is a perfect Rose of salmon-flesh color appearing to be overlaid with yellow. A very exquisite and pleasing shade.
- Pink Killarney—(H. T.)—The Irish Beauty Rose. Sparkling pink with large beautifully formed buds of exceeding beauty.
- A Madam Abel Chatney—(H. T.)—A good grower and a perpetual bloomer; large and perfect in both bud and bloom; deep recurved petals of rose-pink, with just a tinge of salmon.
- X Maman Cochet—(T.)—A rich rosy-pink; shaded with silvery rose on outer petals; a most exquisite Rose both in form, color and fragrance. Flowers borne on good stiff stems; beautiful foliage. A queen among pink Tea Roses.
- Bon Sileue—(T.)—This Rose has been a favorite since 1835, and is today gaining a new lease of popularity. Color a rose shaded with crimson; beautiful buds with long petals. One of the hardest of the Tea Roses.
- X Hermosa—(B.)—This is another old favorite, introduced in 1840, but still retains its popularity. While it is of the Bourbon type, it is of a free blooming nature, with finely formed flowers of a soft deep pink.
- Mrs. Chas. Russell—(H. T.)—This Rose is a magnificent pink, one of late introduction, and which jumped at once into well deserved popularity. Long strong stems and very large flowers.

Johnkeer L. Mock—H. T.)—Clear pink, on strong erect stiff stems. A beautiful Rose. September Morn—(H. T.)—Light pink, a most attractive Rose.

Tea and Hybrid Tea Roses (White)

Kaiserin Augusta Victoria—(White.)

- X Kaiserin Augusta Victoria—(H. T.)—One of the best white Roses ever introduced. A most sturdy grower with large perfectly formed and fragrant flowers, it combines all the attributes that go to make a perfect Rose. Very profuse.
- Bride—(T.)—Pure white, with well formed buds of great substance. An old favorite, of free growth and splendid blooming qualities.
- X Clothilde Soupert—(H. Pol.)—Known in many sections as the Cemetery Rose, as it will bloom and thrive with so little care. It is a cluster bloomer, white, shading to a light pink, and very profuse, a dwarf grower, and very fragrant. Makes an ideal pot Rose for the house in winter or summer.
- X White Killarney—(H. T.)—A perfect counterpart to Pink Killarney from which this is a sport. Like its parent, it has proven a valuable Rose in this section, as they will stand our winters with ordinary protection and produce a wonderful wealth of bloom.

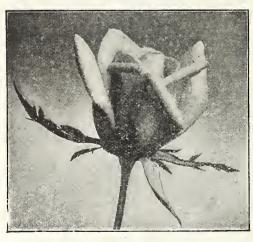

Do not overlook our collections of Roses on Page 32. The values offered in these are leaders for Montana. We strongly urge the greater planting of Roses in this section. No plants for the garden will better repay the cost and care bestowed on them.

Tea and Hydrid Tea Roses (Yellow)

Mrs. Aaron Ward.

X Mrs. Aaron Ward—(H. T.)—This is another Rose of comparatively late introduction, but it has achieved a wonderful popularity. The flowers which are produced in great profusion, are of an Indian yellow shading to a lemon at the edge of the petals; very full and deep, showing as it unfolds a deep golden heart.

Sunburst.

X Sunburst—(H. T.)—A splendid Rose of vigorous habit and one of the largest of the H. T. type. The color is an orange-copper or golden orange, very intense giving a most brilliant effect. A giant of its class, of perfect form, good keeping qualities when cut, it has proven an estimable garden Rose for this section.

Sunrise—(T.)—A brilliant Rose, of scarlet and yellow.

Perle Des Jardins—(T.)—A clear golden yellow Rose, very rich and of great depth. Very full, a most profuse bloomer, and very fragrant. A tender Rose.

FOR PRICES ON ROSES—See Page 33.

Frau Karl Druschki.

Hardy Hybrid Perpetual Roses

For Prices See Page 33.

X Frau Karl Druschki—(H. P.)—Commonly known as the White American Beauty, or Snow Queen. A most vigorous grower producing large, long buds and magnificent white blooms. Very hardy, and deservedly popular.

X Anna de Diesbach—(H. P.)—(Glory of Paris.)—A very free blooming form of this type of Rose, and a vigorous grower. Color a shell-pink, long, pointed buds, very double and large compact blooms, very fragrant.

Black Prince—(H. P.)—Color an intensely dark crimson; flowers very large and double. A strong grower and free bloomer.

Baron de Bonstetteu—(H. P.)—A superb Rose, of a velvety deep crimson color. Very double, large and fragrant, and of strong growth.

Captain Christy—(H. P.)—A delicate flesh pink, shading to a deeper color at the center of a large, very double and handsomely formed flower. Strong grower and very free.

X Clio—(H. P.)—Color flesh-pink, shaded in center with rosy-pink; large globular flowers freely produced and fragrant. A vigorous grower.

General Jacqueminot—(H. P.)—Better known as General "Jack," a justly celebrated Rose, with its shapely buds and handsome flowers of rich brilliant velvety crimson, and delicious fragrance. The "Jack" Rose is beloved by all for its all round good qualities.

X General Washington—(H. P.)—Large double scarlet flowers. A fragrant Rose, free grower and profuse bloomer.

X Jubilee—(H. P.)—A hardy and almost everblooming Rose flowers extremely large, very double, of a glowing velvety crimson, shaded at the base with a touch of maroon-red. Hardy, a vigorous grower and wonderfully fragrant.

X Madam Planticr—(H. P.)—A very hardy Rose of vigorous growth, with large white blooms.

X Mrs. John Laing—(H. P.)—A beauty—in clear, bright, shining pink; every bud with its deeply serrated calyx and close growing foliage becomes an elegant Boutonniere. The open blooms are immense, very full, and borne on long, stiff stems.

Paul Neyron.

X Paul Neyron-(H. P.)-This is the largest of all Roses. with its flowers of clear bright shining pink, and de-liciously perfumed. It is also a most prolific bloomer, and of strong and vigorous growth. Almost thornless, and very hardy.

X Ulrich Brunner—(H, P.)—This is a seedling from Paul Neyron with brilliant cherry-red flowers of globular form and immense size. This variety has proven as desirable for garden growing as its parent, and is in great demand in all sections of the country.

For Prices See Page 33.

Climbing Roses

Baltimore Belle.

X Baltimore Belle-(S.)-Flowers of a pale blush or pink, passing to white, very double, and borne in clusters in great profusion, making a mass of bloom. Very hardy and one of the best climbers for Montana.

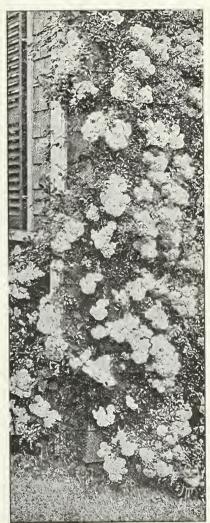

Climbing American Beauty-(H. T. W.)-This comparatively new climbing Rose has proven exceedingly popular in many parts of the country. It is a seedling from the well known American Beauty, with a mixture of Tea and Wichuriana blood, and is similar to its parent in size of bloom, color and fragrance. It is almost a continuous bloomer, a vigorous climber, and has proved to be very hardy. Marechal Neil-(N.)-This climbing Rose is very tender, and requires good protection outdoors in winter. Given this protection, or grown indoors, and it will well repay for the trouble expended upon it. It produces large exquisitely shaped deep yellow flowers, of wonderful fragrance. This Rose will amply repay as a pot plant, trained to a trellis, and carried indoors on the first approach of freet.

proach of frost.

X Crimson Rambler—(C. P.)—This Rose is extremely hardy of vigorous growth. It flowers in clusters, forming a

mass of vivid crimson beauty.

X Flower of Fairfield—(C. P.)—Another of the same type as the preceding variety, but producing bright crimson flowers in clusters with a white center in each bloom. It is a perpetual summer bloomer and very hardy.

Dorothy Perkins.

X Dorothy Perkins—(H. W.)—Flowers borne in great profusion in clusters, of a beautiful shade of shell-pink; hold their beauty for a long time; fading to a deep rose, and very fragrant. A splend'd climber, of vigorous

growth and hardy nature.

White Dorothy Perkins—(H. W.)—This is a sport from the preceding variety, of which it is a duplicate in every way with the exception of its beautiful clusters of flow-

ers, which are white.

X Prairie Queen—(S.)—Introduced in 1843 this is still a standard favorite. It hears rich rosy-red compact, globular flowers in great profusion, is very hardy, and a

strong grower.

X Lady Gay—(II. W.)—Buds of a deep pink, changing to cherry-red, the open flower finally changing to a creamy white. The blooms are produced in large trusses, and form a mass of beauty from the ground to the top of the vine. It is a perfectly hardy climber.

Baby Ramblers

These Roses all are splendid plants for growing in pots for home decoration. Give them all the sun possible in the summer with good soil and drainage. They rarely grow over 20 mches in height, are continuously in bloom and

as a class are very hardy.

X Crimson Baby Rambler—(P.) (Madam Norbert Levasseur.)—A dwarf form of the Crimson Rambler, with the

scur.)—A dwarf form of the Crimson Rambler, with the same ruby-red clusters of bloom. Always in flower through the entire summer, and if potted before frost will continue through the winter in the house.

X White Baby Rambler—(P.) (Catherine Zeimet.)—Pure snow-white blooms in profuse clusters, forming a sheet of white when used for bedding purposes. Everblooming and an ideal Rose for pot culture.

X Pink Baby Rambler—(P.) (Phyllis.)—A bright carminepink of very bushy habit producing beautiful panicles of bloom the whole summer. Unequaled as a decorative not plant at any season.

pot plant at any season.

X Mile. Cecile Brunner—(P.)—Often called the Fairy, or Sweetheart Rose. Produces graceful sprays of perfectly formed small flowers, very double, of a soft rosy-pink, on a rich creamy-white background. A splendid variety for cut flowers.

George Elger—(P.)—Also known as the yellow Mlle. Cecile Brunner. The color of the bloom is a dainty coppery golden-yellow, opening to a clear deep yellow; borne in large corymbs. A very erect habit of growth, with dark green foliage.

AUSTRIAN, OR BRIAR ROSES.

Harrison Yellow—(A.)—A fine hardy Rose of double free flowering proclivities. The Austrian or Briar Rose type as a rule do not require much pruning, only to remove the dead and superfluous wood. They are extremely

deep golden yellow, very hardy and very floriferous.

Each75c

Harrison Yellow.

RUGOSA ROSES.

Hansa—(R.)—This is one of the most desirable of the type with double reddish-violet flowers, produced in profusion during the entire summer. They are followed by brilliant red seed pods making the plants as attractive in the fall and winter as in the summer. This type is In the fall and winter as in the summer. This type is not only valuable as a single specimen, but is even more so when planted for the purpose of a strong and wonderfully decorative hedge, for which purpose it cannot be recommended too highly. This type also requires but little attention in the way of pruning, and is extremely hardy. We confidently predict for this Rose an enormous sale for ornamental hedges in this section. For hedges plant about two feet apart. It is no exaggeration to say that this Rose will make a hedge that is absolutely to say that this Rose will make a hedge that is absolutely impenetrable, even to a rabbit.

Each, 75c; per dozen.....\$6.00

State Nursery and Seed Co.'s **Peerless Rose Collections.**

These collections have been selected by our Rose expert after years of trial in this section, and will be found to contain only varieties the most worthy of cultivation. The amateur as well as the professional can not fail to succeed with the "PEER-LESS" sets of Roses.

Collections sold only in the varieties

LARGE AND SPECIMEN ROSE PLANTS.

In the foregoing list of Roses the varieties which are pre-fixed with X can be supplied in a ONE DOLLAR SIZE. These are magnificent plants, and will produce excellent results.

When SELECT SPECIMEN ROSES are desired, especially where the choice is left to us, we can usually supply SPLENDID SPECIMEN PLANTS at from \$1.50 to \$2.00 each. These larger plants can not be too highly recommended.

READ WHAT OUR CUSTOMERS SAY

Montana State Agricultural College, Bozeman, Mont.

Extension Service. F. S. Cooley, Director. State Nursery & Seed Co., Helena, Mont.

Gentlemen: The Roses came and look very fine. Mrs. Cooley is immensely pleased with the Aaron Ward and pink Roses which were added to the order, and thanks you heartily for them.

Yours truly,

F. S. Cooley.

Glendive, Mont.

State Nursery & Seed Co., Helena, Mont.

Dear Sirs: I received the Roses and am delighted with them. They arrived in good condition. I also wish to thank you for the complimentary Rose. I set them out at once and they are doing fine. I shall always boost for the STATE NURSERY Co. Thanking you, I am,

Yours sincerely,

Mrs. N. Buttelman.

Litchfield, Mich.

State Nursery & Seed Co., Helena, Mont.

Gentlemen: I wish to thank you for quick delivery and fine condition of Roses when received. I am certainly looking forward to much pleasure from them, for myself and friends. New shoots are already appearing, and I hope they are going to like their Michigan home.

Respectfully,

IRENE M. AYARS.

Findon, Mont.

State Nursery & Seed Co., Helena, Mont.

Dear Sirs: I have just received the beautiful plants. I am perfectly delighted with them. I have never seen plants so well packed.

Very truly,

Mrs. M. C. Johnson.

Opportunity, Wash.

State Nursery & Seed Co., Helena, Mont.

Gentlemen: I want to thank you for your promptness in filling my order, also want to congratulate you on the quality of your stock, and your packing. It all reached me in fine condition, and I am highly pleased with everything.

Sincerely,

C. B. Weaver.

Dayton, Wyo.

State Nursery & Seed Co., Helena, Mont.

Gentlemen: We received the plants which we ordered, which were very fine. Also the seeds we ordered. Thanks. Mrs. Frank J. Williams.

Toston, Mont.

State Nursery & Seed Co., Helena, Mont.

Gentlemen: The plants were received in good condition. Thanks for the complimentary.

Mrs. Rose Leppert.

The Care of Roses

SITUATION.

Best results can be obtained by planting Roses where they receive the full benefit of the sun, and sheltered from the north winds. Under no conditions should they be planted where they are liable to come into contact with the roots of large trees and shrubs.

SOIL.

The best soil for Roses is sod from an old pasture, adding some well rotted cow manure.

PLANTING—PREPARATION OF THE BED.

The bed should be prepared a short while before planting, so as to let the soil settle. The depth of the bed depends on the size of the plant, usually about one foot. Fill this with the soil and manure, being careful to provide for proper drainage. On receiving the plants, if in a dormant state, the tips of the roots should be cut off about half an inch or more.

If the plants are from pots, they should be set so that the ball of earth is about one inch below the level of the ground, and the soil around them made very firm.

Great care should be taken to see that the roots are evenly distributed, as upon this detail quantity and quality of blooms will depend. A thorough soaking of water should then be given.

WINTER PROTECTION.

Almost all the roses (the Hardy Yellow varieties are some of the exceptions), should be protected during winter. For this purpose we use long, clean straw, bending the rose bushes to the ground and covering the straw over them to a thickness of about six inches.

Another good plan is to use a heavy sheaf of straw tied close at the top, and the rose bush tied in the center of the sheaf. This is a good method in places where water or melted snow is apt to drain to the plants. With this method it is also beneficial to draw the earth to the stem of the plant before covering with the straw.

PRUNING.

Immediately the first killing frost cuts back the young growth in the fall, prune back the frozen wood into well ripened wood. This is important, and will often insure the life of tender Roses in severe winters. As soon as the plants show the first sign of activity in the spring, then give them the principal pruning of the year, beginning with the H. P. class. Climbing Roses need very little pruning, except to remove dead and superfluous wood, and to make long canes conform to some desired effect.

INSECT PESTS.

A weekly application of some insecticide will well repay you in the ultimate growth and health of your Roses. It is almost impossible to name any stated mixture. We refer you to our list of Insecticides.

An Aid to Rose Lovers

The appended classification with the abbreviations used in the general list will be of value to the lover of Roses, an aid to an intelligent selection of varieties best suited to any particular location; a reliable guide to the hardiness of varieties offered, and the corresponding amount of protection required.

Hybrid-Perpetual—H. P. A strong growing hardy type. Produce larger blooms than any other class.

Hybrid Tea—H. T. A cross between the H. P. and T. types, combining the hardiness of the H. P. with the free blooming quality of the T. Rose. Require in most cases more protection than the H. P. type. This is the class known as the Monthly or Everblooming Roses.

Tea-T. The well known Tea Roses, with Tea fragrance, everblooming and of tender nature.

Climbing Tea—C. T. Climbers of the same class as the Tea Roses.

Climbing Polyantha—C. P. Known as the Ramblers. Hardy and flowering in clusters.

Polyantha—P. A hardy low growing type flowering in clusters.

Hybrid Polyantha—H. Pol. A medium hardy type, flowering in clusters.

Hybrid China—H. C. Very free blooming and a tender type.

Noisette—N. A tender type of Rose, flowering in single blooms of good size. As a class are generally climbers.

Hybrid Wichuriana—H. W. Hardy climbers, flowering in clusters.

Climbing Hybrid Tea Wichuriana—C. H. T. W. A hardy type of climbers; flowering with single blooms of good size.

Setigera—S. Known as Prairie Roses. Very hardy and always of the climbing or trailing habit.

Bourbon—B. A hardy free flowering type.

Austrian—A. Austrian or Yellow Brier Roses; very hardy.

Rugosa or Ramanus—R. A very hardy type of Rose, extremely valuable for hedges and specimen plants.

HARDY PERENNIALS

THE STATE NURSERY AND SEED CO. are the largest growers of these plants in the Northwest. Our collection is today one of the largest and best in the entire country, and we are continually adding to the list. With no other class of plant is it possible to have as continuous a display of bloom and beauty with as little effort, from the early spring to frosts of fall, as with Hardy Perennials. A bed or border of these plants properly selected and are bed or border of these plants, properly selected and arranged, will produce a wealth of bloom almost from snow to snow. In the climate of Montana, there is no question but that they are the best class of plants for those who desire a profusion of bloom for the garden, with the least desire a profusion of bloom for the garden, with the least expenditure of time and effort. Give them any ordinary good soil, enriched with well decomposed fertilizer, an occasional watering through the summer. As soon as the first killing frosts have killed the growth, remove the dead tops and if convenient cover the bed with a mulch of dry leaves, or straw, though this is not absolutely necessary. A good mulch of well rotted fertilizer in the early spring, and spaded lightly into the border will also aid in giving them the necessary stimulus to bring out their best efforts for your pleasure. for your pleasure.
PRICES ON ALL HARDY PERENNIALS EXCEPT
WHERE NOTED:

ACANTHUS MOLLIS—(Bears Breech.)

A handsome stately foliage and decorative plant, often producing leaves two feet long and one foot wide, with deep serrated edges. The blooms are rosy red of peculiar formation, and very effective. 3 feet.

ACHILLEA.

(Yarrow)

Perry's White—A late introduction, with the largest flowers of the genus. Very free flowering and very hardy. 2 feet.

The Pearl—A well known form of this flower, with hand-some double flow-

ers, blooming very early, and with good keeping qualities when cut. 2

Coronaria - An erect growing plant, with silvery foliage, bearing Crimson phlox-like flowers. July. Two to three feet.

ALYSSUM SAXA-TILE—(Gold Tuft.)

One of the most useful plants either for rockery or bor-Produces large flat heads of yellow flowers in May and June. One foot.

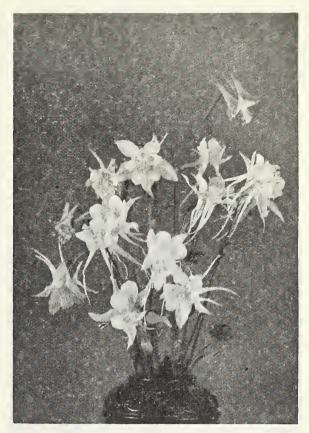

A Bed of Achillea.

ANCHUSA ITALICA.

Dropmore Variety—Very free flowering plants of a branching habit, with flowers of a gentian blue, and very attractive. Almost continuous bloomer in this section after June. Three feet.

AQUILEGIA—(Columbine.)

One of the most satisfactory of hardy perennial plants, producing beautiful spurred flowers on stiff stems. Should be given a sunny position, but succeeds in almost any soil or location.

Aquilegia.

Canadensis (Common American Columbine)—The native bright red and yellow variety.

Chrysantha (Golden Columbine)—Bright yellow, long

spurred flowers.

Coerula (Rocky Mountain Columbine)—Bright blue and

white, long spurred flowers.

Helenae—A new hybrid with large blue flowers and expanded pure white corolla.

Nivea Grandiflora—Fine pure white. Veitch's Long Spurred Hybrids—Mixed colors.

ARABIS ALPINA—(Rock Cress.)

A very early flowering carpet-like plant valuable both for the rockery and edging. It forms a dense carpet, and literally covered with white flowers.

Auricula,

AURICULA—(Alpine.)

This is one of the most beautiful types of the Primrose family and should find a place in every garden. They are of a wide range of rich velvety colors, very floriferous, last a long time in bloom with bright glossy green foliage.

BLEEDING HEART—(See Dielytra, Page 38.)

BOLTONIA—(False Chamomile.)

Among the most showy of our hardy perennial plants, with large single flowers resembling a single Aster, and borne in great profusion. Three to four feet.

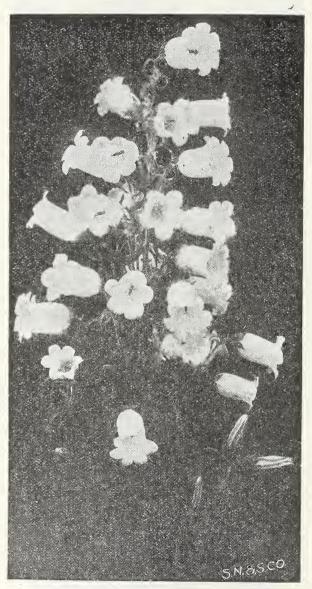

B. Asteroides—Pure white.

B. Latisquama—Pink tinged lavender.

BITTER ROOT—(Montana State Flower.) (See Lewisia, Page 40.)

BOCCONIA—(Plume Poppy.)

B. Japonica—One of the noblest of our hardy perennials. It is beautiful both of leaf and bloom, flowering in tall, feathery panicles, creamy white in color, in July and August. It will succeed in any situation and can be effectively used in the center of beds as well as in the general border. Six feet.

Campanula Media—(Canterbury Bells.)

CAMPANULA.

Do best in a good rich soil and planted in a half shady place. They are indispensable as border plants. varieties should be staked and all the flowers cut immediately upon fading.

Media—Single in colors of dark blue, white, light blue and

Calyeanthema (Cup and Saucer Canterbury Bells)—They differ from most of the varieties in that the calyx is the same color as the flower, giving it the appearance of the cup and saucer. We offer them in the following shades: Delicate rosy pink, clear-blue, dark blue and pure white. Pyramidalis (The Chimney Bell Flower)—Blue salver-shared flowers. shaped flowers.

CANDYTUFT, HARDY—(See Iberis, Page 39.)

A Bed of Cerastium.

Creastium Tomentosum-(Snow in Summer.)-A very desirable plant for covering as with a white carpet dry, sunny places. Low growing with white foliage and flowers. Very fine for planting on graves.

COLUMBINE—(See Aquilegia, Page 35.)

COREOPSIS.

Laneccolata Grandiflora—A popular plant everywhere. It bears golden yellow blooms in great profusion, valuable for cut flowers, and lasting well into fall. Two feet.

CENTAUREA—(Montana.)

Of easy culture, producing a wealth of deep blue flowers from July to September. Excellent for cutting.

COWSLIP—(See Primula Veris, Page 43.)

Kindly note that where not listed as Postpaid, goods are shipped by Express, collect. We do this because plants not listed as prepaid we do not consider safe to ship by Parcel Post.

For Prices of Perennials Not Quoted see Page 35.

CHRYSANTHEMUM MAXIMUM.

Their profusion of bloom when the rest of the garden is destroyed by frost keeps them well to the front as a favorite

Chrysanthemum Maximum—The old variety daisy and does exceptionally well in Montana.

Maximum King Edward VII.—A splendid daisy of late introduction—beautiful for cut blooms, two to two and a half feet high.

Chrysanthemum Inodorum (Bridal Robe.)

Chrysanthemum Inodorum (Bridal Robe)—Makes a bushy plant about 2 feet high, with feathery foliage and pure white intensely double flowers. Maximum, The Speaker-Another fine varietythe cut blooms last a long time.

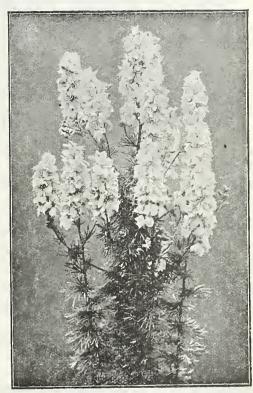

Shasta Daisy—"Alaska"—(Burbank's Improved.)

Something new in Shastas, and very fine.
Shasta Daisy—"Market Favorite"—This compara-

tively new type of the Shasta Daisy has leaped into popular favor, especially when grown for cut flowers. In this field it has no equal.

DELPHINIUM-(Larkspur.)

Note the color plate on the front cover of this atalog, from an actual photograph. These magnificent flowers are easily one of the very finest Hardy Perennials for the Northwest. The long graceful spikes of bloom are very valuable for cutting, and many of them harmonize wonderfully with other cut flowers. with other cut flowers.

Delphinium—(Larkspur.)

A splendid perennial plant with its wonderful shades of blue. They are easily grown, but only well rotted fer-tilizer must be used to get the best results. Bonemeal worked into the soil around the roots is very benefic.al. By cutting off the flower stalks as soon as the blooms mature and begin to fade a second and often a third erop of blooms will be secured.

Bella Donna-Torquoise blue.

Duke of Connaught-A beautiful Oxford blue, bold white eyes.

Formosum—The old standard blue.

King of Delphiniums-Massive spikes 6 feet high, semidouble, color gentian blue.

Lizzie—Azure blue, yellowish eye.

Queen Wilhelmina-Very large, soft lavender; one of the best.

Geneva-Soft blue with white eye.

Masterniece—Gentian blue with white eye.

Victoria—A large flowered sky-blue.

DIANTHUS BARBATUS—(Sweet William.)

One of the most popular of outdoor bedding plants, throwing strong stems of brilliantly colored blossoms. During the period of their blooming the foliage is completely hidden by masses of attractive blossoms.

Latifolious Atracoccineus—(Everblooming Hybrid Sweet William.) A beautiful summer bedding variety, producing masses of brilliant, fiery crimson flowers throughout the entire season.

Holborn Glory—This is a large flowered selection of the auricula-eyed section, the most beautiful and admired of

all Sweet Williams.

The Standard varieties are old time favorites in colors of Scarlet, Crimson, Violet, Red, White, Pink.

DORONICUM EXCELSIUM—(Leopard's Banc.)

Splendid for cut flowers, having a good long stem, and will last a long time in water; will thrive almost anywhere. Pretty orange yellow. Very early.

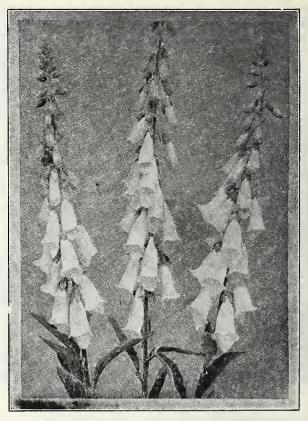

DIELTYRA—(Bleeding Heart.)

Spectabilis (Bleeding Heart)—A very old favorite and increasingly planted. Can be planted in almost any part of the garden and stands out prominently. Especially serviceable for planting in the shade.

From 15e and 25e: postpaid 20e and 40e

Each, 15c and 25c; postpaid......20c and 40c

DIGITALIS—(Foxglove.)

While in bloom these dignified and stately stalks, with their luxuriant foliage, seem to dominate the whole garden.

Gloxinaetlora—A beautiful strain of finely-spotted varieties in colors of beautiful white, purple, rose and lilac.

Grandiflora—Showy flowers of pale yellow, veined brown, spotted varieties.

GAILLARDIA—(Blanket Flower.)

One of the most beautiful of perennial plants and the most popular for cutting. The center of the blossom is a dark red-brown with beautiful markings of brilliant crimson, orange and vermillion, and occasionally a combination of all in the one flower.

Gaillardia Grandiflora—A refined and attractive flower of

a beautiful yellow and orange color; sometimes marked

with a maroon shade.

For Prices of Hardy Perennials Not Quoted, see Page 35.

FUNKIA—(Day Lily.)

(Hosta Plantaginea.)

This is a handsome variegated leaved form of the wellknown Day Lily. The leaves are strongly marked and veined with creamy white, on the background of deep glossy green. The flowers are the same as in the ordinary White Day Lily.

F. Aurea—Each, 25c; postpaid, 30c.

GYPSOPHILIA—(Baby's Breath.)

The Gypsophilas with their attractively arranged masses of minute flowers should be in every garden. If cut and dried will retain its beauty for months, providing decorative material of the very best.

Paniculata—The popular old-time Gypsophilia, much admired for its feathery appearance.

GEUM.

Beautiful hardy perennial bearing profusely large showy flowers all through the summer; an elegant flower for bouquets. Fifteen inches.

Mrs. Bradshaw—Produces large, brilliant scarlet flowers.

Blossoms during the greater part of the summer and

Atrosanguineum—Dark Crimson.

HELENUM—(Snecze Wort.)
H. Autumnale Superbum—One of the ideal hardy perennials for the border, bearing numberless small yellow flowers on a sturdy bush-like plant. 5 feet.

Riverton Beauty—Striking colored blooms, lemon yellow and purplish black.

Riverton Gem-Old Gold, changing to wallflower red.

HELIOPSIS—(Orange Sunflower.)

A valuable addition to the hardy border, for cut flower purposes, blooming earlier than the sunflowers, and rarely exceeding three feet.

H. Pitcheriana—Flowers about two inches in diameter, double, of a deep golden yellow. Continues in bloom the entire summer. A splendid cut flower.

HEUCHERA—(Alum Root—Coral Bells.)

Most desirable dwarf, compact bushy plants of robust constitution and easy culture, growing 1½ to 2 feet high and bearing during July and August loose, graceful spikes of flowers in the greatest profusion: excellent subjects either for the border or rockery, and of great value for cutting.

H. Sanguinea—Bright Coral red, very fine.

Hollyhocks.

HOLLYHOCKS

Our careful and scientific selection has resulted in the production of an unequaled strain of this magnificent plant in the best shades of color known, with colossal spikes of bloom, lasting and blooming until frost puts a check on their wonderful vitality and growth. Used as individuals well back in the hardy border, or dotted here and there amongst a bed of hardy shrubs, which they brighten with their brilliant spikes of gorgeous color after the shrubs are through flowering for the season, or as a hedge at the rear of a bed of hardy perennials, they cannot be surpassed. The strain we offer must be seen to be appreciated, with flowers whose petals seem as if made of the finest China silk. Give them a well fertilized soil with well rotted manure, deeply spaded, sufficient drainage, a plentiful supply of water in the growing season, and success is assured in any location. Their enormous sale last season bespeaks their popularity.

IBERIS (Hardy Candytuft)

A most desirable hardy dwarf evergreen plant, flowering very early in the spring, and literally covering the foliage with dense heads of bloom. Ten inches.

Iberis Sempervirens—Pure white, innumerable flat heads of bloom.

IRIS—(Germaniea.)

IRIS (Germanica)

We are the most extensive growers of Iris in the Northwest, and our collection embraces the finest varieties of the type known. Extremely valuable as cut flowers, the only rivals of the Orchids in beauty and wealth of delicate coloring, the varieties we offer would hardly be recognized as the scientifically developed descendants of the old time "yellow and purple flag." They are of easy culture and will succeed anywhere. "S" indicates the "Standards" or upper petals, and "F" the "Falls" or lower petals.

Benacensis (S)—Deep violet. (F)—Deep purple.

Canary Bird (S)—Yellow. (F)—White veined lilac.

Darius (S)—Rich canary. (F)—Lilac margined with white,

Emma (S)—Blue tinged lilac. (F)—White slightly flushed lilac.

Florentina Alba-Early Ivory White. Sweet scented.

Hamlet (S)—Dark yellowish brown. (F)—Veined deep purple.

Jennie Lind (S)—Yellow. (F)—Burnt amber.

Kochi (S & F)-Deep rich purple.

Kamuonesis (S)—Deep violet. (F)—Reddish violet.

Kharput (S)—Lavender. (F)—Veined white.

IRIS—(Continued.)

Mrs. Horace Darwin (S)—White. (F)—White reticulated violet.

Lilaeiana-Pale lavender, splashed with violet.

Paillida Odoratissima-Large flowered, lavender blue.

Pallida (S)—Beautiful shade of pale lavender blue. (F)—Rosy lavender.

Pallida Dadmatica (S)-Lavender. (F)-Veined deep violet.

Plicata Chlorus (S)—Violet and white. (F)—White veined violet.

Queen of May-Soft rosy lilac. Very satisfactory.

Madam Cheriau-White edged with blue.

Van Oldenbornessold (S & F)-Rich deep lavender.

Whitmanana (S & F)-White, very slightly tinged lilac.

- S. N. & S. Co.'s "Peerless" Collection of Iris No. 1—This collection of 12 varieties are the finest of their particular type and color. Includes the following: Queen of May, Liliciana, Kochi, Pallida, Plicata Chorus, Benacensis, Emma, Whitmanana Hamlet, Jennie Lind, Karput, Odoratissima.
- S. N. & S. Co.'s "Peerless" Collection of Iris No. 2.—The same in quality as No. 1, includes Darius, Horace Darwin, Florentina Alba, Mme. Cheriau, Benacensis, Ferer Morell, Karput, Van Oldenbornessold, Canary Bird, Pallida Dadmatica, Emma.

Either collection (Postpaid) \$1.75 Two collections \$3.00

LARKSPUR-(See Delphinium, Page 37.)

LATHYRUS—(Hardy Everlasting Pea.)

One of the most hardy climbers, a true herbaceous perennial. They are very attractive both in foliage and bloom, producing clusters of large pea like flowers the whole summer, and very valuable as cut flowers.

L. Latifolius-A bright rosy red.

L. Albus-Pure white.

LAVENDULA—(Lavender.)

Who does not know the delicious fragrance of Lavender—rarely equaled and never surpassed by the best perfumes. Grows about 18 inches high, and bears a wealth of blue flowers in summer.

L. Vera—The true sweet lavender of our grandmothers' day, and wonderfully fragrant.

LEWISIA REDIVIVA—(Bitter Root.)

The Montana State Flower.

For Prices on Perennials not quoted see page 35.

HARDY LILIES.

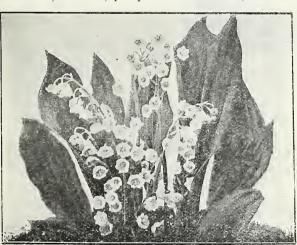

Hemerocallis Fulva.

HEMEROCALLIS.

The Hemerocallis—or as they are often called, Day Lilies— are perfectly hardy, and one of the most easily grown and showy perennials.

Hemerocallis Fulva—(Tawney Day Lily)—This variety grows from 4 to 5 feet high, bearing profusely trumpet shaped flowers of a neutral orange color, with darker shadings. Blooms in June and July.

Each, 25c 50c; postpaid......35c; 60c

Lily of the Valley.

LILY OF THE VALLEY—(Convalaria Majalis.)

Do not put this beautiful flower in some corner and leave it to literally starve. Give it a liberal mulch of well rotted fertilizer as early in the spring as possible, and note the wonderful beauty with which it will repay you for the attention.

Tiger Lily-Very large flowers, orange and black.

Madonna Lily.

Candidum (Madonna Lily)—Large white flowers, fragrant. Bulbs, each ——————20c; doz., \$1.50 Bulbs, each (Postpaid)——25c; doz., \$1.65

LOBELLA CARDINALS.

An addition to our list of border plants. They thrive in almost any garden soil but prefer a moist deep loam. Rich, fiery cardinal flowers in spikes from 12 to 24 inches.

LYCHNIS CHALCEDONICA—(Ragged Robin.)
A most desirable plant with brilliant scarlet flowers in June and July. A splendid cut flower.

FOR PRICES OF HARDY PERENNIALS NOT OUOTED, SEE PAGE 35.

LYTHRUM—(Rose Loose Strife.)

Roseum-3 feet high, heavy, large spikes of rosy flowers. Virgatum-Grows two to three feet high erect stems and bright, rosy purple flowers.

Pentstemon.

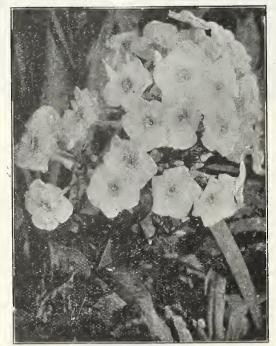

PENTSTEMON. A most useful and showy perennial, either for mass planting, the rockery or border work. In some respects they rival Phlox, Petunias. etc., especially for bedding purposes. Barbatus Torryeii

—Scarlet spikes, height 3 feet.

Digitalis — Purple and white.

PHYSOSTEGIA

(Virginia Heather) One of the most beautiful of the Hardy Perennials forming dense bushes four to five feet high with long spikes of tubular p.nk flowers like a gigantic Heather, and very valuable for cut flowers.

Hardy Phlox. PHLOX—(Hardy.)

This is another hardy perennial in which we are special-In is another hardy pereiniar in which we are specializing, and no better collection can be found in the entire Northwest than those offered. They will succeed in almost any soil and location, yet no class of hardy plants will better repay a little attention. Give them well spaded and enriched soil, with a good mulching of fertilizer in the early spring frequent welcoming in the growing season, and they spring frequent waterings in the growing season, and they will produce enormous heads of brilliant bloom. Treated in this manner, and they will be one of the chief attractions of any hardy border.

PHLOX—(Continued.)

F. G. Von Lassburg—The purest and largest white known. Geo. A. Strohlein—Bright scarlet with crimson red eye. Louis Blanc—Reddish-violet with purple shadings and darker eye. One of the best dark varieties. Edmund Rostand—Reddish violet, shading brighter toward

the center of petals.

Siebold—Bright scarlet and one of the very best of its

class.

Vesuvius—Red with bright purple eye. Quite showy. Von Hochberg—The finest crimson, Elizabeth Campbell—Very bright salmon pink with dark red eve

Bridesmaid—Pure white with large crimson carmine eye. Pantheon-Bright carmine rose.

R. P. Struthers-Bright rosy carmine, with claret red eye. De Miribel—White suffused with rosy scarlet: crimson eye. Hyon—Reddish pink.

Bouquet de Fleurs—White, with a cherry eye.

Miss Lingard—A grand early dwarf white variety.

Platycodon,

Drago-Light red with dark eye.

Elegautissima — A la flowered early white.

Verdi—A beautiful rosypink.

PLATYCODON.

Sometimes known as the Japanese Bell Flowers, very closely allied to the Campanulas. They are a hardy genus producing large cup-shaped blooms of delicate beauty, in great profusion, beauty, in great profusion, on erect slender stems, growing to a height of about two feet. Give them rich, light soil, sufficient water in the growing season, and they bloom from early summer until frost.

P. Grandiflorum—Deep blue flowers, deeply and star pointed. cupped

P. Album—Pure white flowers with the same hab tas Grandiflorum.

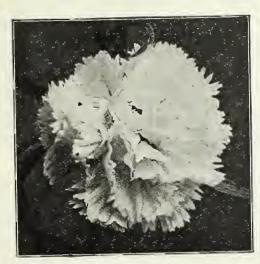

A Chister of Pyrethrum in Our Nursery.

PYRETHRUM.

Too much cannot be said about this superb perennial, which will thrive under almost any conditions. Splendid for cutting, lasting a week in good condition.

Hybridum, Mixed (Single)—In the choicest shades of red and pink. June flowering.
Uliginosum—Grows 4 to 5 feet high, covered with large Marguerite-like flowers. The individual flowers are often 4 to 5 inches across and borne on a good stiff stem.

PINKS—(Hardy.)
These are the old time Spice or Clove Pinks, and are indispensable for edging the hardy border, and also make beautiful independent beds. Their fragrance is delightful, are a most excellent cut flower, and will grow and succeed anywhere.

Homer—Rosy red with dark center.
Her Majesty—Large pure white flowers. Very fine,
Juliette—White laced crimson.

Stanislaus-Rose with crimson ring.

Swan-An everblooming white.

Oriental Poppy.

POPPLES

ORIENTAL POPPY.

The perennial Poppies with their rich and brilliant colors make a dazzling effect during the summer months, and whether planted singly or in masses their large flowers and freedom of bloom render them conspicuous in any and freedom of proom render them conspictous in any position. They are of the easiest culture, almost any kind of soil suits them, but they do best in a deep rich loam. Give them water occasionally during dry weather and they will increase in size and floriferousness for several

Oriental King-Large size, rich crimson. Princess Victoria Louise—Salmon pink.
Salmon Queen—A beautiful shade of salmon yellow. Goliath—A large flowered bright scarlet of strong growth.

Iceland Poppies.

Iceland Poppies—These plants give a profusion of cupshaped flowers throughout the entire season and are very useful for cutting. Colors white, yellow and orange.

PRIMULA—(Hardy Primroses.)
The hardy Primroses are invaluable as low growing plants on the front of the hardy border. With the Auricula, also one of the Primroses, they are coming into another term of well-deserved popularity.

P. Eleatior-The well known Gold-laced Polyanthus. One of the earliest spring flowering plants, with large heads of bloom that are best expressed by the term—Gold

Primula Veris—The English Cowslip. Who does not know the Cowslip, with its head of deliciously fragrant flow-ers one of the earliest to welcome the advent of spring.

RUDBECKIA.

Golden Glow-This never seems to lose its popularity-it is very showy and easily managed. Four to five feet.

Purpurea-Flowers about 4 inches across, of a peculiar reddish purple with a large brown cone shaped center.

For Prices of Perennials Not Quoted see Page 35.

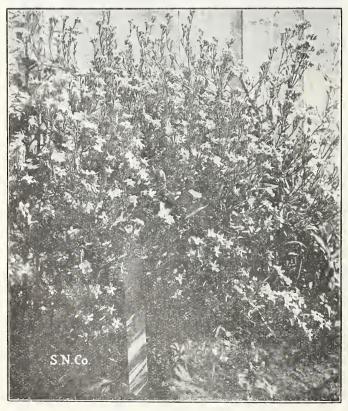

Rudbeckia (Golden Glow.)

SAPONARIA.

S. Caucasia—A splendid hardy plant, producing white rose-tinted flowers all summer and fall. 45 inches.

SCABIOSA JAPONICA.

One of the handsomest of the hardy perennials, bearing on long, wiry stems beautiful artistic lavender blue flowers. A fine cut flower. 48 to 24 inches.

STATICE—(Great Sea Lavender.)

STATICE—(Continued.)

S. Latifolia—A noble plant for hardy border. Produces clumps of leather-like leaves, with heads of bloom which frequently measure 24 inches across, covered with small blue flowers and lasting until frost. The flower sprays when cut and allowed to dry will keep in almost their fresh cut appearance for months.

SHASTA DAISY—See Chrysanthemum Maximum, Page 37.

SPIREA—(Asilbe.)

SPIREA—(Asilbe.)

This plant while very hardy, is perhaps grown in greater quantities than any other for Easter, with the exception of the Easter Lily. Its beautiful white feathery plumes of bloom stand well above the foliage, which is also very ornamental. It will grow in almost any location, but prefers a loose sandy rich soil, and requires plenty of water in the growing season. A few plants of this are indispensable in laying out a hardy border in this section and are of the easiest cultivation.

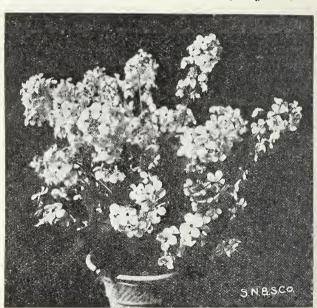

S. Gladstone—White plumes borne in great profusion. Early flowering. 18 inches.
Blooming Plants—at Easter, \$1.00.
Dormant Roots—each, 50c.

Dormant Roots-each, 50c.

STOKESIA CYANEA—(Cornflower Aster.)

Lavender-blue Cornflower-like blossoms borne on long, stiff stems. Does well in sunny position and is adapted for both border or massing.

SWEET WILLIAM—(See Dianthus, Page 38.)

SWEET ROCKET—(Hesperis.)

Strong growing perennials, forming bushy plants 3 to 4 feet high. Well known, and very valuable for cut flowers. Will succeed in almost any position. White—Large flowered. Purple—Large flowered.

THALICTRUM—(Meadow Rue.)

Exceedingly graceful and handsome flowered plants, and great favorites for the hardy border everywhere.

- T. Adiantifolium-One of the most handsome of the species, with finely cut foliage resembling the Maiden Hair Fern, and profusely bearing small white flowers. Two
- T. Dipterocarpun—A distinct and rare species, flowers a beautiful shade of rosy purple, with finely cut foliage. A very strong grower—3 to 4 feet.

TROLLIUS-(Globe Flower.)

Handsome free flowering plants, producing most profusely from May to September, giant buttercup-like blooms of a yellow and orange color on stems from 1 to 2 feet high. They prefer a half-shady position and a light

Each, 35e; postpaid.....50c

VALERIANA OFFICINALIS—(Hardy Garden Heliotrope.)

A fine hardy plant, with very showy heads of rosy white flowers, produced in great numbers on stems about three feet high, heliotrope scented. A constant bloomer until

VERONICA SPICATA.

This well known "Speedwell" is one of the best of the genus, bearing long spikes of blue flowers from July until the early frosts. One to two feet.

VINCA (or Periwinkle.)

Minor—Also known as Trailing Myrtle. This pretty evergreen is extensively used for covering graves, producing in the spring an abundance of blue flowers.

Each ________25c and 50c Each (Postpaid) ______35c and 65c

V. Minor Argentea Variegata—This new introduction is of the same habit as V. Minor, equally as hardy, but has beautifully silver edged foliage. A most valuable acquisition.

PEONIES

These old-time favorites are more than ever claiming the front rank of popularity. The new varieties introduced in recent years with their great variety of exquisite colors and such perfect flowers possess a striking individuality, and planted singly or in groups produce a gorgeous effect. Their only requirements are a good rich soil and a sunny position, which however, is not absolutely necessary as they thrive almost equally well in a partly shaded position. A liberal supply of water during the growing season being sufficient to give an abundance and wealth of flowers, producing a gorgeous effect not equalled by any other flower.

PEONIES—(Continued.)

PEONIA OFFICINALIS.

This is the old-fashioned Peony and comes into bloom from ten days to two weeks ahead of the other sorts. All are strong growers, with full fragrant flowers.

*Officinalis Rosea—Double rose.

*Officinalis Rubra—Double blood red.

*Officinalis Mutabilis—Pink changing to white.

NEWER VARIETIES.

*Achille—Rosy red orange center.

*Baron Rothschild—Deep rose, mid-season. Long stem.

*Edulus Superbus—Dark rose with light rose center.

*Edulus Superbus—Dark rose with light re Eugene Verdier—Pink, very full flower. *Felix Grousse—Brilliant red. Ne Plus Ultra—Dark rose, very large. *Queen Victoria—Greamy white, early. Humei—Deep rose, large fragrant flower. Rosea Magna—Dark pink, lilac center. Thorbecki—Delicate rose. Commata—Very dark red.

*Festiva Maxima—Creamy white with carmine center.
*Lady Branwell—Silvery rose.

\$2.00 each, by express only.

State Nursery and Seed Co.'s "Peerless" Collections

Hardy Perennials

We have a steadily increasing demand for these collections, and have received many flattering testimonials as to their value. They include only varieties that have proven hardy under the most trying conditions in this section, and will give a succession of bloom during the entire summer. For a detailed description of the varieties named see the classified list, pages 35 to 45.

Ornamental Plants for Porches, Terraces and Lawns

These plants are greatly used in all sections of the country for the decoration of lawns, terraces and porches. No home with a good expanse of lawn or terrace or with large porch stoops, appears to the best advantage without some finish of this character, and the plants we offer, grown in tubs, cannot be surpassed for this purpose. They require the protection of a good shed and a covering of straw for the winter. They are ofttimes when not too large, used for interior hall decoration for the winter months. Do not allow them to suffer for water in the summer.

AUCUBA JAPONICA.

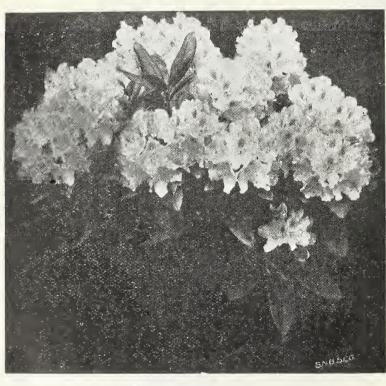

This plant is a half hardy evergreen, and should be far better known in this section. For years it has been used in the older sections of the country, and is now becoming a dependable plant for general decoration. Very useful for porch and house decoration.

A. Viridis—A green leaved variety, large, glossy deep green

reflage, bushy habit and producing very freely large green berries, turning to bright red in winter.

Variegata—A duplicate of the preceding variety, but with foliage spotted with creamy white. A handsome plant for any season.

Each, either variety, 24 to 30 inches high, in pots, \$3.00, by express only.

Rhododendrons.

RHODODENDRONS.

A grand genus—with huge heads of bloom in the most wonderful colorings. Their foliage is also as attractive as any evergreen known. Once grown, no lover of decorative plants will be without these magnificent adornments to the home.

Colors: Light pink, deep pink, red. Each, large plant in tubs.....\$2.50

KOSTER'S BLUE SPRUCE. (Picea Pungens Kosteriana.)

This wonderfully decorative plant is quite hardy when planted out in the lawn to grow into a specimen decorative plant. When grown in a tub for decorative work on the porch, and for the house in winter, it is simply beautiful, and when too large, it can be transplanted to the lawn for permanent ornamentation. The foliage is a bright silvery blue, of bushy habit,

Each, 3 feet, Balled and Burlapped for shipment,

\$8.00; per pair, \$15.00.

Each, 4 feet, Balled and Burlapped for shipment, \$10.00. Express only.

Hardy Shrubs

Both evergreen and decidious shrubs are an indispensable part of a well balanced garden. The varieties we list have been proven hardy in this climate, and we are constantly adding to the list, as fast as we determine the hardiness of desirable varieties. Those listed as half-hardy can be grown in this climate successfully with a protection of straw during the winter. the treatment required being the same as described for the winter protection of Roses, on page 34. Not only are hardy shrubs desirable as borders, but very many

of them make beautiful specimen plants for the decoration of any lawn, and they are unusually attractive for cemetery planting. A thorough spading of the soil with the addition of well rotted stable manure before planting, and an occasional light cultivation of the surface to keep down weeds, water if in a dry location during the growing season, and a mulch of manure or a light top dressing of bone meal in the fall, are all the requirements that are needed to secure good results. For pruning, very little is required. Shrubs that bloom early in the season should be trimmed immediately after the blooming period is over. Shrubs that bloom late in the season, or fall, should be pruned early in the spring. All that is needed is to keep them trimmed to a symmetrical form, to remove all dead wood, and enough of the surplus wood to insure a good circulation of air and sunshine to all parts of the plant and border. We can usually supply large specimen plants of the varieties listed at a reasonable price. Write for special prices on your requirements in large or specimen plants.

BERBERIS (Barberry.)

Thunbergii or Japanese—This grows in the form of a dense bush bearing yellow flowers, followed by scarlet berries. In Autumn the foliage assumes a gorgeous coloring of gold and scarlet. In quantity, the variety forms an impenetrable hedge and is exceptionally valuable for this

Common—The well known variety with yellow flowers and red berries. The latter are largely used for jelly.

Barberry.

CORNUS—(Dogwood.)

Our Native Dogwood is a very ornamental shrub and in rows it is an effective windbreak. White flowers followed by white berries.

Each, 50e; postpaid......60e

DEUTZIA GRACILLIS.

A handsome dwarf growing shrub, which actually covers itself with a mass of pure white blooms, borne in racemes, opening before the foliage has time to develop. One of the earliest shrubs to flower. Half-hardy, and requires protection in winter.

ELDERBERRY—(See Sambucus, Page 50.)

FLOWERING CRAB.

Medium sized tree, perfectly hardy, producing an abundance of delicate pink blossoms of great fragrance.

Each, 75c; postpaid......90e

FORSYTHA INTERMEDIA.

Golden Bells—A well known and justly favorite hardy shrub covering itself early in the spring with yellow blossoms. Each 3 to 4 feet, \$1.00.

GENISTA ANDREANA.

A handsome variety of the Scotch Broom, bearing very early in the spring beautiful pea-shaped and fragrant yel-low flowers in great profusion. Half-hardy, requiring winter protection.

Are you desirous of a fine lawn?

Use Rocky Mountain Lawn Grass
Seed. It is without an equal for the
Northwest.

HONEYSUCKLE (Bush)

Russian Honeysuckle.

Russian, Bush or Tartarian—One of the best shrubs.

Many people think it is a vine, but it is a distinct shrub as much as a Lilac is. If you have not seen this, we strongly recommend it to you. For planting against a wall or anything to be hidden it is unsurpassed. For hedges it is also of great service. During the Spring months it is entirely covered with white and pink blossoms. It rivals the Lilac in beauty and excels it in hardiness.

Each

(FOR CLIMBING HONEYSUCKLES See Page 51.)

HYDRANGEA

(SEE ALSO PLANT DEPARTMENT, Page 19.)

Hydrangeas are undoubtedly one of the best known and most popular flowering shrubs grown. The flowers which come in thick masses, have a peculiarity all their own.

Hydrangea Arborescens—This is a hardy shrub, but needs

a covering of straw in winter.

Paniculata Grandiflora—A profuse bloomer, and very popular. The flowers are borne in pyramidal panicles which when they first open are white, but make a gradual and interesting change to a rose color.

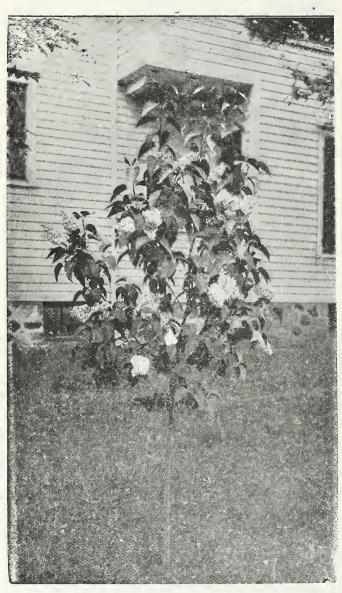

Each either variety 50c

LILACS

These shrubs have been planted for generations, but are These shrubs have been planted for generations, but are as great a favorite today as ever. Our stock of Lilaes is complete and without rival in the northwest. The shrubs never looked better and the prices, compared with the quality and size of the bushes, are unequalled. Our selection includes all the standard varieties and the most recent introductions. The strong and hardy Lilaes sent out by us cannot be beaten. Our Lilaes are Montana grown and adapted to the northwest climate, especially the Purple, White and Persian varieties of the Bush types.

LILACS—(Continued.)

The Tree Lilac is one of the many improvements that have been made on the "old purple" and has permanently set the Lilac in the front rank as an ornamental shrub. The Tree Lilac was introduced in Montana by us nine years ago and has proven a decided success.

Virginia Creeper Growing in Our Nursery.

VIRGINIA CREEPER

(Ampelopsis Quinquefolia.)

One of the most valuable climbers that has been introduced in Montana. It is extremely hardy and will make a beauty spot of any wall. Of rapid growth, and will succeed anywhere. The foliage is a rich bright green in summer, turning in the fall to crimson and gold. This vine cannot be too highly recommended. Each, 75c and \$1.00; postpaid, 85c and \$1.25 Extra large plants \$2.00 each.

WISTERIA SINENSIS

This half-hardy climber is a great favorite everywhere. It bears innumerable pendulous panicles of violet-blue flowers richly perfumed, early in the season. Requires winter protection in Montana. Good pot grown plants each \$1.00.

SOLANUM (German Bittersweet.) A vine of rapid growth and climbing habit. Foliage is a beautiful dark green. In the summer it is covered with

Shade and Ornamental Trees

IMPORTANT TO TREE BUYERS.—In buying shade and fruit trees or other Nursery stock from THE STATE NURSERY AND SEED CO., you are also getting free of charge the experience of TWENTY-EIGHT YEARS of production of these goods in Montana. This can not be offered you by any other house at any price.

State Nursery and Seed Co.'s trees are the best the Northwest can produce and the numerous unsolicited testimonials we receive bear out that fact. Our location is ideal, with soil, that gives all our trees the one essential requirement, a good strong fibrous root.

Our trees are being planted for parking not only by private persons but by many of the cities throughout the State. We cordially invite correspondence from City authorities on this subject.

Ideal packing is our specialty, the trees reaching you in practically the same condition as when they were dug. Trees are wrapped the full length in burlap and the roots covered with wet moss.

We guarantee all stock true to name, but can only replace trees that die at half price (with the exception of the Weeping Cut Leaved Birch) as we use every endeavor to send out only trees that are in perfect condition.

Write for special prices when wanted in large quantities

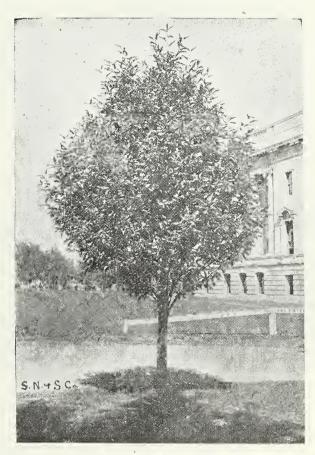

American White Ash,

ASH-(American White.)

The best hard wood tree for Montana, being extremely hardy, and growing into a most beautifully formed head. (See cut.) We cannot recommend this tree too highly for this section, either for parking purposes or for planting as individual specimens. We call especial attention to the \$2.00 size—8 to 9 ft. high. The 7 to 8 foot tree is generally planted for street parkings and we invite correspondence from city authorities.

Each, 6 to 7 ft. high........\$1.00; doz., \$10.00 Each, 7 to 8 ft. high.......\$1.50; doz., \$15.00 Each, 8 to 9 ft. high.......\$2.00; doz. \$20.00 Specimen Trees, 10 to 15 ft....\$2.00 to \$5.00

Oak Leaved Mountain Ash.

Oak Leaved Mountain Ash—Of pyramidal growth with foliage resembling that of the Oak, a handsome tree, and very hardy. Like the ordinary Mountain Ash, it bears white blossoms, followed by red berries in the Fall and Winter. Altogether, it is one of the most desirable ornamental trees for this section.

MOUNTAIN ASH—(Rowanberry.)

This is one of the most beautiful of our ornamental trees. Their luxuriant pinate and beautiful foliage gives them a very soft appearance.

European Mountain Ash—Extremely hardy with a fine soft shade of green foliage. Bears white blossoms in the Spring and red berries in the Fall, making it an ornamental tret throughout the season.

Each, either variety, 6 to 7 ft., \$1.00; doz., \$10.00

BALM OF GILEAD.

Well matured trees; have the most exquisite dark and rich shades of foliage. This tree takes root easily and seems to thrive anywhere.

Cut Leaved Birch.

BIRCH—(Cut Leaved Weeping.)

The picturesque beauty of its bark and the delicately cut foliage make it very popular. Unfortunately, this tree is one of the hardest trees to transplant known, and while we take every possible precaution to insure delivery in perfect condition, we cannot undertake to replace this tree for half price as stated on page 51. We are compelled to sell at purchaser's risk only. However, its great beauty and extreme hardiness when established, make it well worth a trial.

BOX ELDER.

Often called the Ash Leaved Maple. Requires but moderately rich soil, and is of a vigorous growth. Has been so popularly planted that it needs no description.

HORSE CHESTNUT.

This distinct variety is one of the most beautiful of our trees. Its thickly set foliage, combined with the form it takes makes it well worth trying.

Each, 6 to 7 feet.....\$2.00

ELM.

This well known and majestic tree is being more and more recognized as one of valuable shade trees in Montana. Our Montana grown stock is in great demand, and fine specimens can be seen in almost every city in the state.

Each, 6 to 9 feet......\$1.00; doz., \$10.00

WEEPING ELM.

A most picturesque variety of the genus, its irregular pendulous branches, when planted in clusters, forming a huge umbrella-like arbor.

Each, 6 to 8 feet.....

NORWAY MAPLE.

The Maples are increasing in popularity owing to the profusion of foliage and majestic upright rapid growth. Norway Maple—An excellent shade tree, the foliage in the

"Peerless" Rocky Mountain Lawn Grass Seed

Absolutely an unequaled mixture for Montana and the Northwest.

Pamphlet on LAWNS, THEIR PREPARATION AND CARE, Free on application.

POPLARS.

Thriving in almost any soil and standing our hardest winters, together with its rapid growth, make the Poplar

the most desirable of all shade trees.

Canada Poplar—This variety of the well known Poplar family is the hardiest of all, and is by far the best for this section. It is being increasingly planted year by year, and despite our efforts, it seems impossible for our Nursery propagator to keep up with the demand. Its rapid growth, dark green foliage and symmetrical form easily distinguish from any other tree in the landscape. easily distinguish from any other tree in the landscape. Carolina Poplar—Rapid grower, beautiful foliage, but not as hardy as the other varieties.

Norway Poplar—Another good variety, grows to a very

Silver Leaved Poplar-Under side of leaves are a beautiful silver grey, making it decidedly distinct from any of the

other varieties.

Lombardy Poplar—This variety is a very rapid grower very erect, forming living pillars of handsome green foliage. This peculiar habit combined with its hardy naage. This peculiar habit combined with its hardy hature make it the best variety for windbreaks, the tall green pillars rapidly reaching to a great height.

LARGE SPECIMENS of the Russian and Golden Willow, 12 to 15 feet can be supplied. Write for prices, stating number required.

Colorado Blue Spruce.

SPRUCE.

The Spruce is by far the most popularly planted being thought by many the best of the evergreens. Its dense foliage and conical shape makes it very valuable for both ornamentation and windbreaks.

Grounds Planted With Our Nursery Grown Trees.

Norway Spruce,

Norway Spruce-Very dark green, well formed and dense foliage. Each......\$1.00, \$2.00, \$3.00 and \$5.00

Colorado Blue Spruce-A rich blue foliage and very stiff pointed. \$5.00 to \$7.50

Donglas Spruce-Foliage resembles that of Hemlock: of graceful habit. Each.....50c to \$2.00

Write for special prices on specimen trees. Our prices will be interesting.

PLANTING TREES

On receiving Trees unpack without delay, cover the roots with earth and water freely.

The roots should never be exposed to the air after wrapping is removed.

All bruised ends of roots should be trimmed.

When planting do not expose roots by taking more than one tree at a time.

All Trees should be planted about 2 inches deeper than they were at the nursery. (The mark at the base determines this depth.)

Complete by well watering. Soil should be firmly packed around the roots. This is an essential point.

Fruit Trees and Small Fruits

We are specialists in Fruit Trees for the private individual and our stock is grown more especially for this class of trade. Our list is somewhat limited, because we offer only what we have proven to be adapted to the Montana climate. Montana is a cold state and it is useless as we have proved from experience—to expect varieties that do well in milder locations to stand our winters. If, however, you are desirous of getting something we do not list, let us know, and we will supply you, at the same time giving you our candid advice. All the trees listed here we can recommend for hardiness and good value, in the best of the standard varieties. Our experience of twenty-eight years is offered to you in this catalog in its entirety, free of all charge, an invaluable aid to purchasers of Fruit and other trees.

APPLES

Our Apple Trees are the very highest in vigor. Grown in a medium light soil, they have that one essential thing, a strong fibrous growth.

Duchess.

Duchess of Oldenburg—One of the hardiest and most productive of our large apples. Fruit streaked red. (Fall variety.)

Wealthy—Does well wherever grown—leading winter variety for Montana. Large red fruit.

Delicious—A well known and good Fall apple. Splendid

keeper, and delicious flavor.

Yellow transparent—Earliest and of splendid quality, and does well in any exposed situation. Fruit light yellow. Fameuse (Snow)—A late Fall variety not large fruit but plenty of it and the quality is grand—dark crimson with snow-white flesh.

McIntosh Red-We have this well-known variety in first class stock.

Hibernal—One of the hardiest, and will do splendidly in exposed places. Origin Russia. (Fall variety.)

N. W. Greening—Origin Wisconsin. Fruit a yellowish green. A Winter variety.

Gano—A rival of the well-known Ben Davis. The tree is a very vigorous grower. Origin Tennessee. Winter variety.

riety.

Wealthy Apple in Fruit.

Transcendent Crab.

CRAB APPLES

Hyslop-A very beautiful Crab. Large, deep crimson fruit.

CHERRIES

Cherries do very well in some parts of Montana, while in others they will not succeed. We advise our customers, where Cherries are not grown, to test a tree or two of the hardiest varieties, before attempting to plant on a large scale. This will lead to practical knowledge for the different localities, and prevent severe disappointment.

Rocky Mountain Cherry.

PLUMS

Aetna—A most prolific red, of medium size and very hardy

Lombard—Medium sized fruit borne in great quantity.

Weaver—Large purple fruit, very abundant.

De Soto-Red, shaded yellow; of enormous productiveness.

Bradshaw—Very large dark violet red fruit juicy and of splendid quality.

Plums—(Continued.)

Compass Cherry Plum—This is a cross between a Cherry and a Plum, and one of the very best trees for Montana. It is extremely hardy, and will thrive where any other tree will hardly grow. In the spring it is covered with a dense mass of blossom, making it invaluable for planting as a decorative tree anywhere. It bears enormous quantities of fruit, which ripens late in the season, and are invaluable for jelly.

BUSH FRUITS

BLACKBERRIES

To get best possible results plant in rows six feet apart about three feet in the row.

Stone's Hardy—Vigorous and upright growth. A very dependable variety, and although its fruit is a little smaller than others of its class, its extreme hardiness will always keep it a favorite.

Snyder—Very productive and hardy; fruit sweet and juicy, ripens early.

CURRANTS

Besides being a desirable fruit bush, it also forms a very ornamental bush in landscape work. Last year our sales of currant bushes were far in advance of previous years, a significant proof of their popularity. Our bushes this year are exceptionally vigorous, upright and compact.

Red Variety (Cherry)—Very productive, color a bright red, in profuse clusters.

North Star—Fruit borne on naked stems, quality rich and mild, good red color.

Fay's Prolific—Fruit average, bright red color thin skin. Common Red—Berry medium to large.

White Variety (White Grape)—Spreading bush and very productive, berries very large.

Black Variety (Black Naples)—Fruit varies from small to large, well known variety.

Each, 25c;	postpaid,	35c;	per	doz.,	\$2.50
Postpaid					
Each, large	size, 50e	; post	paid		65c
Per doz., \$5	.00: postp	aid			\$5.50

CURRANTS—(Continued.)

Currant (Periection.)

Perfection—We offered this six years ago and met with a great sale. It is a cross between Fay's Prolific and White Grape. Quality superior to any yet on the mar-ket. Rich sub-acid flavor with plenty of pulp and few seeds.

Gooseberry.

GOOSEBERRIES

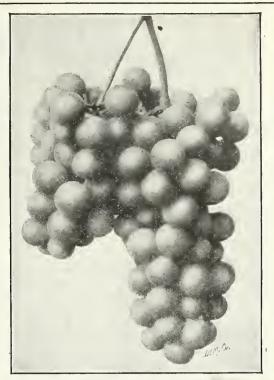

When planted a good distance apart and given good, shallow surface cultivation the Gooseberry does exceptionally well in this state, and should be more generally

planted.

Columbus—Hardy and large, and we have grown it for years in unsheltered positions.

Smithers--A purple variety of medium size, very prolific and hardy.

are desired to turn dogs or other objectionable animals. They can be kept pruned to any desired thickness and are impenetrable. Each, 3 to 4 feet. 50c; per 100, \$30.00

Campbell's Early Grape.

GRAPES

The following varieties are the hardiest.

Campbell's Early-An improved Concord.

Concord—The most popular.

Worden—Black, hardy, good quality. Each (Postpaid)

RASPBERRIES

While not necessary it is however, advisable to protect the Raspberry canes through the winter; we use straw for this purpose.

Herbert—This is the best variety, grows freely, hardy and produces its rich red fruit in abundance.

Price (Postpaid) per doz.....\$1.00

Marlboro—Strong grower, fruit large and sweet, red.

King-A fine hardy luscious red.

Golden Queen—The best of the yellow varieties.

Gregg-Black, splendid yielder. Price any of the last three varieties, doz 75c

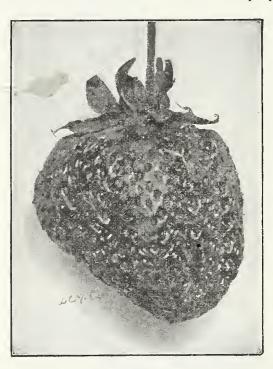

STRAWBERRIES

Pamphlet on Strawberry and Bush Fruit Culture FREE, on application.

The fruiting plant that stands the severe conditions of Montana's climate with splendid credit to itself is the Strawberry. For the space it occupies in the garden it is hard to find anything to equal it and our patrons show a constantly increasing appreciation of this fact.

Strawberries are either Perfect or Imperfect flowered. The varieties listed below are all of the Perfect flowered type.

We desire to call especial attention to the Everbearing varieties quoted. They should prove of more than usual merit for both home culture and market purposes.

Scuator Dunlap, P.—Hardy, strong grower, prolific, plant-maker, good bearer of firm berries that stands transportation well. The best early, mid-season berry for Montana and more generally planted than any other.

Wm. Belt. P.—No berry sufficiently hardy to stand our high elevations is equal to this in flavor. Plants are good sized and productive. A splendid mid-season berry, sure to please all who grow it who like fine fruit.

Glen Mary, P.—Does well in Montana in the more favored localities where it produces a good crop of fruit on plants somewhat similar to Senator Dunlap.

Brandywine, P.—A mid-season variety, with large, rich red fruit, delicious flavor. A high grade berry.

Dr. Burrell, P.—A mid-season berry, very firm fruit, good color and a heavy yielder.

Any of the above varieties (Postpaid), 100, \$2.00 (Not less than 25 of a kind supplied.)

Everbearing Strawberries

This type of Strawberry is becoming a great favorite in the northwest. Their extreme hardiness, combined with their long bearing season, make them doubly valuable, not only to the commercial grower for the market, but also for the private garden.

Progressive, P.—One of the first of the type to be introduced. A fine well-colored berry, of delicious flavor. A good shipper.

Superb, P.—Another splendid variety, superb not only in name but in every good quality which goes to make a fine strawberry. A good shipper.

Either variety, per 100 (Postpaid)......\$2.50 (Not less than 25 of a kind supplied.)

Either variety 500 (Postpaid) \$12.00 Either variety 1,000 (Postpaid) \$20.00

Tomato Plants

This well known summer fruit is fast becoming a staple article of diet in Montana. With the exception of the higher altitudes, they can be readily grown and with success. During the present crisis, and in fact as a staple article, they should be grown far more than they are, large as is the quantity now planted. As in the older sections of the country, most parts of Montana, it will be found practical to grow sufficient quantities of this delicious and healthful fruit for canning purposes, as well as for fresh table consumption. This will be found a very practical method of reducing the so-called high cost of living.

Number of plants required per acre—Staked or upright method, 3 feet in the row and 5 feet between

rows—2904.

Pot grown plants while more expensive are far more satisfactory, and when only a few are to be planted we strongly advise the pot grown.

We list the following varieties as being suited to our climate:

John Bacr—The earliest and best.

Bonny Best-Another early sort.

Acme-An old standard.

Earliana—Fruit large.

Montana Beauty-Large and good flavor.

Golden Queen—Solid, smooth and best of the yellow varieties.

Dozen, pot grown plants

CABBAGE PLANTS.

With perhaps the exception of the extremely high altitudes, Montana can produce as many pounds of this necessary vegetable to the acre as almost any state in the Union. To secure the best and quickest results irrigation is necessary on dry lands. Too much water will, however, result in "splitting." The varieties we list below are those which have proven the best both in weight and quality for this section.

Early cabbage plants require 10,000 to 12,000 plants per acre. Late cabbage requires from 6,000 to 8,000 plants per

acre.

Cut Flower Department

No. 165-Bride's Bouquet of Roses and Valley \$15.00 to \$25.00

Our Cut Flowers Department is perhaps the most up-to-the-minute of any in Montana. It is in charge of one of the foremost experts in this line obtainable, aided by a corps of capable assistants.

The fact that we grow all our own flowers. coupled with the foregoing, insures that all orders for this class of goods will be filled with the highest quality, and put up in the most artistic manner known to the craft.

We also wish to call your attention to the means at our command, whereby we can deliver cut flowers for any occasion, at any point, in the United States, Canada, or the principal cities of Europe, with the card of the donor attached, and delivered right on the hour required. Orders of this kind are delivered with all charges prepaid and charged to the person giving the order. This is accomplished by means of the FLORISTS TELEGRAPH DELIVERY ASSOCI-ATION, of which we are members, and is composed of the leading florists in all parts of the country. This service usually requires but a few hours notice.

When time is limited, it is always best to use either Phone or Telegraph, so as to give us the best opportunity possible to get out what you desire, and also prevent exasperating errors and delays.

We are constantly shipping flowers to points as distant as St. Paul on the east, Seattle on the west, and to other points equally as far, and delivering them in the best of condi-

The following pages will give some idea to distant customers of what we can offer in this line, and we can always be relied upon to furnish the latest and most appropriate designs in anything floral, for any occasion whatever.

For cut flowers for any purpose, Phone (Bell) 327, Helena, Montana, between the hours of 8 A. M. and 6 P. M. After 6 P. M. telegraph the STATE NURSERY AND SEED CO., Helena, Mont., and we will guarantee satisfaction.

No. 1—Funeral Spray of Carnations. \$3.00 to \$10.00

We guarantee safe arrival of all flowers, especially when sent by express.

S. N. & S. Co.'s Carnation Range.

Some idea of the enormous volume of our Cut Flower business in this section, and of our ability to promptly fill all orders, may be gathered by reference to the accompanying photo. This depicts the range of glass devoted entirely to the growing of Carnations for Cut Flowers, and requiring about 50,000 plants to fill the benches.

Spring 1918---Twenty-Eighth Year

SEED DEPARTMENT

Suggestions to our Customers in Ordering from this Catalogue, the reading of which will aid both you and us.

EARLY ORDERS—Our rush season comes in the months of March and April. Orders sent AT ONCE secure prompt shipment at the proper time from full stocks.

HOW TO ORDER—Write your name, postoffice, state and express office and railroad company plainly with ink, on every order, and also when you write us concerning it. Give plain express, mail or freight directions; where none are given, we route goods at buyer's risk.

USE ORDER SHEET—The use of the order sheets enclosed in this catalogue are a great help to us in filling and shipping orders. Instructions for use are on the sheets, More will be sent on receipt of a postal asking for same. Flower or Vegetable Seed orders should plainly state quantity before the name of the variety. Plant orders should give quantity, variety and price. Do not write letters on order sheet.

KEEP A COPY OF YOUR ORDER and mark off goods as received. Sometimes items may be sold out or will follow later, in which case a slip is enclosed with other goods, or notice sent.

ORDERS ARE PROMPTLY FILLED and as far as practicable, in rotation. All orders not shipped on day of receipt are acknowledged by a postcard giving the number of the order on our files. If you do not hear from an order sent us within a reasonable time, send us a duplicate of it giving date of order, amount of same, form of remittance, your full name and address, and if you have received the card of acknowledgment, the number of the order given on that eard. If you will, in case of what appears to you to be an unreasonable delay, give us these items of information in your letter regarding the order, it will aid us greatly and save valuable time in the rush season in tracing the order.

ALWAYS, IF POSSIBLE, in writing in reference to an order, give the number of the order above referred to.

MISTAKES—These will happen in spite of all care. Write us at once with a copy of original order if possible, and errors will be promptly rectified. Please do not return goods until you hear from us.

FREIGHT OR EXPRESS—All express lines in the United States and Canada carry seeds at special rates. Plants come at the same special rate when out of pots and this includes nursery stock. On moderate sized orders, we advise express shipment rather than freight,

HOW TO SEND MONEY—Send cash with order (as we do not open book accounts for small amounts) by Draft Postoffice or Express Money Order whenever possible; these are cheap and safe. Postage stamps are taken as cash for small amounts and we prefer denominations such as 5c, 10c or 15c. Registered letters can be sent from any postoffice, and your receipt sent you by return mail, by which you know it has reached us. Local checks are accepted. Make money orders or checks payable to State Nursery and Seed Co.

RECOMMENDATIONS—We tender our sincere thanks to the numerous customers who have been kind enough to recommend us. We are always pleased to mail our catalogue to friends of our customers on request. We catalogue only such goods as have proved suitable to our climate. We trust that our efforts to simplify the task of selection will meet the approval of our many friends. Our seeds are the best that can be obtained, and our facilities for testing same are unexcelled.

SEEDS BY WEIGHT—All our seeds are sold by weight, which we believe to be the most satisfactory method. Half pounds and over, at pound rate; less than half-pounds at ounce or quarter-pound rates.

All Flower and Vegetable Seeds in pkt., oz., ¼-lb., pint, or quart, sent prepaid to your Railroad Station or Post-office, except where noted. Field Seeds by freight at purchaser's expense.

REGARDING PREMIUMS—In conformity with the law passed by the 1917 session of the Montana Legislature, absolutely prohibiting the giving or offering of premiums in any form or manner, we have discontinued this form of advertising. We will endeavor to more than offset this by giving if possible better goods and more goods, based on current market prices. Note the following, formerly given as premiums:

FARMERS READY REFERENCE BOOK—The most complete farm book on the market. Every department of farm life covered in detail by experts. Each (Postpaid), 15c, white the supply on hand lasts. Well worth several times its cost.

NATIONAL COOK BOOK—A manual of Good Recipes, carefully chosen from the contributions of over two thousand successful cooks and chefs in this and foreign countries, also useful notes on the various classes of good things to eat, all of which have been carefully checked and re-checked by competent authority. Special attention has been given to Bread and Pastry Making and the various dainties dear to good cooks. Each (Postpaid) 15c while the supply on hand lasts; in every respect the equal of any book of its kind ever published.

SPECIAL FOR THE FARMER—A set of 20 varieties of Farm Seeds—Alfalfas—Clovers—Millets—Grass Seeds, etc., mounted under glass, with seeding table accompanying. A most useful outfit for the farmer desiring to know seeds and to have the means of identification on hand. Price (Postpaid), 25c.

OUR RESPONSIBILITY—It is so manifestly impossible for the seller of any perishable article to be responsible for what may happen to it after it leaves his hands, especially one like seeds or plants, which are planted in the ground under varying conditions of soil and climate, that we, in common with all American seed houses, disclaim responsibility as to the crop which may be raised from seeds which we sell. At the same time in case of any failure to secure proper results caused from some inherent fault in the seeds themselves the State Nursery and Seed Co, accepts responsibility, not for crop, but to the extent of the amount of money paid for the seeds, if immediately advised. (Or seeds may be returned. See below.) We wish it understood that all our seeds are sold under the following general non-warranty.

We do not warrant in any way, express on implied, the contents or the description, quantity, productiveness or any other matter of any seels, bulbs, plants, shrubs or trees sold by us, and we will not in any way be responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is ma et thereof, and he must return them at once, and money will be refunded. Subject to above conditions, we sell at the moderate prices herein quoted.

STATE NURSERY AND SEED CO., Incorporated.

ALYSSUM COMPACTUM LUTES-CENS—Hardy annual yellow flowered. Per pkt......10c

ALYSSUM SAXATILE COMPACTA A hardy dwarf perennial, very useful for rockwork, literally covering itself with yellow flowers. Per pkt.....10c

AMMOBIUM—(See Strawflower.)

ANNUALS—Bloom first year from seed and die after one season.

BIENNIALS-Bloom second from seed and plant dies after second year.

PERENNIALS-Bloom second year from seeds and plant li blooms for several years.

TENDER—Means plant stand the least frost.

ALF-HARDY—Means plant will stand a little frost and needs protection. HALF-HARDY-Means will

HARDY—Means plant will stand considerable frost.

AMARANTHUS TRICOLOR—(Joseph's Coat)-Mixed Pkt. 5c

These plants afford brilliant contrasts of colors, being useful for borders and groups; also, where foliage effects are desired. The leaves and stems are of different shades of red, blended with green. Half-hardy an-

ANTIRRHINUM—(Tom Thumb) Mixed Per pkt.

Beautiful dwarf growing bushy variety. Flowers are handsome and

produced in great profusion the entire season. It is not only desirable for beds and groups but also for pot culture. Perennial.

ANTIRRHINUM—(Semi Dwarf)—Choice mixed......Pkt., 10c A splendid type, growing in height between the Tom Thumb and Giant forms of this noble plant.

ANTIRRHINUM—(Grandiflora)—Tall mixed...... Flowers double the size of older sorts more closely set on the stems and colors more clear and brilliant, growing about 18 inches high. Grand mixture of many striking colors. Perennial.

ANGEL'S BREATH—(See Gypsophila.)

ASPARAGUS—(Plumosus Nanus) Pkt. 40c
An indoor perennial clumber, of wonderful beauty. It
has largely replaced the famous smilax in the floral
world. Bright, cheerful. Fern-like green.

ASPARAGUS—(Sprengeri)—Emerald Feather......Pkt., 10c

Adapted to suspended baskets; 1 to 4 feet. An excellent trailing house plant, as it withstands a dry atmosphere and succeeds everywhere. Remains fresh a long time after cutting.

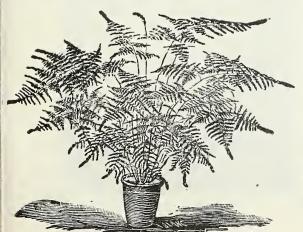

ASPERULA—(Azurea) Blue Pkt. 5e Grown for its fragrant leaves and stems which dried have a sweet odor, and are used for putting among clothes, etc. Best grown among shrubbery in semishaded positions where it can remain undisturbed.

ASPERULA TINCTORIA—(Sweet Woodruff)Pkt., 10c old-fashioned fragrant An hardy perennial plant, greatly loved for its fragrance when dried, resembling the sweet odor

of new mown hay.

African Gold Daisy.

Asparagus Plumosus.

Alyssum (Little Gem.)

Ageratum (Blue.)

ASTERS

As a popular flower the Aster ranks with Sweet Peas, Pansies and Nasturtiums. No flower is more popular, and few have held so high a place in popular esteem for so many years, and it is still grow-ing in favor. For an autumn show of flowers, we have not its equal. We offer only Asters of superior quality.

QUEEN OF THE MARKET—A first-class early variety, of branching habit. Flowers of good size, on good stems. Exceedingly valuable as a cut flower type. Blooming in July. One foot.

Purple Pkt., 10c Pure White Pkt., 10c Purple Pkt., 10c Lavender Pkt., 10c All colors mixed, pkt., 10c; ½ oz, 40c.

SEMPLES IMPROVED BRANCHING—A very strong growing class of Aster with branching habit, long stemmed, exceedingly double flowers. Blooms in August. Two feet.

Blossoms beautifully, cup-shaped, bright yellow and about three to four inches across. Stems long and smooth. There are few more satisfactory flowers in the garden than the Hunnemannia.

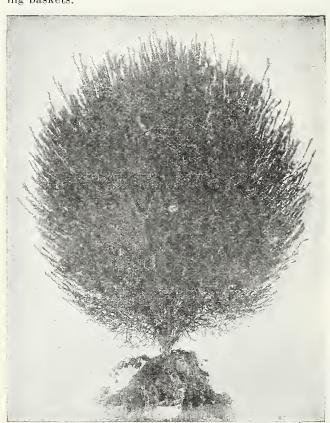

HUMULUS—(Jap. Var.). Variegated Japanese Hops. Quick growing vine for veranda or trellis. Annual; not subject to insect pests; very handsome; stand drouths well.

HYACINTH BEAN—(See Dolichos.)

IPOMEA—(Mikado)..... ..Pkt., 10c New improved Japanese Convolvulus of grand variety, flowers measuring from 4 to 5 inches across, great variety of colors, very handsome foliage.

ICE PLANT. Pretty summer trailing annual for vases and rock work; leaves covered with ice-like drops.

KENILWORTH IVY A charming trailing plant, especially adapted for hanging baskets.

Kochia Trichophylla,

Grows quickly from seed sown in the open ground. plants are of rounded or globe-like form. Early in the fall the ends of the shoots are thickly set with small bright scarlet flowers, the bushy plants resembling balls of fire; makes a good summer hedge.

Pkt., 10c ing hardy climbing plant. It will grow 8 to 10 feet the first year from seed, and after it becomes established there seems to be no limit to its growth. Its foliage is large and covers well; hears small racemes of rosy-purple, pea-shaped blossoms towards the close of Au-gust. A splendid subject for covering permanently verandas, dead trees, etc.

LARKSPUR-(Annual Delphinium)-This hardy annual is one of the best of garden plants. Sown indoors early in the season, and transplanted to the open ground as soon as safe from frost, will produce blooming plants in July, which will continue in flower until frost. A splendid cut flower. Emperor—Fine Double Mixed.......Per pkt., 10c

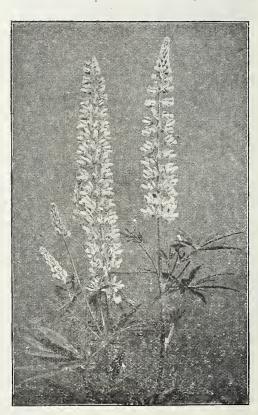

Hyacinth Flowered—Dwarf, Double Mixed....Per pkt., 10c Finest Mixed. Per pkt., 5c For Perennial Varieties see Delphiniums.

LATHYRUS—(Everlasting Sweet Pea.) See Sweet Peas.

LINUM-(Scarlet Flax)....Pkt., 5c Distinguished for their brilliant colored flowers which are crimson with black center, saucer-shaped, and very conspicuous in bed or border. The foliage of the plant is slender and delicate. Height 1½ feet. Hardy annuals.

LINUM—(Perennc)..... A fine deep blue variety, growing about 18 inches. Hardy perennial.

LINUM—(Album).. A handsome white variety of the hardy flax. Perennial.

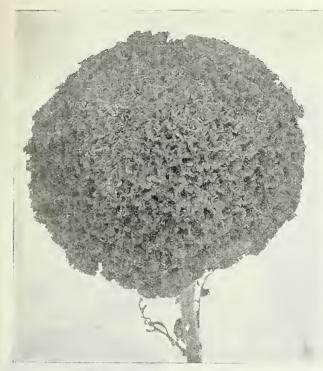

Lupinus.

LUPINUS, OR LUPINS—Mixture of all colors......Pkt. 5c thardy annuals in great variety, growing from one to three feet high, and bearing spikes of pea-shaped flow-ers. Of the easiest culture. Sow in the open ground and thin to six inches apart.

LOBELLA—(Crystal Palace)—Blue.... An elegant and useful genus of plants of easy culture and well adapted for bedding. They make a neat edging for beds and are very effective in masses, being always completely covered with flowers. Annual.

LOBELLA—(Speciosa)... A trailing variety with deep ultramarine blue flowers. Very fine for hanging baskets and boxes.

Marigold—(African Double.)

MARIGOLDS-Old-time favorites of most easy culture and growth. One of the most showy annuals with their wonderful shades of yellow. Require a light soil and full exposure to the sun to get best results.

African Marigolds—Tall.

Eldorado—Flowers very large, imbricated and very double. Colors in all shades of yellow.Per pkt., 10c Lemon Queen-Large flowered variety with lemon yel-very double flowers of a rich deep golden-orange color.

Tall African Double Mixed Per pkt., 5c

Dwarf French Marigold—The dwarf French Marigolds
rarely exceed one foot in height, and their most beautifully marked flowers of all shades of yellow and brown, are exceedingly attractive. Mixed.....Per pkt. 5c MATHIOLA BICORNIS—(Evening Scented Stock)....Oz. 25e

No annual in cultivation equals this in delicate perfume of its flowers. The pink and lilac blossoms partly close during the day, but expand and impart their fragrance in the evening. Include with your order a packet or two of Evening Stock. You will not regret it.

MATRICARIA—(Feverfew)—Double white.... A favorite bedding plant and profuse bloomer.

Mignonette—(Sweet Scented.)

MIGNONETTE—(Sweet Scented)... ..Oz., 25c; pkt., 5c

A compact growing variety with medium long, thick spikes of yellow florets.

MIGNONETTE—(Pure Machet)......Oz., 50c; pkt., 40c A compact growing variety with thick spikes and large florets of a copper color. MIGNONETTE—(Allan's Defiance).... Very fine, long spikes, splendid for cutting. MIGNONETTE—(White Goliath).....Pkt., 10e A very fine white, with large spike. MIGNONETTE—(Victoria) Pkt., 10e A large flowered crimson variety. MIGNONETTE—(Rubin) Pkt
A rich copper-scarlet, the darkest of the family. compact and dwarf habit. MOON FLOWER... So called from its rare peculiarity of blooming best at night, although it also expands its flowers on dull days.

hanging basket. MYOSOTIS—(Forget-Me-Not)..... Neat and beautiful little plants with star-like flowers; succeeding best in a shady, moist situation; half hardy perennials; blooming the first year from seed if sown early. The true Forget-Me-Not; beautiful blue flowers.

early. The true Forget-Me-Not; no MOURNING BRIDE—(See Scabiosa.) LOVE-IN-A-MIST—(See Nigella.)

NASTURTIUMS—(Tall or Climbing)—Named colors. .50e; 1 oz. 20e; ½ oz., Chameleon—Different colored flowers on the same plant.

Prince Henry-A fine Lemon Yellow. Vesuvius—Salmony rose, dark leaved. Spitfire—Brilliant orange-vermillion.

Black Prince—Velvety, purplish-crimson, dark feliage. Queen—Variegated leaves and various colored flowers.

among Nasturtiums. Some of the most striking are: White, Shaded Carmine, Deep Maroon Throat, Golden-yellow, shaded Brown edges; Yellow, shaded and mottled Carmine; bright Yellow, etc.

NASTURTIUMS—(Dwarf Varieties)—Named colors.

Prince Henry—Cream spotted and tipped with red.

Ruby King—Rich crimson rose. Vesuvius—Salmony-rose, dark foliage; very bright. Cloth of Gold—Scarlet flowers and yellow foliage. Golden Midnight-The foliage is of a yellowish green, with flowers of a very dark maroon, the contrast producing a most wonderful effect.

(Dwarf Prize Mixture)—Price, 1 lb., \$1.50; ¼ lb., 40c; 2 oz. 25e; 1 oz., 15c; Pkt.

This is undoubtedly the finest mix-ture of Dwarf Nasturtiums offered any where.

> Every shade is grown separately and we blend this mixture on o w n our premises, under our own personal supervision.

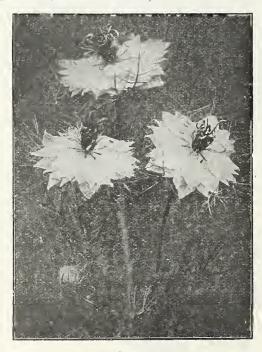

LOBB'S NASTURTIUM

lighter shades. Sow in spring and thin to 1 foot apart. Hardy annual; 6 inches high.

NICOTIANA—(Mixed)—Large flower Pkt., 5c

Nicotiana (Sanderae Mixed.)

Nigella.

NIGELLA—(Love-in-a-Mist or Devil-in-a-Bush)—This is a low growing annual, producing blue and white flowers in great profusion. The flowers are followed by curiously formed seed pods. The foliage is very pinnate or finely cut. Of compact habit. One foot. Damascena.. ..Per pkt., 5c OENOTHERA RUBICALYX—(California Evening Primrose)—This is a novelty among the evening primroses of great beauty for the garden. The combination of red

stems with red buds and yellow flowers make it a beautiful and striking plant in any collection of hardy an-

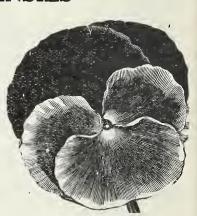

nuals. Pkt.

Oenothera Rubicalyx, (Evening Primrose "California.")

PANSIES

These popular flowers thrive best on a cool, moist but well-drained soil, enriched with wellrotted barnyard manure or fine ground bone. Seeds sown early will produce fine plants for autumn blooming. The proper method is to sow in July or August and protect the plants during the winter when they will flower continuously the next spring and summer. Our Pansies are renowned for size and color.

BEDDING VARIETIES.

Cardinal—The most brilliant red.

Couquette de Poissy-A beautiful pale rosy mauve, very

Emperor William-Dark ultramarine eyes. Fire King—Red and yellow with brown eyes. Fairy Queen—Blue with azure margin.

Wall Flowered—Colored brownish and gold. Gipsy Queen—Terra Cotta and bronze.

Gold Margined—Dark with gold margins.

King of Blacks—Almost coal dark.

Lord Beaconsfield—Deep purple violet shading off in top

petals to white. Meteor-A bright Terra Cotta.

Purple Bedding—(Artropurpurea)—Rich deep purple. Victoria—Very large bright blood red. Violet blotched.

White—Pure, without eye. Yellow—Pure, without eye.

New Curled-A handsome type, with curled edges and in various colors.Pkt., 10c

Masterpiece—(New Giant)—The flowers are perfectly round and contain the richest combination of colors, each petal being distinctly marked with a dark blotch; most of the flowers are margined with white or yellow edge and have long stems, Per pkt. 10c S. N. & S. Co.'s Peerless Mixed Per pkt., 10c S. N. & S. Co.'s Premium Mixed Per pkt., 20c

PETUNIAS

Phlox-Drummondii.

POPPIES

Annual Poppies should be sown as early in the spring as possible; they do not stand transplanting. Sow very thinly, barely covering the seed. Press down firmly, and they will come up in a few days. It is well to make several sowings at intervals to keep up a succession of bloom. If picked just before expanded, the flowers will last several days.

SINGLE ANNUAL VARIETIES.

POPPY—(Miss Sherwood)—Satiny white. Oz., 50c; Pkt., 10c Shaded on fringed margin with salmon rose. Height 2 feet.

POPPY—(Single Annual)—Mixed colors, Oz., 25c; Pkt., 5c Gorgeous colorings, easily grown from seed sown in the open ground, where they are to remain.

POPPY—(Tulip or Glaucum Flowered)—Oz., 50c; pkt., 40c Intense scarlet single blossoms. The brightest colored of all Poppies.

Shirley Poppies.

POPPY—(Select Shirley)—Mixed colors Oz., 50c; pkt., 10c
An extra fine strain of charming Poppies. They are
single and occasionally semi-double and range in color
from the purest white through the delicate shades of
pale pink, rose and carmine to the deepest crimson and
blood red, while many are dainty edged and striped. In
fact, so varied are they that scarcely any two flowers
are alike.

PETUNIA—(S. N. & S. Co.'s Double Mixed).......Pkt., 25c New large flowers; our strain is the best that can be secured from any source at any price.

Petunia (Single Fringed.)

Pkt., 10c	
Crimson-Maroon, with a well defined five-pointed star	9
of bluish white.	
PETUNIA—Large flowering. All colors, single fringed and	1
ruffled. Pkt., 100	,
PETUNIA—Blotched and StripedPkt., 100	
A splendid selection of wonderful coloring	,

PHLOX—Drummondii

Unquestionably one of the finest annual bedding plants grown. Sown in the open ground, immediately all danger of frost is past, and in a few weeks they are a mass of brilliant hued bloom, continuing until cut down by frost.

Alba—Pure white ... Per pkt., 10c
Coccinia—Fine scarlet Per pkt., 10c
Oculata—White with purple eye Per pkt., 10c
Isabellina—Yellow Per pkt., 10c
Radowitzii—Rose and white eye Per pkt., 10c
Peerless Mixed Per pkt., 5c

POPPY—(Dannebrog, or Danish Cross) Oz., 25c; pkt., 5c Very showy variety, producing large flowers of brilliant scarlet, with a silvery white spot on each petal, forming a white cross.

OPPY—(Admiral)......Oz., 60c; pkt., 10c White margined with brilliant scarlet. A very line new POPPY—(Admiral)...

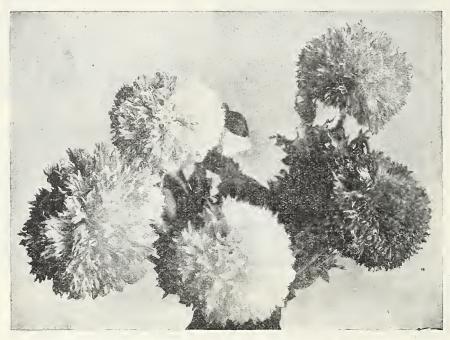

colors.

POPPY — (Oriental Hybrids) — Mixed Beautiful hybrids of the Oriental Poppy, producing flowers of immense size, 6 inches and over in diameter, and of many novel colors, ranging from delicate shades of salmon to

deep crimson.
PORTULACA—(Moss Rose or Sun Plant) Low-growing or creeping tender annual six to eight inches high, and bearing glossy, cup-shaped blossoms in very brilliant and gorgeous colors. The foliage and stems are thick. The seed germinates slowly and should be started under the glass or when the weather is hot. These flowers love the sunshine and do best on rather dry ground; excellent for embank-

ments PYRETHRUM AUREUM — (GoldenPkt., 10c Feather)..... A most desirable dwarf Pyretheum for edging of borders, with golden yellow foliage

PYRETHRUM ROSEUM HYBRIDUM GRANDIFLORUM—A large flowered type, with bright colored and attractive blooms for cutting. The flowers are light pink to deep carmine, with yellow center......Pkt., 10c

Double Carnation or Peony Flowered Poppy.

DOUBLE ANNUAL VARIETIES.

These Poppies are very handsome. The flowers grow to an enormous size, from 6 to 7 inches in diameter, are as double as Peonies and the colors are very rich and striking.

POPPY—(Double Carnation or Pcony Flowered, Mixed) Oz. 25c; pkt.... Large, full, double fringed flowers, 2 feet high.

Oz., 30e; pkt., 10e POPPY—(Cardinal Scarlet)..... Splendid double fringed flowers.

POPPY—(White Swan)—Immense double white flowers, beautifully fringed......Pkt., 10c

POPPY—(Donble Salmon Pink)......Oz., 60c; pkt., 10c A beautiful shade and a favorite with all.

.....Oz., 40c; pkt., 10c white, bordered with scarlet.

POPPIES—PERENNIAL VARIETIES.Hardy perennials of easy culture; in bright, glowing colors, bloom first year from seed.

POPPY ORIENTAL—(Papaver Orientale)......Pkt., 10c This is the most gorgeous perennial Poppy flowering in June and July, with enormous blossoms often measuring 5 to 7 inches across, deep crimson, with a conspicuous black blotch on each petal. Transplanting should be done carefully. The best time to lift plants is in August.

Poppy Oriental.

DO YOU WISH A FINE LAWN?

Sow Rocky Mountain Lawn Grass Seed.

Send for our Pamphlet on Lawns, FREE on Application.

PHYSALLIS—Franchetti (Alkekengi)Pkt., 10c The winter cherry. A splendid plant to grow in pots for winter decoration bearing bright red fruit in great profusion. Known as Chinese Lantern Plant. RICINUS—(See Castor Oil Bean.)

Salpiglossis (Finest Mixed.)

SALPIGLOSSIS-(Painted Tongue)-Finest Mixed, all col-beautiful orchid-like flowers, produced from early summer until late fall. Seed should be sown early in spring in a hot bed or window and transplanted when weather is settled or directly out of doors after danger of frost.

Large improved strain with a complete range of colors.

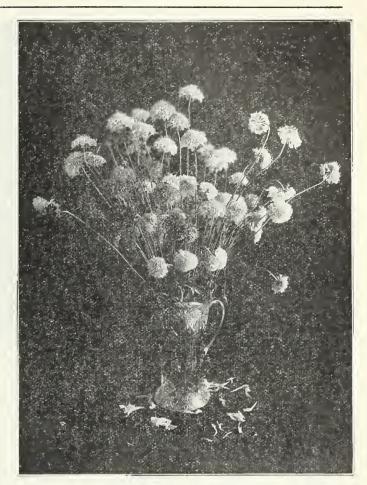

SALVIA—(Scarlet Sage)..... A tender perennial, blooming the first season from seed. The blossoms are borne on long stems in racemes or spikes and are fragrant. The plant blooms profusely.

SAPONARIA—(Calabrica)—1 foot Dwarf annual with small pink starry flowers borne in profusion; excellent for edgings or small beds.

SCABIOSA—(Mourning Bride, or Pincushion Flower)
They grow about 2½ feet high, and come into bloom
early in July and continue without interruption until
hard frost. The beautiful flowers are known in profess. are borne on long stems, and when cut, keep in perfect condition for the best part of a week. They make effective borders or beds, and no garden is complete without Scabiosa, especially when flowers are wanted for cutting.

Azure Fairy—Clear Lavender Blue......Pkt., 10c Golden Yellow. Pkt., 10c
Tall Double Mixed. Pkt., 10c
Dwarf Choice Mixed. Pkt., 5c

See Index on last page, for complete list of varieties of Seeds and Plants listed in this Catalog.

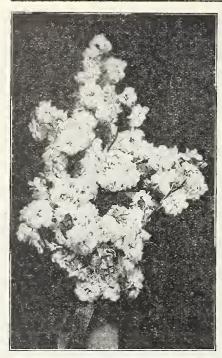

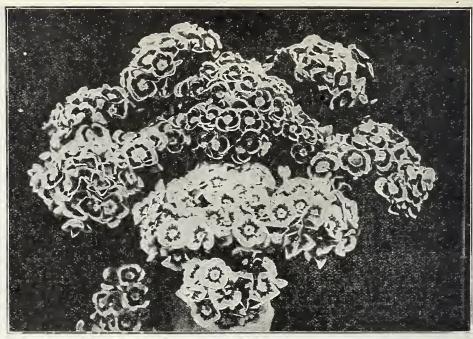

Scabiosa (Mourning Bride.) SCHIZANTHUS—(Butterfly or Fringe Flower.)—Mixed Called the "poor man's orchid" on account of their easy culture and resemblance in form and variety of coloring to some of the floral aristocrats. Sown out of doors in spring where they are to remain, or started inside and transplanted when the weather is suitable.

SNAPDRAGON—(See Antirrhinum.)

STATICE—(Sea Lavender)—Hybrids, mixed.......Pkt., 10c These useful plants bear everlasting flowers that last a long time after cutting, and are very easy of culture.

Stocks.

STOCKS—(Gilliflower)—The stock is one of our very best annuals, either for bedding purposes or for pot culture. Their wonderful range of colors, and unequaled fragrance make them extremely valuable. Improved Large Flowering 10 Week Stocks.

SPENCER SWEET PEAS

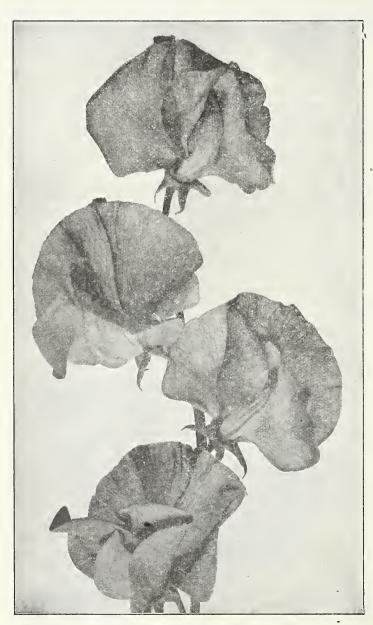

The Waved Type

Our Sweet Peas are carefully grown by experienced men, from selected Stock Seed, and better seed cannot be had in this country than is supplied by us.

Our 8-page Booklet on Sweet Pea culture is compiled especially for Montana conditions and contains valuable information for the Sweet Pea lover. We will mail you a copy Free on request.

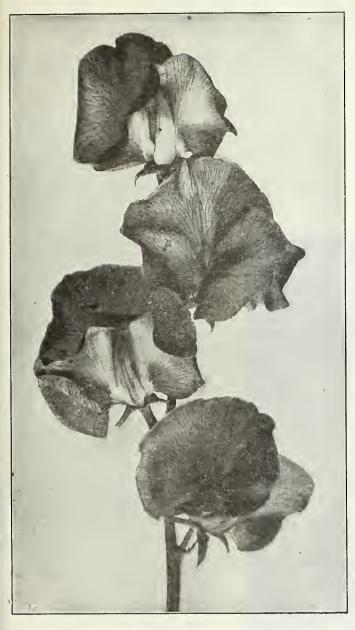

Alphabetical List of Spencer Sweet Peas for 1918

The true Spencer type should always bear an "open keel." The real determining feature of a true Spencer is found in the keel.

Spencer Sweet Pea-Aurora.

- AMERICA—Per packet, 10c; oz., 40c. White ground heavily striped and flaked with bright crimson scarlet. A large, bold flower of splend d form.
- APPLE BLOSSOM—Per packet, 10c; oz., 40c. Very large bold flower of best Spencer form. Standard very bright rose wings primrose with flush of rose tint. A grand, robust variety.
- ASTA OHN—Per packet, 10c; oz., 40c. The best lavender Sweet Pea. Is more truly a soft pinkish lavender self. Flowers are very large and beautifully waved. A very charming variety.
- AURORA—Per packet, 10c; oz., 40c. Flowers white, mottled and flaked with bright orange pink. Splendid form and nicely waved. A very pretty flower and one of the finest and largest Spencers.
- **BEATRICE—Per packet, 10c; oz., 40c.** The standard is a mingling of blush and buff; the wings are pure pink. Of good Spencer form, but not so large as Countess Spencer.
- BERTRAND DEAL (Improved)—Per packet, 10c; oz., 50c. Large, rosy lilac of great vigor. Flowers of splendid form and substance. Very fine for cutting.
- BLANCHE FERRY—Per packet, 10c; oz., 40c. A giant type of Spencer form with rose standard and wings white, suffused and tinted with light pink.
- CAPTAIN OF THE BLUES, or WAVERLY SPENCER—Per packet, 10c; oz., 40c. Pure purple. The margin of the petals is marbled. Very large and distinct.
- CLARA CURTIS—Per packet, 10c; oz., 40c. A beautifully waved cream, good substance, stems usually have four large flowers—a superior strain of Primrose Spencer.
- COUNTESS—Per packet, 10c; oz., 40c. The original giant flowered Spencer with finest waved standard and wings clear pink, deepening somewhat towards the edge, but almost self-colored. Still one of the best Sweet Peas of today.
- DOBBIES, GEO HERBERT, LAVENDER—Per packet, 10c; oz., 50c. A very clear, bright lavender.

Spencer Sweet Pea-Margret Atlee.

SPENCER MIXED HYBRIDS—¾-1b., \$1.50; oz., 50c; ½ oz., 25c. A splendid mixture, blended carefully. Has pleased thousands of our customers.

SPECIAL OFFER OF SPENCER SWEET PEAS.

- **DUPLEX—Per packet**, 10c; oz., 40c. A rich cream pink. Practically all the plants give flowers with double or triple standards.
- ELFRIDA PEARSON—Per packet, 10c; oz., 50c. Giant pale pink on white ground. Plants exceptionally vigorous. Most useful pink for decoration and exhibition.
- EMPRESS EUGENIA—Per packet, 10c; oz., 40c. Lilac, striped on white.
- **ENCHANTRESS—Per packet, 10c.** Bright pink, shading a little deeper at the edges. Practically the same as Countess.
- ETHEL ROOSEVELT—Per packet, 10c; oz., 40c. Light buff primrose, with light pink flakes and stripes.
- FLORA NORTON—Per packet, 10s; oz., 30c. Very nicely waved. The color is bright blue with tint of purple.
- FLORENCE MORSE—Per packet, 10c; oz., 40c. Standard richly flushed with a beautiful and distinct shade of pink; wings soft blush pink, giving the flower a charming appearance; very large and wavy.
- FLORENCE NIGHTINGALE—Per packet, 10c; oz., 40c. A very large, finely waved bluish lavender.
- GAIETY—Per packet, 10c; oz., 40c. The best bright colored stripe in existence. This is really a handsome Pea. The color is bright rose crimson, striped and splashed on ivory white. Very vigorous and four flowers to each stem.
- GEO. HERBERT—Per packet, 10c; oz., 40c. A large Spencer rose crimson, suffused with magenta and showing veins in wings.
- **HELEN LEWIS—Per packet, 10c; oz., 40c.** A very large and fine orange salmon pink, with especially bright orange standard.
- **HERCULES—Per packet, 10c.** A giant clear pink both standard and wings, vigorous vines and fine long stems. Flowers extra large and fine.
- ILLUMINATOR—Per packet, 10c; oz., 50c. A glorious orange salmon Sweet Pea of rare beauty and great vigor.
- JOHN INGMAN—Per packet, 10c; oz., 40c. A fine rich rose crimson, with veins of deeper shade. Very bright. Similar to Geo. Herbert.
- MARY GARDEN—Per packet, 10c; oz., 40c. A very light cream pink. One of the new Spencers.
- MARIE CORELLI—Per packet, 10c; oz., 40c. A bright growing crimson almost self-color. Fine large flower. Beautifully waved.
- KING EDWARD—Per packet, 10c; oz., 45c. The best pure red Spencer, very large with especially immense wings. Every one should grow this variety. Our strain is quite sun-proof.
- KING WHITE—Per packet, 10c; oz., \$1.25. Finest pure white in existence.
- LOYALTY—Per packet, 10c; oz., 50c. Large and vigorous, dark blue stripe. Ground color white flaked and striped blue.
- MARTHA WASHINGTON—Per packet, 10c; oz., 40c. A fine large flower, white ground, margined with bright pink, suffusing to center of standard and wings.

MAUD HOLMES—Per packet, 10c; oz., 40c. Rich crimson Spencer, fine large flower and quite sun-proof. Practically synonymous with King Edward Spencer.

MRS. HUGH DICKSON—Per packet, 10c; oz., 40c. The best cream pink Sweet Pea. The color is light salmon pink on cream ground. This variety has exceptional vigor and produces large flowers, four on each stem.

MRS. ROUTZAHN—Per packet, 10c; oz., 40c. A beautiful blending of straw color, tinted with blush pink and shading to apricot and rose at edges.

MRS. SANKEY—Per packet, 10c; oz., 40c. A large black-seeded white, good form, vigorous, flowers slightly tinted with pink when young.

MRS. TOWNSEND—Per packet, 10c; oz., 40c. White ground, edged pale blue, large size and splendid form. Fine for exhibition and garden work.

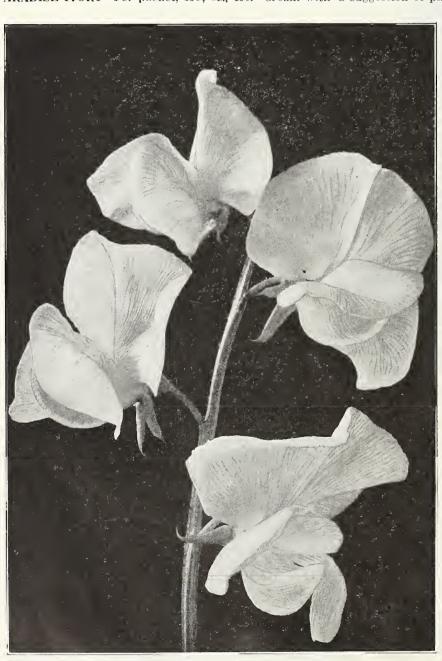

MARGARET ATLEE—Per packet, 10c; oz., 50c. A warm salmon pink perfectly suffused over a cream ground, flower of extraordinary size.

MRS. CUTHBERTSON-Per packet, 10c. Standard clear rose pink, wings white with faint flushing of pale rose pink.

NUBIAN—Per packet, 10c; oz., 50c. Beautiful rich deep chocolate, the best maroon. Vines vigorous producing long stout stems, carrying invariably four bold flowers.

OTHELLO-Per packet, 10c; oz., 40c. Of immense size, with large, drooping wings, rich maroon, very dark and adapted for many attractive combinations. One of the best dark Sweet Peas.

PARADISE IVORY-Per packet, 10c; oz., 40c. Cream with a suggestion of pink in the newly opened blossoms.

Spencer Sweet Pea-Paradise Ivory.

PEARL GREY—Per packet, 10c. Very fine lavender on primrose ground, the general effect is a pretty bluish gray.

PRIMROSE, Morse's Extra Selected Strain—Per packet, 10c; oz., 40c. The finest of its class, clear, primrose self of best Spencer form, beautifully waved flowers large and mostly four blossoms on each stem.

QUEEN OF NORWAY—Per packet, 10c; oz., 40c. A beautiful Rosy Purple shade.

ROSABELLE—Per packet, 10c; oz., 40c. A splendd dark rose of vigorous growth.

ROYAL PURPLE—Per packet, 10c; oz., 60c. A rich royal purple which holds its color throughout the season.

STIRLING STENT—Per packet, 10c. Glorious deep salmon suffused with orange; a beautiful Sweet Pea, especially in artificial light, but must be shaded to get true color.

SUNPROOF CRIMSON—Per packet, 10c; oz., 40c. A grand crimson Spencer. Flowers very large and nicely waved. Generally carries four blossoms on each stem.

TENNANT—Per packet, 10c; oz., 30c. A large flowered rosy-purple. Shows a tendency towards magenta.

THOS. STEVENSON—Per packet, 10c; oz., 40c. Brilliant orange scarlet. Flowers splendid form and vines very vigorous.

WEDGEWOOD—Per packet, 10c. A clear, bright, silvery blue with a faint suggestion of mauve in the standard. The color improves greatly in water, and as flower ages the color brightens. Morse's strain has been pronounced the best blue Spencer, and we are glad to offer it.

WHITE SPENCER, Morse's Re-selected—Per packet, 10c; oz., 55c. The best Spencer white. Flowers very large and magnificent Spencer waved form. Stems as a rule carry four blossoms.

SENATOR SPENCER—Per packet, 10c; oz., 50c. A beautiful shade, claret and chocolate stripe on light heliotrope ground.

Alphabetical List of Grandiflora Sweet Peas for 1918

ARTICHOKES

Ger.-Artischoke.

Scand.—Artiskok.

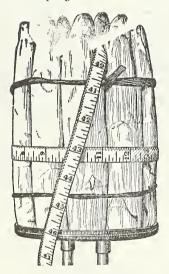

Most valuable food for hogs that can be grown. Every hog raiser, should plant them. They are not only very healthful, but as a fattening agent are unexcelled. They yield very heavily, 300 to 350 bushels to the acre being realized on good soil. It is not necessary to dig them for if given an opportunity, the hogs will help themselves. selves.

Artichokes need planting but once and little or no culture after the first year. Cut as potatoes, only smaller; plant in rows three and one-half feet apart. Plow deep, plant shallow, say two inches. The second year, break up the ground as for corn; they will come up thickly all over the surface. Those wishing to purchase should place orders early.

ASPARAGUS

Ger.—Spargel.

Seand.—Asparges.

Sow early in the spring in drills 2 inches deep and 12 inches apart if to be cultivated by hand. One ounce of seed will make about 500 plants. When the plants are one or two years old transplant to rows 5 feet apart and 48 inches apart in the row. Cover the soil 4 to 5 inches deep with well rotted manure and disc well—then plow as deep as possible and fine with harrow. Turn furfine with harrow. Turn fur-rows 5 feet apart, about 6 inches deep. Place plants in these about 18 inches apart, with the roots well spread out. Turn a light furrow back over them and level with the harrow by cross harrowing.

ASPARAGUS-(Conover's Colossal) Pkt., 5c; oz., 10c; lb., 90c The favorite in our western market having a pink tinge, and very fine flavor, of vigorous growth, none better.

ASPARAGUS—(Palmetto)...... head or tip.

ASPARAGUS—(Bonvallet's Giant)......Oz., 15c; 1/4 lb., 40c; carding other well known sorts in favor of this variety. Inoculate this Seed with FARMOGERM.

86

BEANS

Ger.-Bohnen.

Scand.—Boennea.

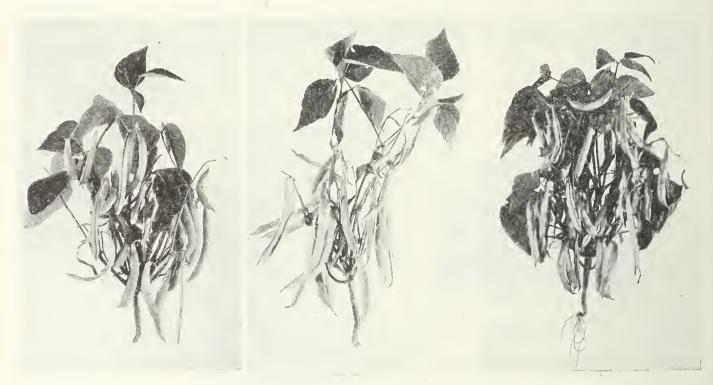

(2 lbs. to 100 feet in drills, or 150 hills; 120 lbs. to the acre, in drills.)

A succession of sowing can be made from the first week in May until June. Plant in drills about 2 inches deep, and from 18 inches to 2 feet apart, according to the richness of the soil; the poorer the soil, the closer they can be planted. The seed should be dropped about 2 inches apart.

The supply of seed beans this season is the lowest known to the seed trade. Many varieties are almost impossible to obtain at any price. Many seed growers report a partial and in some instances a total failure of Garden Beans. This, coupled with the enormous demand for food for army purposes, has caused a most unprecedented condition. Early orders are advised—to avoid disappointment.

SEE RED INSERT PAGE 96 FOR PRICES ON BEANS.

Golden Wax.

Black Wax.

Bountiful.

BEANS-DWARF OR BUSH

Yellow Podded Varieties.

Improved Golden Wax—Probably the best known of all Wax Bean; it is the ideal Wax Bean; very prolific. Thick fleshed and stringless.

Improved Black Wax—An old favorite, which is universally popular. Round full, fleshy pods; excellent flavor. Stringless and very tender.

Davis' White Wax—Is a very productive sort. Pods long, straight and thick. Beans white, kidney shaped.

Curries' Rust Proof Wax—A very early, beautiful Wax Bean, bearing an abundance of crisp, tender, stringless pods, flat, long, meaty. It is absolutely rust-proof, at least we have never seen any beans of this variety that were affected with rust. The vine is hardy and vigorous. The beans, when ripe are bluish-black and kidney shaped. An excellent shipper.

Wardwell's Kidney Wax—A prolific bean, with light colored pods, slightly curved. A kidney shaped bean, speckled in color. A first-class garden bean.

Rust-Proof-Wax.

BEANS—Dwarf or Bush, Green Podded Varieties.

Long Yellow Six Weeks—Early, full, flat, green pod, an old favorite, productive and of excellent quality.

Bountiful—This bean is of most handsome growth, very sturdy and practically rust proof. Very early, hardy and very prolific. Pods are very large, of rich meaty flavor, very tender and stringless.

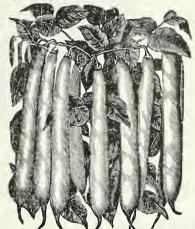

Stringless Green Pod—An early variety, with long pale green round pods. Keeps tender for a long time after reaching maturity.

Early Mohawk—This variety stands cold better than any other bush variety; excellent quality.

Early Red Valentine-Long, full cylindrical green pods, ereased back, very fleshy, crisp and tender.

Black Valentine—A prolific yielder, similar to the Red Valentine slightly larger, and a very tender bean. Black seeded.

Late Refugee or 1000 to 1—A very productive bean, exceedingly tender and of most exeellent flavor. Pods are long, cylindrical light green and of good quality; mid-season and late use excellent and pickling.

Beans (Late Refugee.)

Feltham Prolific

This is a new dwarf French bush Bean. It is perhaps the heaviest cropper yet introduced, with rich green fleshy pods, crisp, tender and string-Remarkably quick in growth. A test of 4 ounces of seed last season in Montana yielded 10 lbs, of dried beans,

Pkt		10e
14	lb.	30e
Lb.		\$1.00

Feltham Prolific.

BEANS-Pole or Running.

Kentucky Wonder or Old Homestead-An enormously productive variety; entirely stringless, large tender pods; best pole bean for market gardeners.

Searlet Runner-An English bean of great merit; very tender and sweet; also grown as ornamental flowering vine for trellises.

Lazy Wife-Immensely popular, pods medium dark green color, from 1½ to 6 inches long; very fleshy and stringless when ripe; are excellent shell beans.

BEANS-Dwarf or Bush Lima.

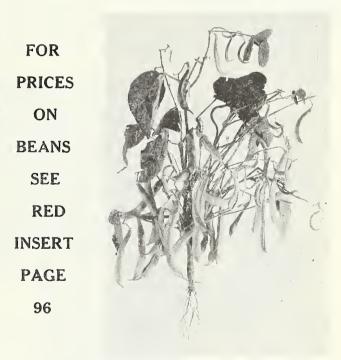

Dreer's Bush Lima-Fine flavor, full sweet and succulent, becoming very popular; is also an excellent dry bean; very prolifie; a little later than Burpee's.

Burpec's Bush Lima—Large white; is the earliest Lima Bean in cultivation; a great favorite for the family garden.

Broad Windsor—This bean is very hardy, and should be planted as soon as the soil is in good state in the spring. Plant four inches apart and 2 inches deep in drills three feet apart, to insure well filled pods, pinch off the tops as soon as pods begin to set.

FIELD BEANS.

California Wonder or Improved Tree Bean—A wonderful productive, white field bean. This is the heaviest yielding Bean known, belonging to the class of field Beans resembling the well known "Navy." On account of its snowy whiteness, small size, the California Wonder commands high prices. Our seed is carefully selected pure stock seldom found in Navy Beans. Thirty pounds of California Wonder Beans will plant an acre.

Great Northern Navy Bean.

Great Northern Navy Bean-This variety seems to be especially adapted to Montana soil and climate, and is being grown in increasing quantity each season. In our opinion it leads all other varieties of Navy Beans—when the real test comes—at the table. Its flavor and tenderness as a baked bean are "par excellence."

Sow 16 to 24 lbs. to the Acre.

Improved White Navy—The result of years of careful growing and selecting. Far superior in both quality and productiveness to the common sorts. The vine is of medium size, erect, bearing a profusion of long pods well up from the ground. The dry beans are small, pure white and of fine appearance.

Boston Yellow Eye-While much larger quantities of White Beans of the Navy type are used than of all other varieties combined, those who know about the Boston Yellow Eye prefer them to any other Bean for eooking as they possess a richness and flavor known to no other variety.

BROCCOLI

Ger. Sparcelkohl.

Scand. Broccoli-kaal.

(One ounce will produce about 3,000 plants.) Sow the first week in May in drills 3 or 4 inches apart, covering seeds lightly. When the leaves are about three inches broad, transplant to prepared beds 2 feet apart each way. Much resembles Cauliflower; cultivation the same. BROCCOLI—(Snow White)—Pkt., 5c; oz., 60c; ¼ lb. \$2.00 Pure white color; heads medium size, close and compact.

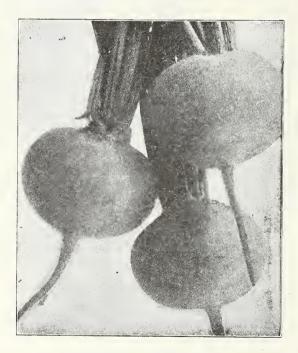

TABLE BEETS

Ger. Rube.

Scand. Rodebede.

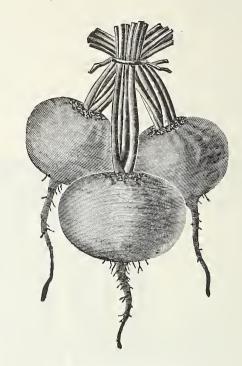

HOW TO PLANT—The soil should be rich and deeply plowed, say 8 to 10 inches. Sow in rows from 14 to 20 inches apart and about 1 to 1½ inches deep. About 6 pounds of seed to the acre for garden or stock feed and for sugar about 20 pounds of seed to the acre. As soon as the plants have the fifth and sixth leaf, thin to one plant each 8 inches. If under irrigation, water as soon as thinned. Cultivate often and do not water again until absolutely necessary, as the soil will dry from the surface down and the tap roots will follow. Careful tests have proven that one cultivation a week will give the best results. Keep clean and remember that cultivation is the next thing necessary after the best seeds and the two are necessary for success.

(One ounce to 100 feet of drill, 5 to 6 lbs. per acre.)

Beet (Crimson Globe.)

Crimson Globe—Beets may come and Beets may go, but still the Crimson Globe retains its position as the best Beet for the market gardener, as well as for the private garden. It is very symmetrical, with small tap root, and but few fibrous roots; color outside is deep blood-red; inside layers of blood red, light-grained and unsurpassed in quality. One sowing only is necessary to produce early beets for market and main crop for winter use. Edmunds Early Blood Turnip—Roots of good form, turnip shaped and flesh deep red, as name indicates. This is a standard variety, and one of the best.

Beet-Detroit Dark Red.

Detroit Dark Red Turnip—One of the best early Beets either for table or market; small top. early maturing, splendid shape and color, very crisp, tender and sweet.

Dark Red Egyptian—Has more good qualities than any other beel, extra early, sweet, small-leaved; color dark crimson

BEET—(Market Gardener's)—See Crimson Globe.

Eclipse—Best variety for main crop; good keeper, clear blood red, sweet and tender.

Extra Early Dark Red Montana Strain—The market gardener's beet. For richness of color and exquisite flavor this new strain cannot be equalled. Early, rich and sweet.

Early Blood Turnip—An old standby; good for early or late planting. Of fine form, good flavor, red color. Very desirable for home or market purposes.

Long Smooth Blood—A very fine late variety, deep red color, a splendid keeper.

Half Long Blood—An excellent main crop beet. A great favorite as a table or field sort. Roots are deep red in color and always symmetrical and smooth. In quality it is sweet, crisp and tender, and is an enormous cropper, and a reliable winter keeper. It is a heavy beet without being hard to pull. It never becomes woody and is always good for table use or stock food, whether pulled young or old.

SUGAR BEETS

Klein Wanzlebener—Best of all sugar beets; has rather long slender root, very rich in sugar; will yield under average conditions 16 tons to the acre. All stock men know that sugar makes fat, and will realize its value as a stock food.

Vilmorin's Improved—This French variety is popular with sugar beet growers; contains a larger percentage of sugar and requires less water than others.

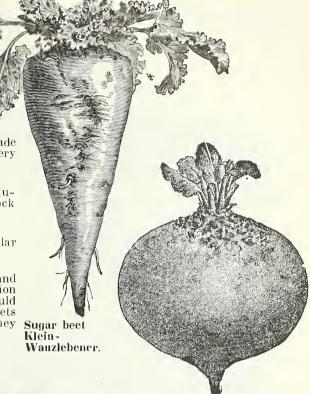

Jaenich's Victrix— This sort is credited with being the highest grade sugar beet grown. Of medium size, very even, white flesh and very rich in sugar.

Giant Feeding Sugar Beet or Half Sugar White Mangel—The most valuable of all stock feeding, very heavy yielder, the favorite with stock feeders, very easily pulled growing half out of the ground.

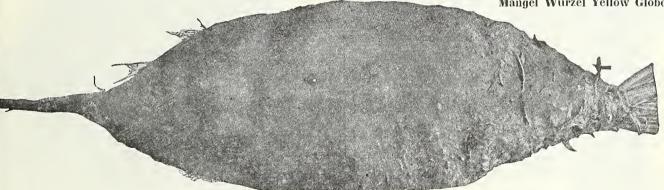

Stock Feeding—A Half Sugar Beet of large size, and is a very popular variety with cattlemen.

For Stock Feeding—The ground should be thoroughly prepared and made firm and mellow, same as for Mangels. Seeding and cultivation should be continued in much the same manner except that they should be thinned out 6 to 8 inches in the row. The Giant Feeding Sugar Beets or Half Sugar Mangels are especially valuable for feeding stock as they give a feed of much greater nutritive value than mangels.

Mangel Wurzel Yellow Globc.

Mangel Wurzel-Giant Red Eckendorf.

MANGEL WURZELS

Mammoth Long Red-Immense yielder; very large, skin dark red; splendid for winter feeding.

Golden Tankard—The dairyman's mangel; fine grained yellow flesh, rich in milk producing qualities.

Danish Sludstrup—The Danish government encourages the growing of root crops by offering certificates of merit to growers who select and produce sorts which are of distinctive value. Sludstrup is considered the best of all Mangels, having been awarded first class certificate. In color it is reddish-yellow and of a distinct type. It contains the largest per cent of nutriment found in any sort. It is very hardy, grows well above ground and is easily pulled.

Giant Half Sugar Rose—A magnificent sort, growing at least half out of the ground rendering the crop easy to gather. Skin of the upper part is rose colored, and the lower part white. Flesh white tinged with rose.

Giant Rcd Eckendorf—A very popular variety grown on a very large scale. A very popular variety grown in European countries where root crops are grown on a very large scale. It has also proved very satisfactory in the United States whenever it has been tried. The roots are smooth, long and cylindrical in shape, very much like the tankard mangels. They are very heavy, weighing from 15 to 20 pounds each. The flesh is firm, crisp and solid, white in color and of high feeding value. This variety is easily harvested, a large proportion growing above ground.

Giant Yellow Eckendorf—The same as the Giant Red variety except the skin is yellow. Very desirable in all respects.

Yellow Globe—An especially good variety to grow if one has a limited supply of water; a great favorite for dairymen, making a wonderful increase in milk; easy to pull and harvest; tops are small.

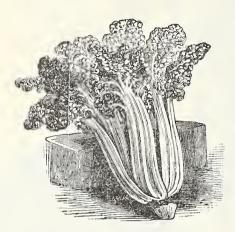

Red Leviatuan—Makes a large, magnificent root, growing half above the ground and easily lifted; an enormous cropper and good keeper. It is of even shape, with smooth skin. Flesh firm and sweet.

For Prices on all Vegetable Seeds not quoted-see Red Insert—page 96

SWISS CHARD

Ger.-Briskohl.

Scand.—Bladbed.

CHARD-SWISS (Or Sea Kale Beet)
Although little Although known in America, this vegetable is worthy of a place in every garden. The leaf and the leaf stem are the parts used and they much superior to those of other beets to use as greens. Later in the season the broad, flat beautiful wax - like leaf stems are cooked as a salad or pickled.

BRUSSELS SPROUTS

Ger.-Rosenkobl.

Seand.—Rosenkaal.

BRUSSELS SPROUTS—Species of cabbage; cultivation the same. One ounce will grow a bed of 40 square feet and produce about 3,000 plants. This is a delicious vegetable, superior to either Broccoli or Spinach. The cabbage-like heads grow upon the stem are much improved by a moderate frost. Sow in hotbeds in March or April, and in the open ground in May; cultivate same as Broccoli.

about 20 inches high; produces sprouts in abundance, cut out head of plant when sprouts have formed.

CABBAGE

One ounce will produce 3000 plants; one-quarter pound

will produce plants for one acre.

The soil should be deep and rich. For early crop grow plants in hot beds, transplanting to cold frames and then as early as possible after danger of freezing to the open ground. Cultivate often and keep well watered if under irrigation. For late crops sow seed in open ground and transplant, or some succeed finely by sowing seeds in hills where wanted and thinning to one. This avoids the necessity of waiting for a damp time to transplant.

EXTRA EARLY VARIETIES.

For Prices See Red Insert-Page 88,

Early Jersey Wakefield—This has been for many years the leading early Cabbage in America. The main difficulty has been to get a perfectly satisfactory and reliable strain of seed. Buyers will find Early Jersey Wakefield the genuine article. It has few outer leaves, and in compactness and regularity cannot be surpassed. The thick stout leaves and compact habit make it the best sort for very early setting. It frequently matures inside of 100 days from sowing.

Cabbage (Early Winningstadt.) Early Winningstadt—This is another old and famous type of early Cabbage but as in the case of Wakefield, the main difficulty is to get a strain of seed representing the highest grade of excellence. Such a strain will be found in our Winningstadt. It is almost as early as Wakefield. It is a sure header, even where other sorts may fail and seems to be less liable to the attacks of Cabbage worm that many other varieties.

Cabbage (Copenhagen Market.)

Copenhagen Market—A new early variety, which will be very popular with market gardeners. It is the finest large, round-headed early Cabbage in cultivation. It is further desirable on account of the remarkable characteristic of maturing the heads all at the same time, enabling the grower to gather his crop with less expense and permitting the cleaning of the land at the first cutting. The heads average about ten pounds each in weight, are hard and solid with small core. The quality is extra fine and sweet. It matures as early as the Wakefield and will yield more to the acre in weight. It is a short-stemmed variety, the heads nearly resting on the ground. The leaves are light green, rather small, saucer shaped and tightly folded, making it possible to set them close together in the field.

Extra Early Express—This variety has produced fair-sized marketable heads in 80 days from the sowing of the seed. There are few loose leaves and almost every plant forms a head. It can be planted close and yields a large crop.

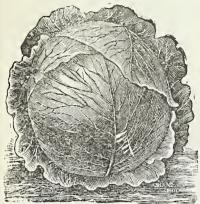

SECOND EARLY VARIETIES.

Glory of Enkhuizen—The earliest and largest white Cabbage—attractive for market purposes. Solid with large ball shaped heads thin-ribbed and hard, few outside leaves; exceedingly tender. Is a dwarf and compact grower: allowing close planting: will yield more tons per acre than any other variety.

CARRAGE—SECOND EARLY—(Continued.)

Improved Brunswick-An ideal second early variety of drumhead type. Desirable for the home garden of dwarf compact. Is good for Summer, Autumn and Winter crop. Desirable for all sorts of planting.

All Hcad—A large heading variety, heads very flat and compact. Can be planted as close as the Jersey Wakefield, having few outside leaves.

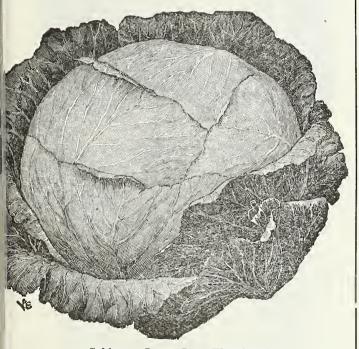

Early Summer—It is the earliest of large Cabbages, being at least a week in advance of any other strains of Early strains of Summer. The Summer. The deep flat heads are remarkably uniform in shape, size and color. Good quality or. Good quality and tenderness are marked features.

Cabbage—Early Summer.

LATE OR WINTER VARIETIES.

FOR PRICES SEE RED INSERT-PAGE 96.

Cabbage—Large Late Flat Dutch.

Large Late Flat Dutch—A low growing variety, heads large, bluish green, round solid broad and flat on top; an excellent fall and winter variety, and a good keeper. It is a sure header.

Hollander or Danish Ball Head—Very hardy, handsome, very solid, of fine quality. Plant vigorous compact growing, with longer stem than most American sorts and exceedingly hardy in resisting cold and dry weather; leaves large, thick, bluish green covered with whitish bloom. Heads medium sized, round, very solid, and stands shipment better than any other late sort.

Surehead—For main crop is unexcelled; large flattish round heads, fine and solid; always "heads."

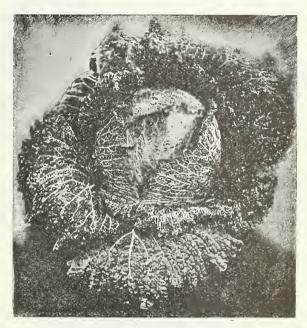

Houser—A distinct variety of winter Cabbage. For a solid shapely, heavy, sweet Cabbage it cannot be beaten, and by reason of its compact growth and freedom from loose leaves fully 500 to 600 more plants can be grown to the

RED CABBAGE

Red Dutch-Used principally for pickling, good color and solid heads.

Red Stonehead-More or less trouble is often experienced by market gardeners in finding a really reliable Red Cabbage that will head with uniform size and quality. In Red Stonehead they will find a variety that will fill their strictest requirements, literally solid as a stone, and of good color throughout. Invaluable for pickling purposes.

SAVOY CABBAGE

Cabbage-Savoy.

Drumhead Savoy-Should be more generally sown; delicious after slightly frosted.

Chinese Pe Tsai or Celery Cabbage—This Chinese introduction is really of great merit, growing somewhat like the Cos Lettuce. Boiled and seasoned with butter, it makes a most delectable dish, and is also a splendid base for salads. Sow rather later than ordinary Cabbages—as too early sowings have a tendency to run to seed too quickly.

FOR PRICES ON ALL VEGETABLE SEEDS NOT QUOTED—SEE RED **INSERT—PAGE 96**

We handle Planet Jr. Seeders and Cultivators and Barker Mulcher Weeder.

FOR PRICES ON ALL VEGETABLES NOT QUOTED SEE RED INSERT PAGE 96

CARROT

Ger .- Moehre.

Scand.—Gulrod.

(One ounce to 400 feet in drill; 3 to 4 pounds to an acre.) Good sandy loam is best adapted for Carrots of all varieties. The shorter varieties, however, can be sown in heavier lands with good results.

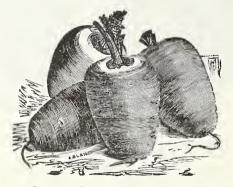

Amsterdam Forcing—A very early and rapid grower. Half long in shape, and of good color. A favorite for market gardeners' early crop.

French Foreing—This Carrot is one of such quick growth that a good name for it is the Radish Carrot, for it certainly matures as quickly as a radish. It has a very fine neck and a rather hollow crown. We highly recommend it to all our customers who desire a small, early, delicious Carrot that will mature early, but must be sown in very rich soil.

Carrot-French Forcing.

Early Shorthorn—Earliest and best standard table variety; short top, sweet and tender.

Carrot-Oxheart or Guerande.

Oxheart or Guerande—Medium early, bright orange color, fine grained and sweet; one of the best table varieties. Can be pulled by hand; well suited to heavy soils, but will thrive equally well in other situations.

Early Chantenay—A French variety, well adapted to family or market gardener's use, as it is tender, fine grained and sweet.

Danvers Half Long—A standard variety, and one of the heaviest croppers. Color dark orange, very thick shoulder, of a most excellent quality. Length 8 to 10 inches.

Half Long Scarlet Stump Rooted—A variety about as large as Danvers, but not so thick. It is of uniform thickness from shoulder to root and very stump-rooted.

Improved Long Orange—Excellent variety for garden or field culture. Good quality for dairy cows; attains large size.

CARROTS FOR STOCK.

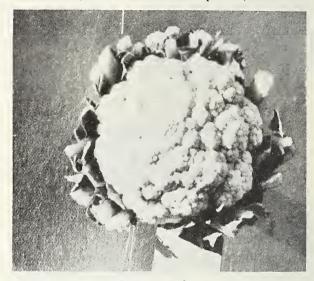

Mastodon—A vast improvement on the White and Yellow Belgian sort. The roots are short and very heavy at the shoulder, and frequently measure 15 to 20 inches, yielding from 20 to 25 tons to the acre.

White Belgian—Grown extensively for stock feeding. Very heavy cropper.

Victoria—Our records prove this to be the most popular Red Stock Carrot in the list, no doubt on account of its sweetness and heavy yield.

CAULIFLOWER

(One ounce for 3,000 plants.)

Early Snowball.

Culture—Cauliflower is a gross feeder, and well repays heavy manuring and high culture. It succeeds best on well drained soil. For spring crop, plant the seed in protected beds early in February and the plants will be ready to transplant probably early in April. The young plants should be thinned, since they become very spindly if allowed to grow too thick in seed bed.

Early Snowball—Is the best all-round Cauliflower on the market—early or late—for the family or the market garden. It heads where others fail. Its close and compact growth habit permits one-third more to be planted on the same quantity of ground than can be done with other varieties.

Early Erfurt—An extra early variety; scarcely a plant fails to produce a head.

Danish Giant or Dry Weather—Is more resistant to unfavorable seasons than other sorts, particularly in dry weather.

Early Paris—A compact, short-stemmed variety of exceptional merit, especially adapted to the family garden.

Danish Perfection—This sort is a very early and dwarf variety, and most desirable for both the market gardener and the home garden.

Autumn Giant—A splendid late variety, as its name indicates. Very large, very white and a sure header under almost all conditions.

For Prices on Vegetables not quoted—see red insert page 96

Celeriac-Giant Smooth Prague.

CELERIAC

Ger.-Knoller Sellerie. Scand.—Knopselleri. Giant Smooth Prague—Turnip rooted celery. Excellent for soups; will keep all winter; roots large, smooth, good

CELERY

Ger.—Sellerie.

Scand.—Selleri.

(One ounce will produce 7,000 plants.) Sow seeds in a hot bed or cold frame. As soon as the plants are about 3 inches high, transplant to a nicely preplants are about 3 inches fi.gn, transplant to a incery prepared bed in the border, setting them 4 or 5 inches apart. When some 8 inches high, and fine stocky plants, set them in trenches. Earth up a little during the summer keeping the leaf stalks close together so that the soil cannot get between them. Finish earthing up in autumn, and never hoe or earth up in moist weather.

Keep the seed bed moist to insure quick germination

and vigorous growth.

Paris Golden Self Blanching—A remarkable early sort, entirely self-blanching, with beautiful, large golden-yellow heart, crisp, solid and nutty in flavor.

Golden Hearted Giant—Our strain of this variety is unex-celled and absolutely reliable; this sort is without doubt the finest early Celery in cultivation. It is perfectly solid, of a fine nutty flavor; attains a good size and when blanched is of a handsome golden yellow.

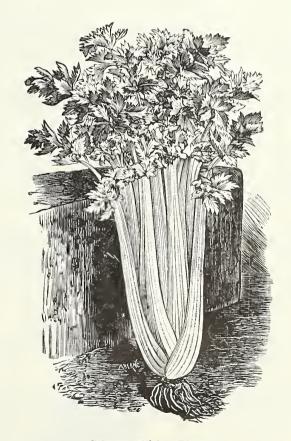

Celery—Montana Perfection.

Montana Perfection—Finest and largest winter variety. The best keeper known; solid, crisp, tender and of an exceedingly fine flavor; more largely grown here than all other varieties put together.

Red Hearted English—A novelty in this section, of great excellence. Of medium dwarf habit, very tender and of delicious flavor blanching very easily, with a beautiful pink or light red heart.

Golden Hearted Dwarf-A most desirable and very hardy variety, very solid and crisp, blanching exceedingly white, with a clear golden heart. An excellent shipper.

Celery-White Plume.

White Plume—Handsome, crisp, self-blanching, easily cultivated; the most popular with Montana growers; keeps well up to January.

CHERVIL

CHIVES---Snittlauch

CORN SALAD

Ger.-Feldsalat.

Scand.—Vaarsalat.

Corn Salad.

CORN SALAD—(Or Fetticus) Pkt., 5e; oz., 15c; ¼ lb., 60c: lb. \$2.00 A salad plant used as a substitute for Lettuce in salads or may be cooked like spinach for greens. It does well in the fall and spring. On rich soil the leaves renew rapidly after being cut.

CORN—Sweet or Sugar

(One pound for 100 hills, 45 lbs. for 1 acre.)
Corn thrives best in warm, rich soil. The smaller varieties may be planted in drills two and a half feet apart and ten inches apart in the rows. The larger kinds may be planted in hills three and a half feet apart each way, allowing three or four stalks to remain in a hill.

EARLY VARIETIES.

Peep O'Day—Ten days earlier than any other Sweet Corn. Peep O'Day Corn, in addition to its sensational earliness, is entirely distinct in appearance and habit of growth. The stalk grows from 3 to 4 feet in height. The ears average about 5 inches in length and are of perfect form, well filled out to the tip. When cooked, the corn is exceedingly sweet and tender.

Early Minnesota—A very fine second early strain with large ears, filled with 12 or more rows of handsome white grains of fine quality.

Mammoth White Cory—Earliest of all Cory Corn; one of the most successful varieties of Corn for Montana, and largely grown for the market; large ears, tender and delicious.

Extra Early Adams—This is not a true sweet Corn, but is greatly grown for that use, on account of its fine, white and sweet grains. Is greatly grown for roasting purposes, is very hardy, and can be planted earlier than most of the early varieties.

Sweet Corn-Golden Bantam.

Golden Bantam—A new variety of sweet Corn which many people consider the richest and sweetest of all Corns. Some of our customers are now planting this Corn at regular intervals during the season, so that they may have it for table use continually and prefer it to all other sorts. Ears medium size, thickly set with delicious yellow kernels. Golden Bantam has a flavor distinct from any other sort. A very early variety.

SECOND EARLY VARIETIES.

Early Evergreen—Not quite as early as some, but one of the best and sweetest varieties grown.

Black Mexican—This variety has for a number of years had the reputation of being the sweetest of all sweet Corn. When cooked, the ear is white with a bluish tinge towards the base of the kernel. Every year we have a number of inquiries from those who have known this Corn, but who have forgotten its name and remember it only as the "black Corn that was so very sweet."

CRESS

Ger.—Karten-Kresse.

Seand.—Karse.

CRESS, OR PEPPER GRASS—This salad is much used with Lettuce to the flavor of which its warm pungent taste makes an agreeable addition.

CRESS—(Water)—Hardy perennial aquatic plant; sow seed along water's edge, preferably near running springs.

CUCUMBER

Ger.-Gurken. Seand .- Haurk. (One ounce will plant fifty hills; two lbs., to an acre.)

Cumberland—The best pickling sort yet introduced being very handsome and productive, with flesh firm, but very crisp and tender. Vines sturdy and prolific.

Davis Perfect—The best northern market Cucumber of the extra long white spine type. It is a new variety, and since its introduction has jumped into such prominence that it may rightfully be regarded as the most popular variety of its type today. The Davis Perfect has been most carefully selected by a veteran outdoor and greenhouse grower of Cucumbers for length, slimness and its dark green color.

Fordhook Famous—A long White Spine variety growing from 10 to 12 inches. Earlier and fully as long as Long Green and of equally good quality.

Cool and Crisp.—A fine garden variety, deep green and crisp, and is of the White Spine type, pure white when

Early White Spine—Earliest of the White Spine varieties. Excellent for table use.

Early Frame or Short Green—A very productive variety having fruits of good length and handsome form. Desirable for producing pickles of medium size. Fine quality when sliced for table.

Early Russian—Bright green, crisp and tender flesh; excellent for table use or pickling.

Cucumber—Early White Spine.

Cucumber-Long Green.

CUCUMBER—(Continued.)

Improved Long Green—Not quite so early as the above named sorts but admitted to be the best general crop Cucumber for this climate; good color, very prolific, crisp and tender.

White Wonder—When only half grown is exceedingly fine in quality. Its beautiful white skin is very smooth; entirely free from Spines. They are solid, tender and crisp, with very small seed cavity; splendid for slicing. Its enormous size, beauty and oddity make it one of the best Cucumbers for exhibition at fairs, never failing to capture first prize.

Everbearing—Small size, very early and enormously productive and valuable as a green pickler. It continues to flower and produce fruit until killed by frost whether the Cucumbers are picked off or not. Remarkably solid with very few seeds and of fine quality. Invariably of perfect form even when small.

Cucumber—Boston Pickling.

Boston Pickling—Very productive, grown largely for pickles. Fruit medium sized, very smooth bright green.

Japanese Climbing—A strong and vigorous grower, and while all Cucumbers are running or creeping vines, this variety attains nearly twice the length of ordinary sorts and can be grown on trellises, fences or poles. fruits from ten to twelve inches in length, are of excellent quality either for slicing or pickling.

Rollinson's Telegraph-For forcing. Long green Cucumhers of excellent flavor, very tender and solid. We have grown this variety under glass to a length of 25 inches.

Vaughns Forcing—For forcing. This is a great favorite with the Chicago and Eastern growers for forcing under glass for the early and winter markets. Of medium size, very prolific, of good color and most excellent quality.

Egg Plant-Improved New York.

EGG PLANT

One oz. will produce 1000

to 1500 plants. Improved New York—This selection is vastly superior to the old type. The habit of the plant is low and branching, and is quite free from spines.

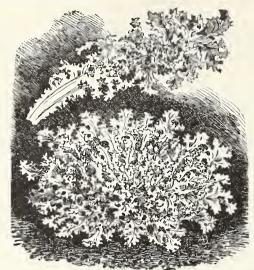

ENDIVE

Ger.—Endivren.

Scand.—Endive.

White Curled—Leaves pale green; should be used when young.

ENDIVE—(Continued.)

Endive-Green Curled.

Green Curled—For fall and winter use; also largely used for garnishing; crisp and curly; easily blanched.

Broad Leaved Batavian—A very wide leaved variety, leaves

Broad Leaved Batavian—A very wide leaved variety, leaves with straight edges, thick and fleshy of a dull green color. Quality excellent.

GARLIC

Ger.—Knoblauch.

GARLIC—The Garlic is the most pungent of all the onion family. The root or

Garlic.

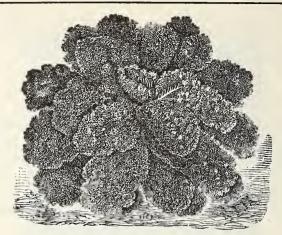

pungent of all the onion family. The root or bulb is composed of many small bulbs called "cloves," which are planted in the spring six to eight inches apart, and in August the tops will die when the bulbs are ready to gather; they do best in light, rich soil. One lb. to 10 feet of drill.

HERBS

HERBS—(Sweet, Pot and Medicinal)—The seeds should be sown in spring, in shallow drills, 12 inches apart, and the young plants thinned out or transplanted to about 4 inches. They should be harvested on a dry day, just before the blossoms develop, dried quickly and bottled, or closely packed in dry boxes, with the air entirely excluded. Those prefixed with an * are Perennials.

Anise—Used for flavoring. Pkt., 5c; oz. 30c *Balm— Pkt., 5c; 0z., 35c Basil— Pkt., 5c; 0z., 25c Borage— . Pkt., 5c; oz., 30c Caraway-The seeds of this herb are used for flavoring. Pkt., 5c; oz., 30c Coriander—Seeds used for flavoring. Pkt., 5c; oz., 35c *Catnip— Pkt., 5e; oz., 60e Pkt., 5c; oz. 25c *Lavender— Pkt., 5e; oz., 25c Pkt., 5c; oz., 50c *Rosemary—Very aromatic leaves.Pkt., 5c; oz., 35cPkt., 5c; oz. 25c Saffron-*Sage—A highly aromatic herb; most useful of all. ——————Pkt., 5c; oz., 25c *Sweet Marjoram—Used as a seasoning. Pkt., 5c; oz., 25c Sorrel—(Large Leaved French.) The variety having the largest leaves and therefore Wormwood—Used and grown for poultry.

Pkt., 5e; oz., 35e

Kale-Dwarf Curled Scotch.

KALE or BORECOLE

Ger.—Blattenkohl. Scand.—Groenkaal. (One ounce will produce about 5,000 plants.)

Tall Green Curled Scotch Pkt., 5c; oz., 40c Always a favorite.

Kohl Rabi White Vienna.

KOHL RABI

Ger.—Kohl Rabi. Scand.—Kaalrabi.

Early Purple Vienna—Pkt., 5c; oz. 40c; 4 lb. \$1.50

An early variety with a bright purple bulb. The leaf and stems being green and tinged with purple.

LETTUCE

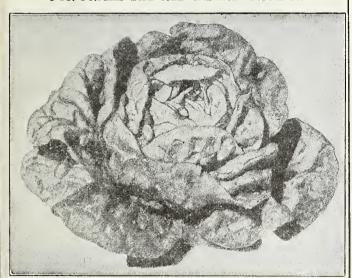

Ger.—Gartensalat.

Scand.—Salat.

4 Oz. to 100 Feet of Drill 3 Lbs. to the Acre.

Lettuce is represented by four distinct classes or types—by the thick-leaved, smooth-edged cabbage-heading type; the curly and thin-leaved, tight-heading, crisp type; the curly and thin-leaved bunching or non-heading type, and the Cos or celery type. There are early, medium early and late varieties of each type, as well as those especially adapted for greenhouse, hot-bed, winter, spring, summer and autumn uses. There is so great a difference in localities in regard to the value of Lettuce, that a uniform rule for culture cannot be adopted. For the ordinary house garden it is desirable to use one variety of each type and several plantings should be made to secure a succession. The seed should be planted in rows eighteen inches apart, as early as possible, and the young plants of cabbage varieties should be thinned to four inches apart. Varieties that do not head may be left quite thick and when fairly well grown those thinned out may be used.

FOR PRICES SEE RED INSERT-PAGE 96.

Lettuce—May King.

HEADING VARIETIES

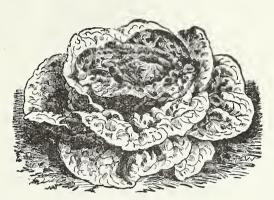

May King—A few years ago it was hardly known in America, now it is found in the gardens of nearly every upto-date grower. It simply forced its way to the front on the basis of its sterling merits. It grows very quickly even in the cold weather of early spring. The habit of growth is very compact and close; in fact the plant is about all head. Outer leaves light green inner leaves bright yellow and of a fine rich, buttery flavor. Heads weigh from 12 to 16 ozs., and are so solid that they carry to market in perfect condition.

Iceberg—A large heading variety; crisp and brittle, and color bright green, lightly tinged with brown on top of the head; leaves curled on the edges.

Improved Hanson Head—A large summer heading Lettuce; very crisp and tender and slow to run to seed; is tender at any stage of growth.

Prize Head—White seed, large, loose, heading variety of exquisite flavor; leaves curly, tipped reddish brown. A great favorite with all.

Califognia Cream Butter or Royal Summer Cabbage—A very popular variety for autumn and winter use. Forms a very large head, which is very buttery, and of rich golden-yellow inside. The leaves are thick and of bright green, slightly tinged with brown on top of head, and the outer leaves are slightly spotted with inconspicuous brown spots. Easy to grow and a good shipping variety.

Lettuce-Big Boston.

Big Boston—The well known and popular hothouse variety of New England. Needs to be quickly grown to be of good flavor. Light green cabbage variety, slightly tinged with brown on the head. Forms a compact buttery head.

Immensity—The largest variety of Head Lettuce known to the trade. The size of the heads which have been grown of this variety are beyond belief until actually seen and grown, and its quality is most excellent in every respect.

New York Head—This Lettuce originating near New York is a sure header, very tight and solid. It is the variety so extensively grown for the California markets under the name of the Los Angeles or Wonderful, and in some sections under the name Neapolitan Cabbage Lettuce.

Lettuce-Boston Market or Tennisball. W. S.

Boston Market or Tennisball W. S.—Smooth-leaved heading variety for late summer use or will stand forcing very well. Its solid, compact habit and good flavor are much sought for.

Salamander—The most popular variety for withstanding the hot weather, and forming a close sure head; véry solid, of medium size, and excellent quality.

Mignonette—Of splendid quality, rather small but very solid, compact heads. Slightly curled edges of leaves tinted with brown. A valuable variety.

Crisp as Ice—Very solid large heads, with a rich creamy heart. Very tender and crisp.

Passion—A great California favorite, very solid heads. A splendid shipper.

Denver Market—A handsome variety, forming very tight conical heads. Even the outside leaves remain crisp and tender.

LOOSE LEAVED VARIETIES

FOR PRICES SEE RED INSERT—PAGE 96.

Extra Select Grand Rapids Forcing

Grand Rapids—A popular variety for greenhouse planting and will make a quick growth under adverse conditions. Its upright habit permits close planting.

The Morse—A large loose-bunching or non-heading variety. Invaluable for forcing. Very crisp and of fine flavor. In color it is a light green and very attractive.

Early Curled Simpson or Silesia—Form a compact bunch of yellowish green leaves; rapid grower, desirable for forcing.

Black Seeded Simpson—A splendid variety either for forcing or outdoor cultivation. Large loose heads of light green color, very crisp and tender.

ROMAINE, COS, OR CELERY LETTUCE.

Lettuce-Paris White Cos.

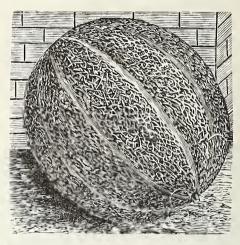

Paris White Cos-Distinct variety of upright growth; leaves should be tied together near top when they soon become crisp and delicious as celery stalks, and eaten in the same manner.

MUSKMELONS

One ounce will plant about 50 hills, 2 to 3 lbs. in hills per acre.

Culture-A rich, deep sand loam, well worked and highly manured with old rotten compost is of the first importance. Plant when all danger of frost is over, in hills 5 to 6 feet apart each way; scatter a dozen seeds to a hill, and after they are out of danger from bugs thin to 3 or 4 plants. When they have 4 or 5 rough leaves pinch off the end of the main shoot, which will cause the lateral branches to put forth fruit sooner.

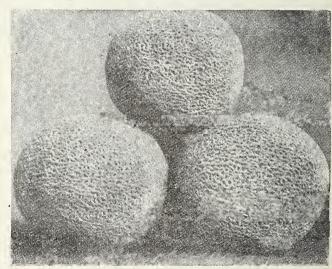

GREEN FLESHED VARIETIES.

Muskmelon-Rocky Ford or Netted Gem.

Rocky Ford or Notted Gem—Is a valuable introduction, and has attained in an incredibly short time a national reputation. It is of the Emerald Gem type, oval in shape, averaging from four and one-half to five inches in length of a delicious flavor; very fine and smooth grained flesh of a light green color throughout when

Extra Early Hackensack-Very popular variety; one that matures early and of good quality.

Muskmelon-Gold Lined Rockyford.

Gold Lined Rocky Ford-This new variety is one of the largest of the Rocky Ford type, and the seed we offer is extra choice, selected from seed originally direct from the originator. It is very prolific, of uniform size, very thick flesh, of a rich golden yellow next to the seed cavity, fruit very thickly netted. Very fine in every respect

FOR PRICES SEE RED INSERT-PAGE 96.

MUSKMELONS—(Continued.)

Maule's Model—(Montana Grown Seed)—A paragon of merit—in size, shape, netting, appearance, aroma, flavor, depth of flesh, smallness of seed cavity cropping ability and shipping quality it leaves nothing to be desired.

Jenny Lind—This is the earliest of the green fleshed sorts and one of the sweetest. It is round or flattened. In size it is small, being from three to five inches in dameter—a very convenient size for serving in halves. It is more largely grown in the great melon producing state of New Jersey than any other sort, and is used in enormous quantities in the eastern cities and at the seashore resorts.

Extra Early Citron or Early Nutmeg—For early general use this variety is unsurpassed; uniform in size, thick fleshed, delicious flavor.

Montreal Market—A very large fruited variety, slightly oval, and heavily netted.

ORANGE OR YELLOW FLESHED VARIETIES.

Emerald Gem—This has become one of the most popular of small or basket melons. The fruit is oval, slightly ribbed, densely covered with coarse netting. Flesh thick, very sweet and highly flavored.

The Hoodoo—The fruit is of medium size; the seed cavity very small; the rind very thin indeed; and the edible, flesh part very thick and meaty. It is of orange or salmon color, the type much prefered now.

PINK OR SALMON FLESHED VARIETIES.

Burrell's Gem—A medium sized oval deeply netted and having salmon or red flesh. It is larger than Rocky Ford and of an entirely distinct flavor. There is a growing demand for the fine grained smooth, salmonred fleshed Muskmelons and Burrell's Gem seems to be one of the best in cultivation.

Barling's Montana—Ideal in size for family use, oval shape, flesh salmon pink; thick fleshed, with small seed cavity; originated in Montana and matures with the earliest.

Osage or Miller's Cream—Medium sized fruit, oval shape, with shallow netting. Flesh very thick and very small seed cavity. Exceptionally fine flavor.

The Grand—Has a vigorous vine and because of its vigorous growth is a great yielder. The fruit is round or slightly elongated, slightly ribbed. Color a peculiar pea green with nettings lighter ribbed. The flesh is firm, fine grained of a rich salmon or red color. In flavor it even surpasses the best grown Osage or Emerald Gem. The flesh extends to the rind and retains its color and quality quite to the outer shell, which, though thin, is very hard and firm and because of this bears shipment remarkably well. The flesh is very thick, considering the size of the melon, leaving a small seed cavity.

Garden Lemon—Fruits short nearly round with yellow and green markings; skin smooth, flesh very tender and of sweet flavor. Best when turning yellow. Makes good preserves.

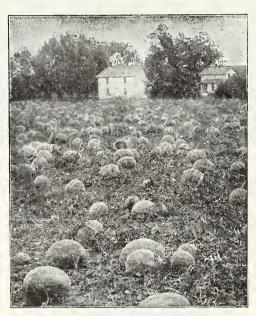

WATER MELONS

Ger.—Wassermelone.

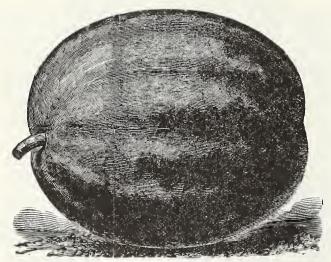

Scand.—Vandmelon.

The hills should be dug about 2 feet square 18 inches deep, and half filled with well-rotted manure which must be thoroughly incorporated with the soil. Plant in May, 10 seeds to a hill, and when the plants are well up, thin out to three, and pinch the ends of the growing shoots to induce early fruiting. While the watermelon is, generally speaking, a southern product, yet the cultivation of same is not confined to the south. Some of the sweetest and best melons we have seen were produced in the latitude of 45 degrees north; consequently, while the watermelon is a tropical fruit, yet our northern friends can grow them successfully.

One oz. for 30 hills 4 to 5 lbs. to an acre.

Watermelon-Cole's Early.

Watermelon-Fordhook, Early.

Fordhook Early—One of the largest varieties and claimed to be the earliest of all. Shape nearly round. Color a medium shade of green. Flesh bright red and of deliciously sweet flavor. The rind is sufficiently hard to make it a good shipper.

Cole's Early—This is a fine variety for the family and market and is particularly adapted, on account of its earliness, to northern latitudes. For early marketing there is no superior. The bright red flesh is cool, crisp and sweet. The melons are of medium size and produced in generous numbers. The heart is surprisingly large in proportion to size of melon.

Phinney's Early—One of the best sorts for private gardeners who deliver direct to consumers. Vines moderately vigorous, hardy and productive; fruit medium sized, oval, bright green, finely mottled; rind thin, flesh bright scarlet, solid, crisp and tender.

Kleckley's Sweet—The best quality of all watermelons. Large oblong melon 20 inches in length by 10 to 12 inches in diameter. The skin is dark green, flesh bright searlet, the rind only about one-half inch in thickness. The scarlet flesh is sweet and sugary and is of such texture that it leaves no strings of pulp whatever in eating. The melon is better for home use than for shipping, and we believe it is the best table melon today.

Rocky Mountain Sweet—Very early, medium size, smooth skin with mottled and dark green stripes. Flesh light red, deliciously sweet.

Improved Kolb's Gem—The standard shipping watermelon. Shape oblong, nearly round, striped and mottled, dark green. The melons grow very large and the tough, though thin rind, permits considerable handling and shipping. Our improved strain is a week earlier than the ordinary Kolb's Gem, grows larger and is a heavier yielder.

Ice Cream or Peerless. Ice Cream or Pecrless—A popular home-market variety, with dark green, mottled skin. Flesh deep pink.

CITRON—For Preserves

Citron— For Preserves Fruit round and smooth. Is not eaten raw, but is useful for making a very clear, transparent preserve of peculiarly fine flavor. Flesh, white and solid. Two varieties: Red Seeded and Green Seeded.

MUSTARD

White—The green leaves are used as a salad when a few inches high. If sown in a warm place or in a hotbed will be ready to cut in a few days; sow frequently for a succession of crops.

Giant Southern Curled—Large variety, forming great mass of beautiful leaves, ruffed and finely curled on edges; used for salads. Hardy, vigorous and highly recommended.

FOR PRICES SEE RED INSERT—PAGE 96.

MUSHROOMS

Practically no capital is required in the mushroom business, and the profits are most satisfactory. All that is required to grow mushrooms is most any building or cellar, some manure, loam, and last and above all, good spawn. Our Pure Culture Mushroom Spawn is full of vigor, the kind used by the best commercial growers of the United States.

Pamphlet—"How to Grow Mushrooms," free for asking.

SPAWN-(Lambert's Pure Culture)-Per

OKRA, OR GUMBO

(One oz. to 100 Feet of Drill.)

The long, tender pods of Okra are very delicious when sliced and cooked in soups. While this is its chief use, it is also boiled and served like other vegetables. The dwarf sorts may be planted in hills or in rows about three feet apart. Plant in any good soil about May 15. The pods should be gathered when very young, as they are then very tender.

Dwarf Green.....

(One Lb. to 75 Feet of Drill, 300 Lbs. to the Acre.)

The importance of Using Northern Grown Onion Sets.

The planting of Onion Sets is increasing rapidly year after year. The Bottom Onion Sets produce onions ready for market six weeks earlier than can be had by sowing the seed. This enables the grower to sell his entire crop earlier in the season, at which time the prices usually are higher. It also permits the sowing of another crop on the land the same year. Bottom Sets also produce good green onions on most any soil in half the time it takes to raise them from seed.

These are simply onions

are about as big as the end of your finger and when set out in spring they come quick and make nice green onions for bunching, or if left stand will bottom down and make big onions as from seed but much earlier. We can furnish them in red valley or white. Velleys as general terms of the property of the control of the property of the control of the c furnish them in red, yellow or white. Yellow are generally best as they are not so liable to run to seed. Multiplier sets are also good.

Sizes of Onion Sets.

It is very important that you get onion sets of the right size. If just a little too large they will run to seed right away instead of making a good onion. The rule is to sell every set below 1½ inches in diameter, but in that case there is sure to be some too large that will go to seed. Therefore we use none above 34 inch.

White Bottom—These are small, solid and of a beautiful silvery white; a favorite sort in private and market gardens.

Red Bottom-Bright deep red in color, even and dry. A popular variety,

Yellow Bottom-

Red Top or Egyptian—

Yellow Multiplier—Often preferred on account of their earliness. Late in June they are fully ripe, and can be gathered. Very productive, 5 to 15 bulbs growing from one set out.

FOR PRICES SEE RED INSERT-PAGE 96.

If unable to find what you want, refer to the Index.

ONION SEED

Ger.-Zwiebel. Seand.—Roedlocc. (One ounce for 200 feet of drill; 4 or 5 pounds in drills per acre.)

The best onions are grown on low, sandy, or mucky lands, with natural moisture and plenty of it.

The crop must be kept free from weeds, and it is usually necessary to weed out in the row by hand once or twice. Hoeing between the rows may be done oftener. It is not necessary to thin the plants in the row, since some thinning is naturally done during the hand weeding.

Steady, even growth is necessary to good onions and a check in growth, whether from disease or drought causes them to run to seed badly.

Different markets and localities prefer different onions. Globe onions are generally most popular and yield better than the other sorts. Flat onions are earliest and the large sized kinds have the best flavor. Every bag of seed is tested as to vitality.

WHITE VARIETIES.

Onion-Silver King.

White Pickling—For early bunching, pickling, etc. Small, hard, round; keeps well; does not turn green when exposed to sun.

White Portugal or Silver Skin—The best known and most largely used white onion. Is flat on the bottom and thick toward the top, very hard and firm and an excellent keeper.

> Early White Barletta or White Queen—An ex-ceedingly early variety. about growing inches in diameter, and 34 of an inch thick. A most excellent sort for bunching and pickling.

> Mammoth Silver King-An early large, white flat variety. Is not a keeping sort nor a good shipping variety, but is valuable for home use and nearby markets. Very mild and fine flavor.

Onion-White Pickling.

White Welsh-Distinctly a bunch onion, and ready for pulling for this purpose very early. Very mild and delicate flavor.

Southport White Globe—A very desirable variety which yields an abundant crop of fine large onions. Pure white color, mild flavor and equally good for keeping as the Yellow Globe. It is an enormous yielder and always sells at high prices. It is best to dry these onions in a shady place and give plenty of air.

ONIONS—(Continued.)

FOR PRICES SEE RED INSERT—PAGE 96.

RED VARIETIES.

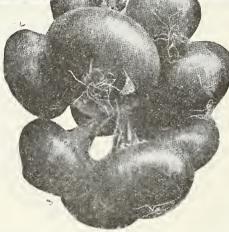

Large Red Wethersfield—This strain of the Red Wethersfield has been especially selected for its fine color. It is the darkest red onion in existence and where a market demands a dark red onion, it has no superior. Inclined to run a small percentage of thick necks on moist, strong soils. The very best for dry, rather poor places.

Southport Red Globe—Large globe-shaped, purplish-red variety, and an excellent keeper.

Extra Early Red Flat—The first to ripen, and one of the handsomest of the red sorts. A medium sized flat variety, an abundant producer and very uniform in shape and size.

BROWN SKINNED.

Australian Brown—An early and very hardy variety which does especially well in Montana. Should be planted early, on low, wet ground to get large bulbs. The skin is thick and the color is a rich brown. Is especially noted as a long keeper, as it keeps well into spring, and much longer than other varieties.

Onion-Large Red Wethersfield.

Onion-Australian Brown Globe.

YELLOW VARIETIES.

Yellow Globe Danvers—This onion is the standard winter sort in many markets. The shape is almost globe form and the bulbs are quite large, with thin necks, ripening down well. The skin is a fine brown orange yellow, while the flesh is pure white, solid and of good quality. Its ke€ping qualities are of the best. This strain is so nearly globe shaped that it passes for a globe, and its earliness makes it valuable for market. Our seed is the very best selection that care can make it.

Yellow Danvers Flat—An early productive variety. The onions are of medium size, skin coppery yellow flesh solid, white and mild flavored. Our strain is remarkable for its freeness from thick necks and is especially adapted to the growing of Yellow Bottom Onion Sets. A very fine sort for most locations.

Prizetaker—Largest Yellow Globe Onion, Excellent keeper of finest flavor, handsome shape and enormous size, many single onions having been raised to weigh five nounds and over from seeds the last year. It is of the same type as those immense imported onions which can be seen in stores and always command a very high price.

Southport Yellow Globe—A mild flavored yellow globe variety, very large, hardy and a splendid keeper.

PARSLEY

Ger.—Petersilie.

Seand.—Persille.

(One oz. for 150 feet of drill.)

Parsley-Moss Curled.

Parsley succeeds best in rich mellow soil. As the seed germinates very slowly, it should be sown quite early in the spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart and half an inch deep. For winter use protect in a frame or light cellar or a few plants may be placed in pots or boxes and kept in the house.

Moss Curled—There is no more attractive variety than this when well grown; it is hardy and slow to run to seed; every gardener's favorite.

Extra Double Curled—In shape of leaf, color and taste this new variety is the ideal of perfection. It stands heat, drought and cold better and will yield better than any other of the numerous varieties of Parsley we have ever had.

Hamhurg or Turnin Rooted—Turnip rooted variety. The roots as well as the leaves are used for flavoring soups, etc. The roots are stored like Carrots for winter use.

PARSNIP

Ger.—Pastinake.

Seand.—Pastinak.

(One oz. for 200 feet of drill, 5 to 6 lbs. in drills per acre.) Sow as early in the spring as the weather will admit, in drills 15 inches apart, covering half an inch deep. It is usual to take up in the fall a certain quantity for winter use leaving the rest in the ground till spring, to be dug up as required.

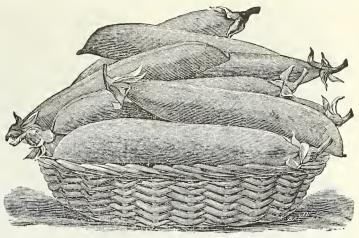

Parsnip-Hollow Crown.

Hollow Crown—Finest variety of Parsnips known; the roots run of uniform size and are smooth. They make an excellent change from ordinary winter vegetables.

Improved Guernsey—For those who like an early Parsnip this variety will be found very useful; not as large as the longer varieties.

Sweet Marrow—A new Parsnip from Europe of especial merit. A fine grained, sweet table variety.

For Prices See Red Insert—Page 96.

Peas-Gradus or Prosperity.

Inoculate this Seed with FARMOGERM.

PEAS

Ger.—Erbsen

Scand.—Dan-Nor. (1 lb. to 100 feet of drill; 80 to 100 lbs. to the acre.)

When grown as a market crop, peas are never staked; for private use they are generally sown in double rows and the tall varieties staked up by brush. For an early crop sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. After the first of June, sowing should be discontinued until the first of August, when a good crop may sometimes be secured by sowing an extra early sort for fall use.

EXTRA EARLY ROUND SEEDED VARIETIES.

Alaska—The earliest pea on the market. The seed is smooth and of bluish color. On this account it is very popular with canners. Very uniform in ripening and an excellent vielder.

EXTRA EARLY DWARF WRINKLED VARIETIES.

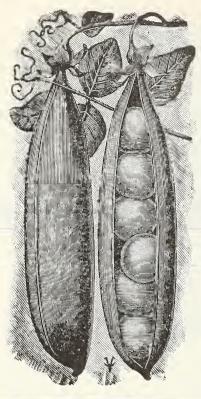

American Wonder-In the dwarf compact growing extra earlies the American Wonder leads all others, can be grown in rows 18 inches to two feet apart. They are quite prolific; the crop can be gathered in 2 or 3 pickings and soil cleared for succeeding crops.

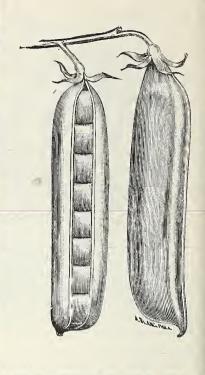

Peas-American Wonder.

Peas-Little Marvel.

Peas-Alaska.

Peas-Horsford's Market Garden.

PEAS—EXTRA EARLY WRINKLED—(Continued.)

Premium Gem-The best and most popular dwarf, wrinkled variety, especially with market gardeners. It grows about 15 inches high and bears good-sized pods, which are filled with 6 to 8 peas of especially fine, sweet

Notts Excelsior—Resembles the Gem in habit, but more dwarf and uniform in growth. Height from 12 to 17 inches. Pods are light in color, round, about 21/2 inches long. Fit for picking 56 days from planting.

Little Marvel—A new dwarf, first early Pea of unusual value. Height of vine 18 inches, with dark green foliage. Small blunt, dark green pods. Fit for table use in about 53 days. Valuable for family or market gardener's use.

EARLY WRINKLED VARIETIES.

Carter's Daisy-Early Dwarf Telephone-Dwarf, large, podded; needs no brush. The striking features of the Daisy pea are its large pods and the way in which they are heaped up in ridges on the short, strong vines. The pods are nearly double the size of American Wonder or Little Gem and are always well filled with large peas of most excellent quality. The vines are 16 to 18 inches high, and being strong and thrifty, require no support, making it an ideal variety for use where brush or stakes are not available. This pea is desirable on account of the fine appearance of the pods, and always finds a ready sale.

Thomas Laxton—A heavy yielding good quality pea, growing about 3 feet. Large pods and very full. Greatly grown for market purposes in eastern sections of the country.

Laxtonian—The earliest large podded pea dwarf habit. Height of vine 1½ feet, with dark green foliage. Large, Curved dark green pods of delicious flavor. This Pea Curved dark green pods of delicious flavor. This Pea is destined to be in the front rank for quality, size and productiveness in a few years.

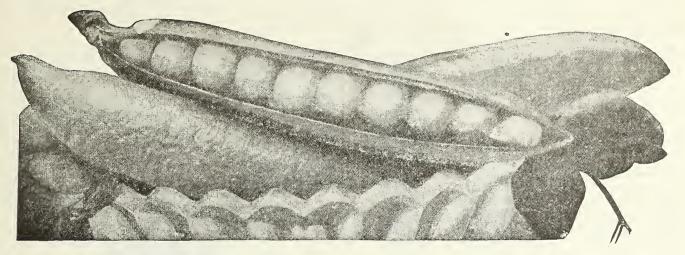

Horsford's Market Garden—A first class wrinkled Pea; second early. Height 24 inches. It is a profitable sort for market gardeners, as a single plant has been known to produce more than 150 pods. It is equally good for the home garden. The medium sized pods are borne in pairs, and are easily and quickly picked.

Gradus—The most popular high quality, extra early, wrinkled pea. This remarkable pea is not only large and of the best quality, but is within two or three days as early as the small round, extra early sorts. Gradus is a wrinkled pea, growing about 30 inches high; the pods are of a bright green color, measuring 4 inches or more in length, as large as Telephone, well filled with luscious peas, 8 to 10 or more in a pod. The peas are of the highest table quality and retain in a remarkable manner their color and attractive appearance after cooking. A grand pea in all respects.

MAIN CROP VARIETIES.

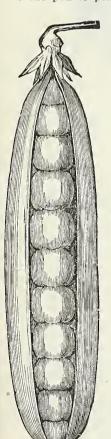

Yorkshire Hero-Hardy, productive and upright in growth, bearing near the top of the stalk broad, pointed pods with peas of good quality. Foliage dark green, 23 to 28 inches in height. Pods 2½ to 3 inches long, blunt, light green in color. Fit to pick 67 to 73 days from planting. Seed large green wrinkled.

White Marrowfat—Large peas of good flavor; grown as a field crop, they are very profitable feed for stock or hog feed; our stock is the true smooth seeded Marrowfat.

Peas-Roosevelt,

Roosevelt—This splendid pea is of the same large podded type as the Telephone but the pods are larger and the peas sweeter. The Roosevelt Pea surpasses all other large-podded varieties in another particular, that of productiveness. In other words, a pint of Roosevelt pea pods will yield as many shelled as a quart of most other sorts. Quality is always to be preferred to quantity, but a pea which will give better quality and larger quantity is the pea to plant; that pea is the Roosevelt.

Peas— Telephone. Champion of England—Medium late variety and one of the most popular of the tall, wrinkled sorts. Prolific, hardy and of fine quality.

Telephone—Selected stock. This fine pea has proved a valuable acquisition; vines vigorous, growing about four feet high and producing an abundance of large pods filled with immense peas, which are tender, sweet and of excellent flavor. It has sterling merit, which gardeners appreciate.

SUGAR PEAS-Edible Pod.

Mammoth Melting Sugar—Large edible pod. Height 42 to 48 inches. Pods, 4 to 4½ inches long and 1½ inches broad. Fit for table use 80 days from planting.

PEPPERS

Ger.—Pfeffer. Scand.—Spankspeber. (One ounce will produce 4000 to 4500 plants.)

Sweet Mountain Pkt., 5c; oz., 70c; ¼ lb. \$2.25 Fine flavor, very large, bright color.

Pepper-Large Bell or Bull Nose.

PUMPKINS

Ger.—Meloneu-Kuabis. Scand.—Graeskar. (One oz. for 2 hills—three lbs. to the acre.)

Culture—The common practice is to drop two or three seeds in every third or fourth hill in the cornfield, but if cultivated on a large scale, the seed may be sown in hills 8 feet apart each way, four plants to each hill.

Pumnkin-Connecticut Field.

Connecticut Field—Standard variety for field culture and stock feeding, large, hardy and productive.

Janaucse Pie—An early crookneck variety. The seeds are marked very curiously. Flesh deep yellow of fine quality. Keeps well.

Quaker Pie—A small, round yellow sort, with fine pinkish netting. Flesh is thick, sweet and of excellent quality.

PUMPKINS—(Continued.)

Large Cheese or Kentucky Field—The well known, ordinary pumpkin, largely used for stock feeding. The fruit is variously colored in yellow, drab, red and orange, and varies also in size, but is usually very large. Is a heavy cropper and very easily grown.

Tennessee Sweet Potato—The best variety for home gardens,

King of the Mammoths or Jumbo—The largest of all the Pumpkins.

Early Small Sugar or Pie—A medium or small sized Pumpkin, very productive, and very sweet. One of the best for home use.

Winter Luxury—A splendid keeper and a good pie Pumpkin. Round shape, russet-yellow color, thick fleshed and good flavor.

RADISH

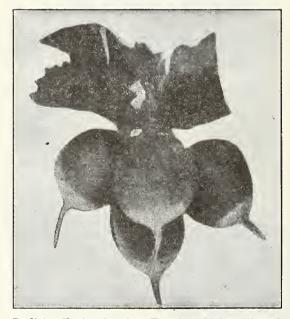

Ger.—Radies.

Scand.—Reddik.

One ounce will sow 100 feet of drill, 8 to 10 lbs. to the acre.

Being a root crop, good brittle Radishes require light, well worked soil, made very rich and mellow to insure quick growth. If permitted to grow slowly, they become tough and pithy. They are easy to grow and frequent plantings will insure a constant supply for the table. Thin the very young plants somewhat to prevent crowding. Summer varieties can be sown all spring and well into summer. Winter varieties, however, require some time to mature; the seed of these should be planted in June or July.

EARLY ROUND VARIETIES.

Radish—Early Searlet Turnip White Tipped.

Early Searlet Turnip White Tipped—A splendid early Radish, very attractive appearance its white tip and deep scarlet are always pleasing to the eye. Very tender and of good flavor.

For Prices See Red Insert-Page 96

Early Scarlet Turnip—A well-known favorite Radish for early home and market use. Matures quickly, crisp and of good flavor.

Sparkler—White tipped Radishes are justly popular by reason of their attractive appearance. This quite distinct variety fulfills every requirement in each respect, the color being a rich earmine scarlet with a very pronounced tip of purest white. The roots, even when fully developed are solid, crisp and sweet, and remain fit for use as long as the coarser kinds. It is equally well adapted for forcing in frames or growing in the open ground, for while the leaves are small, they are sufficiently large for bunching.

Peerless Family—One of the most popular and attractive short varieties. It is globe-shaped, bright rose carmine with bottom and tip clear white. Stems and leaves small. Very valuable for forcing as well as for the house garden and market.

Radish-Non-Plus-Ultra.

Non Plus Ultra—The roots are small, round and deep rich searlet in color. They make a very quick growth, and are ready for use in from 20 to 30 days after sowing of seed. The flesh is white, crisp and tender, and of remarkably fine quality. The seed we offer is of the very finest strain.

Early Bird—The earliest turnip or globe shaped Radish known, a splendid forcing variety, being ready for use in three weeks. Top is very small, roots round and of a rich searlet color.

Triumph—A striking variety. Root globe-shaped, showing bright scarlet stripes on a white ground. A good forcer.

Early White Turnip—A very quick-growing, small turnip-shaped variety. Golor, clear white; very mild flavor.

Crimson Giant Turnip Foreing—A variety extraordinary in that, while growing to an unusually large size, is always tender, crisp and of mild flavor. It remains in perfect condition a remarkably long time and unlike other forcing varieties, does not become pithy even when twice their size in diameter.

Early Scarlet Globe—One of the earliest: flavor mild, crisp, juicy and tender. It forms a small top and will stand a great amount of heat without becoming pithy.

French Breakfast—Medium size, olive-shaped Radish, small top scarlet except at the tip, which is white; a splendid table variety good for either forcing or outdoor culture. Ready for use in 20 days.

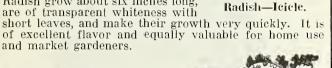

RADISH—(Continued.)

LONG VARIETIES.

Long White Vienna or Lady Finger-A delicate, fine grained Radish and very desirable summer sort, white, smooth, tapering.

Long Scarlet Short Top-This bright scarlet short topped sort is about 5 inches long, growing half out of the ground; is uniformly straight and smooth, crisp and brittle; an excellent variety for private gardens or market.

White Icicle—The roots of this Radish grow about six inches long, are of transparent whiteness with

White Strasburg-In our opinion there is no better Radish grown; the roots are white and grow to a large size, four to five inches thick; for sweetness, tenderness and flavor it is unequalled by any other Radish for summer use.

and market gardeners.

Radish-White Strashurg.

FOR PRICES SEE RED INSERT-PAGE 96.

WINTER VARIETIES.

China Rosc—One of the best fall and winter varieties, firm, white flesh.

Mammoth White China or Celestial-Fresh solid and brittle; pure white flavor mild or slightly pungent. A splendid keeper for use in winter; very showy.

Long Black Spanish—The latest and hardiest of all the winter Radishes; roots black, long, large and good keeper; pull before severe frost and store in damp sand in roof house

Round Black Spanish—A round form of above.

Sakurajima—This is a mammoth variety, and is said to be the largest variety that is obtainable in Japan. Very tender and round.

Nerima or Mikado—A wonderful product of the Orient. with snow-white flesh very tender and under good conditions growing from two to three feet in length.

RHUBARB

Ger.—Rhababer. Scand.—Rhababer. (One oz. to 125 feet of drill.)

Largest and most productive variety known. Will grow 15 to 20 inches long and fully 1½ inches broad. Sow Rrubard seed in drills one inch deep and thin out to six inches apart; transplant in the fall to deep, manured soil to six feet apart each wav.

way. ictoria Pkt., 50. oz., 15c; ¼ lb., 45c: ictoria Very large, highly colored and of good flavor.

SALSIFY OR OYSTER PLANT

Ger.—Hafer-Wurzel.

Seand.—Havrerod.

Sandwich Island Salsify.

(One ounce will sow 50 feet of drill.) Culture—Sow the seed in light, deep soil, early in spring, in drills 12 inches apart and 1 inch deep, thinning out the young plants to 4 or 5 inches. The roots will be ready for use in October, when a supply should be taken up and stored like carrots. Those remaining will suffer no injury by being left in the ground till spring, but should be dug before commencing their growth.

Manmoth Sandwich Island.......Pkt., 5e; oz., 20e; ¼ lb., 90e; lb.\$3.00 We consider this the largest and most profitable salsify in cultivation; roots are two to three times the size of the ordinary salsify, and of more agreeable It is pure white in color, and invaluable to market gardeners.

SPINACH

Ger.—Spinat.

Scand.—Sninat.

One ounce for 100 feet of drill; 10 to 12 pounds in drills for one acre.)

The main crop is sown in September. It is sometimes covered up in exposed places with straw or salt hay dur-

Spinach-Improved Thick Leaved.

ing winter, which prevents it from being cut with frosts; but in shel-tered fields there is no necessity for covering. For summer use it may be sown at intervals of two or three weeks, from April to August. Spinach is best developed and most tender and succulent when grown in rich

Long Standing—The best variety for family use, as it remains in good condition longer

Sninach-Long Standing.

without running to seed than the round leaved sorts. Thick, leaved sorts. Thick, well flavored leaves.

Improved Thick Leaved-This variefy grows very quickly, forming a cluster of slightly wrinkled leaves of fine color and qual-

ity. Especially recommended for market gardeners. Sow in rich ground—the richer the better. If for early spring use sow in the fall and protect the young plants with a covering of light manure or straw.

Bloomdale Savoy Leaved—One of the best of the savoy leaved type, with thick heavily curled leaves. Very succulent and tender.

Prickly Winter—One of the hardiest varieties with medium sized leaves. Very tender.

New Zealand—The stems and leaves of this variety are soft, thick, fleshy and crystalline in appearance. Started early in the spring, the plants will resist heat and make strong growth during the summer.

FOR PRICES SEE RED INSERT-PAGE 96.

SQUASH

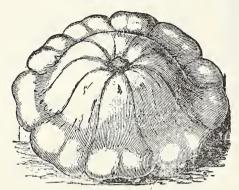

Ger.-Kurbiss.

Scand.—Squash-Graeskar.

(One ounce to 25 hills; 3 to 4 lbs. to the acre.)

There are two distinct types. The Summer is cultivated for the tender young fruits which are used in the green or growing stage during the summer months. The Winter Squashes produce larger hard-shell fruits, which are gathered in the fall before there is danger of their being injured by frost, and stored in a warm, dry place for winter use. A few of the varieties, notably Fordhook, may be used in either state.

SUMMER VARIETIES.

Squash-White Bush Scallop.

Early White Bush Scallop—The fruit is a beautifully waxy white of superior quality; the best early Squash.

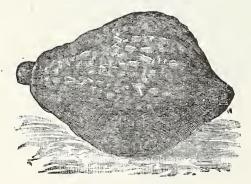

Fordhook—Flesh dry and sweet, of excellent quality; matures and has the advantage of being usable at any stage of its growth.

Golden Custard—Similar in shape to the White Custard with Golden Yellow skin and pale yellow flesh.

Golden Summer Crookueck—As early as the common Summer Crookneck, and much larger, often measuring from 15 to 18 inches in length, of bright golden color and very best quality. Commands an extra price in market.

Early Summer Crookneck—A very early medium-sized Crookneck Squash of uniform size and shape. Color bright yellow, shell very hard when mature. A standard variety.

WINTER VARIETIES.

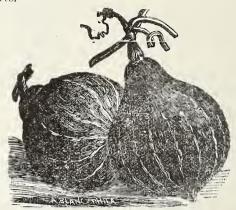

Squash-Warted Hubbard.

Chicago Warted Hubbard—It is similar in size and quality to the Hubbard. The vines are vigorous and productive, while the large dark olive-green fruits are rather more heavily warted. Very handsome in appearance; an excellent keeper and of splendid quality.

FOR PRICES SEE RED INSERT-PAGE 96.

SQUASH—WINTER VARIETIES—(Continued.)

Red or Golden Hubbard—This is identical in size, form and fruitfulness with the Chicago Warted Hubbard, the chief distinction being that the heavily warted skin is of a rich orange yellow, turning to a deep salmon red when ripened. It is of most attractive appearance, fine in quality, and should be one of the most profitable market sorts.

Squash-Improved Hubbard.

Improved Hubbard—This old and popular favorite is still one of the very best winter Squashes grown; always richly flavored. The vines are luxuriant growers and very productive, yielding large squashes of dark bluish green color, weighing often 10 to 25 pounds each. Properly stored, it may be kept from September to May.

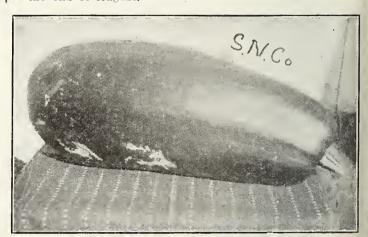

Banana—This is an old variety, but on account of producing but forw goods have become scarge. In shape like a

Banana—This is an old variety, but on account of producing but few seeds, has become scarce. In shape like a huge banana, generally over two feet long, with a tough but not hard shell, very meaty, of delicious flavor and one of the best winter keepers.

Sibley or Pikes Peak—An excellent winter squash, similar in shape to the Hubbard. Very fine grained flesh, and a splendid keeper.

Delicious—This variety in dryness, sweetness and richness of flavor is of the first rank. The shell is green in color, the flesh of a rich orange. An excellent winter keeper

Boston Marrow—A fall or early winter variety, very popular; oval, skin thin, flesh salmon yellow, fine grained; when ripe, bright orange color; matures in this locality the end of August.

Vegetable Marrow.

Vegetable Marrow or Italian Cocozelle—A favorite English sort. The fruit is very variable in size, from 9 to 19 inches in length and from 4 to 6 inches in diameter. Skin a greenish yellow, flesh white, soft and of rich flavor. This is entirely distinct from all other varieties of squash. Plant 8 feet apart.

SUNFLOWER

Mammoth Russian—(For prices see red insert, page 96.)

SWISS CHARD (See Page 90)

TOMATO

Ger.—Liebesapfel.

Scand.—Tomat.

(One ounce will produce 3000 to 4000 plants.)

Acme—An old variety of delicious flavor, dark red tinged with purple. Pkt., 5c; oz. 40c; ¼ lb., \$1.20; lb...........\$4.00

New Stone—Grown more extensively than any other for main crop variety, especially by market gardeners. Very large, smooth and solid, of a bright red color, and a heavy yielder. Pkt., 5c; oz., 40c; ¼ lb., \$1.20; lb.......\$4.00

Spark's Earliana—The earliest tall variety, forming ripe fruit much earlier than any other. The fruit is large, smooth, of a bright scarlet color, and of fine quality. Very valuable for early market use. Pkt., 5c; oz., 40c; ¼ lb., \$1.20; lb. \$4.00

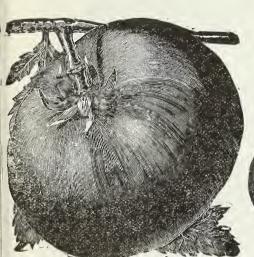

Golden Queen—Is solid, very smooth, free from ridges, large in size, ripens up evenly and is a handsome sort; in fact, by far the most beautiful yellow variety; excellent quality. Pkt., 5c; oz., 40c; ¼ lb., \$1.20; lb..........\$4.00 Dwarf Champion—On account of its dwarf, compact habit, it can be planted quite close. Wonderfully productive, the dark reddish purple fruit being very solid and firm. Of medium size. Very desirable for the home garden.

Of medium size. Very desirable for the home garden. Pkt., 5c; oz., 40c; ¼ lb., \$1.20; lb.\$4.00

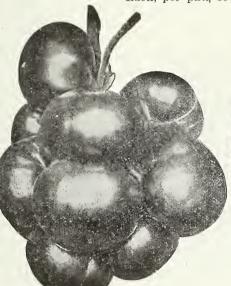

June Pink—Appeals especially to those who like the pink

color. The fruits grow in clusters, and begin to mature very early; measure 3 inches in diameter and are of excellent quality.

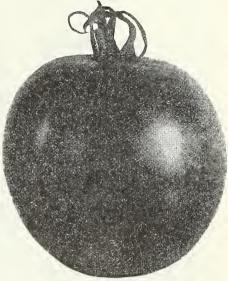

Each, per pkt., 5c; oz., 40c; ¼ lb., \$1.20; lb.....\$4.00

Tomato-John Baer.

Tomato-June Pink.

Tomato—Sparks Earliana.

John Baer—The seed of this Tomato was purchased by us three years ago from one of the largest growers in the East, who recommended it as the earliest of all tomatoes, and our experience with it bears out this recom-mendation. The fruit is a bright red color, of good size round, smooth, very solid and producing very few seeds. Pkt., 10c; oz., 50c; ¼ lb., \$1.50; lb.\$5.00

-The earliest Tomato we know. Its heavy clusters of beautifully formed, medium-sized fruits ripen several days before any other variety. Although so wonderfully early, there is none of the disfiguring corrugation found in other early sorts, while at the same time, Earlibell does not crack. Pkt., 5c; oz., 50c; ¼ lb., \$1.50; lb.

Livingstone's Coreless—One of this noted originator of good tomatoes best. Almost entirely corcless very solid and most excellent quality. Very fine for table use. Pkt. 5c; oz., 40c; ¼ lb., \$1.20; lb.\$4.00

Truckers Favorite-This has literally jumped into favor with market gardeners everywhere, for its early and continuous bearing qualities. Very solid, does not crack, and a first-class shipper. Pkt., 5c; oz., 40c; ¼ lb., \$1.20;

Beauty—Fruit large and smooth; excellent flavor, good shipper, the best all round variety for Montana, does not crack. Pkt., 5c; oz., 40c; ¼ lb., \$1.20; lb.\$4.00

SMALL FRUITED VARIETIES.

For pickling and preserving. Invaluable for garnishing. Each, per pkt., 5c; oz., 40c; ¼ lb., \$1.20; lb.....\$4.00

Red Pear-Fruit handsome and solid; fine for preserves.

Red Peach-

Red Plum-

Red Current-

Yellow Cherry—For pickles and preserves.

Yellow Plum-Round and regular, bright yellow; used for pickles.

Yellow Peach-

Yellow Pear-

Winter Cherry, or Purple Husk Tomato—Makes fine sauce.

Red Cherry—Small fruits used for pickles, very handsome.

Ground Cherry, Strawberry, or Yellow Husk Tomato-Plants of low-spreading growth and immensely productive. The small yellow fruits are each inclosed in a husk. Of very sweet flavor, highly esteemed for preserving or making pies.

TURNIP

Ger.—Steckruebe.

Scand.—Turnips.

(One ounce will sow 150 feet of drills; 2 pounds will sow an acre.)

Culture—For early use, sow as soon as the ground can be worked in spring, in drill 15 inches apart, and thin to 8 inches apart as soon as plants are large enough to handle. The sowing should be made just before rain, if possible, a rapid growth being important.

For feeding stock in fall and winter there is nothing superior to turnips and rutabagas, as they are much liked by all kinds of stock and serve to keep them in good condition. We cannot too earnestly recommend farmers to increase their sowings largely for we are sure the crop will prove remunerative.

WHITE VARIETIES.

White Milan—Extra Early—Very small top, upright and compact; the clear white roots are very smooth, symmetrical and beautiful; there is no better turnip for early bunching; fine grained, tender and sweet.

Turnip-Purple Top White Globe.

Purple Top Milan—Extra Early—Very similar to the White Milan except that the roots are a little more flat, and the top of root is purple.

Purple Top White Globe—Round, large; an excellent keeper.

White Egg—An old favorite, egg-shaped, perfectly smooth, firm and mild.

Purple Top Strap Leaf
—The most generally
planted of any variety. It is a quick
grower, the flesh is
very fine grained and
sweet flavored. The
red top of the bulb
extends down to
where it rests in the
soil.

Early Montana Snow-Ball — Sweet early solid; favorite for early market bunching.

Turnip-Golden Ball.

YELLOW VARIETIES.

Golden Ball—The most delicate yellow fleshed turnip; of medium size form, hard and of superior flavor. Valued highly as a table variety.

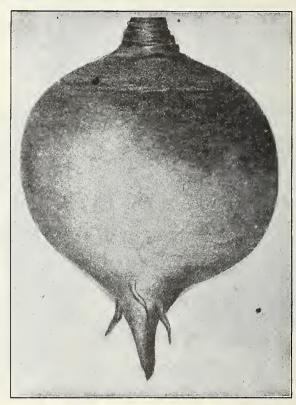

For all prices not quoted—see red insert—page 96

RUTABAGA

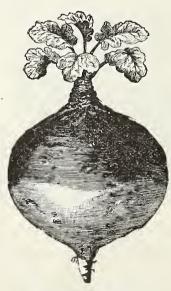

Russian or Swedish Turnip.

These require a longer season in which to grow than do other turnips; the seeds should be sown about the first to the middle of June.

Bangholm—The sced for this variety of Rutabaga is as grown in Denmark by "Daehnfeldt," who has been awarded a first class certificate on several occasions by the Danish government for the Best Gropping Rutabaga. An oblong globular shaped root with small neck, yellow flesh, very dark purple top and is superior to all other varieties.

Rutabaga—Prize Winner.

Rutabaga—Danish Bangholm.

Prize Winner—Short neck, small top, firm flesh, symmetrical shape, united with high feeding value, great productiveness, hardiness and long keeping qualities, describes the perfect Rutabaga. Every root of the Prize Winner more nearly approaches ideal than any other strain.

American Purple Top—This strain is of American origin and is a purple top yellow variety.

Large White, or Sweet German—A very large variety, with white skin and white flesh which is tender and sweet.

Hurst's Monarch—A very distinct type, of the tankard shape, very large, yielding enormously. One of the best.

State Nursery and Seed Co.'s

Rocky Mountain Lawn Grass Seed

ROCKY MOUNTAIN LAWN GRASS MIXTURE is the best that can be procured at any price, or under any brand. It is the result of years of scientific selection and test in this climate, and it is no unusual thing for lawns that are sown with this unequaled mixture to require cutting in thirty days or less from the time of

Pamphlet on the Preparation and Care of Lawns, illustrated from actual photographs, FREE on appli-

cation.

LAWNS ON CAPITAL GROUNDS, HELENA, MONT. Sown With Rocky Mountain Lawn Grass Mixture. Many of the trees shown are also from our Nurseries.

One quart suffices to sow 200 square feet, or 10x20; 5 lbs. for 2000 square feet, or 40x50; 80 to 100 lbs. per acre.

ROCKY MOUNTAIN LAWN GRASS MIXTURE—(Postpaid) Our Lawn Grass Mixture is scientifically combined. Our experience of many years has given us an intimate knowledge of grasses, their habits and requirements. In our Rocky Mountain Lawn Grass Mixture are included only the very best varieties—pure clean and free from foul seed.

KENTUCKY BLUE GRASS—("Placer" Grade) (Postpaid) Lb. 30c; by Express or Freight at Purchaser's Expense, Lb., 25c; 10 Lbs. Used extensively for lawns and parking streets; also makes excellent pasture or hay.

ROCKY MOUNTAIN LAWN GRASS MIXTURE WITH DUTCH CLOVER—(Postpaid), Qt. pkg., 40c; by Express or Freight at Purchaser's Expense, 5 Lbs. \$1.80; 10 Lbs. \$3.40 As there are many people who like clover in a lawn we put up a mixture as above; this mixture has gained us many friends and it is increasing in popularity.

SHADY PLACE LAWN GRASS—(Postpaid), Lb., 40c; by Express or Freight at Purchaser's Expense, 5 Lbs. \$1.75; 10 Lbs., \$3.25. Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places. For sowing in such places we recommend the use of this special mixture. The grasses used in making this special mixture are those that are well adapted for growing in shade for growing in shade.

WHITE CLOVER—(Peerless)—(Postpaid), Lb., 70c; by Express or Freight at Purchaser's Expense, Lb., 65c. This is frequently sown to cut green for chicks and fowls; also used largely in making lawns for which this variety is especially adapted.

See under Lawn Requisites the special "Gem Rake." A novel, useful and practical tool which every owner of a lawn should have.

PRICES SUBJECT TO CHANGE

UNITED STATES FOOD ADMINISTRATION—LICENSE NO. G-33773.

SELECT FIELD SEEDS

[Prices Quoted are F. O. B. Helena.] Subject to change.

No Charge for Sacks Unless Specially Noted.

Prices quoted on Field Seeds are those in effect at the time this catalog goes to press. We will maintain these prices as long as possible, but cannot guarantee them throughout the season. Order early before our stocks are exhausted. Current Price of Field and Grass Seeds during the season will be quoted on request, stating quantity desired.

Our large new fireproof Seed Warehouse, containing nearly 20,000 square feet of floor space, located near the Great Northern R. R. Depot, is completed and in full operation. See illustration elsewhere in the Catalog.

It affords us facilities for the prompt handling of large quantities of seeds second to none, and is equipped with the most modern and up-to-date machinery for the cleaning, re-cleaning and grading of seeds that scientific ingenuity can devise. All machinery is equipped with electric motor drive for power.

Ample switching facilities for car lot receipts and shipments are provided.

The completion of this up-to-date plant places the STATE NURSERY & SEED CO. as undoubtedly the most complete establishment of its character in the northwest.

Our friends and customers are cordially invited to inspect this latest addition to our plant, also our new store on Fuller Avenue, and the large Nurseries, Seed Trial Grounds and Greenhouses on the Broadwater Street Car line. Courteous employes will take pleasure in showing the different departments to visitors, and a visit to Helena is not complete without a visit to this large and most interesting branch of the business family of the city.

SEEDING TABLE

WE RECOMMEND THE FOLLOWING QUANTITIES OF SEED TO BE USED PER ACRE:

	Broadcast.	Drilled. 1		Broadcast.	Drilled.

GRAINS

WHEAT—4 pecks—1 bu. or 60 lbs. **OATS**—4 to 5 pecks—1 bu. and 1 peck or 50 to 60 lbs. **FLAX**—16 to 24 lbs.

BARLEY—2 r 6 Row—5 pecks—1 bu. and 1 peck or 60 to 70 lbs.
BARLEY—(Hulless)—4 pecks—1 bu. or 60 lbs.

Having been advised by a great many of our customers that the above information would be a great benefit to farmers generally, we are glad to give the table. We find from long experience that these are the necessary amounts to sow for the various purposes stated.

ALFALFA

Inoculate this Seed with FARMOGERM.

FACTS ABOUT ALFALFA

Alfalfa produces from 3 to 7 tons of hay to the acre. It has as much protein as Wheat bran; 360 stalks have been grown from one seed. It does not exhaust the soil, but enriches it. It can be ground into meal to feed hogs and chickens. It will grow 2 to 3 crops a year.

Alfalfa in money value is worth 45 per cent more than other Clovers and 60 per cent more than Timothy. Ten milch cows can be fed on less than 2 acres by soiling. One acre will pasture 20 hogs for six months.

Three pounds a day makes a full feed for fattening lambs. Four to five pounds makes a full feed for fattening aged sheep. Thirty-five pounds makes a full feed for fattening steers.

A lamb will winter and thrive on 3 pounds a day. Sheep fed with Alfalfa will gain from 8 to 15 pounds in 75 days and will double, with small grain ration added. Lambs wintered on Alfalfa will produce one to two pounds more of wool than when on the range.

Fed to dairy cows, Alfalfa maintains the flow of milk, equal to June grass for nearly a whole year. It can be chopped fine with corn meal. Such a mixture is worth more per pound than the original corn meal.

Many interesting facts in addition to the above might be cited about Alfalfa. It would hardly be possible to say too much about Alfalfa; it is a working plant which is changing the destiny of many farming sections.

Its long branching roots penetrate far down, push and crowd the earth this way and that and thus constitute a gigantic subsoiler. These become an immense magazine of fertility.

The value of a strain or variety for any certain locality depends upon its ability to yield generously and withstand The value of a strain or variety for any certain locality depends upon its ability to yield generously and withstand the climatic and soil conditions there prevailing. To best insure such qualities in Alfalfa, seed should be sown that has been grown in a section where the producing plants have successfully survived the most unfavorable conditions that are likely to be encountered. This insures seed of the highest grade of vitality, as plants in any way deficient are killed out in such winters as that of 1915-1916, when temperatures ranging from 40 to 46 below zero were registered in this section. These temperatures are taken from the official records, and the natural result in a field of Alfalfa is "the survival of the fittest"—nature's immutable law. The seed we offer is from plants that have stood this supreme test, and can not be surpassed by any brands on the market today.

ALL ALFALFA WE OFFER WAS PRODUCED ON DRY OR SUB-IRRIGATED LANDS.

GRIMM ALFALFA.

Grimm Alfalfa as it is generally called, was first grown by Wendelin Grimm, at a point in Minnesota. The wonderful advance made by this type over the ordinary Alfalfa led its being subjected to the most severe tests by the Agricultural colleges and others. Our Registered Grimm has been grown under the supervision of the Montana State Agricultural college for years, and is harvested, threshed and sealed under the care of their representative. So far as we know the Registered Grimm which we offer is the only lot of Registered Grimm grown in the state of Montana.

True Grimm—This Seed is tested for Variety, Purity and Germination by the Montana Agricultural College and Inspected, Registered and Sealed by the Montana Seed Growers' Association Growers' Association.

True Grimm Alfalfa has been so well advertised and described that any attempt at further praise would be superfluous. In every respect it has proved itself a most superfluous. In every respect it has proved itself a most wonderful variety or type, and its reputation has been so well established that the true registered and sealed seed always commands a high price. The above offered Grimm is the best that can be procured at any price, grown from the original stock, fully registered, inspected, tested and sealed under the most stringent regulations to insure the highest quality attainable. to insure the highest quality attainable.

FREE—Pamphlet on True Grimm Alfalfa for the asking.

Montana Grimm "Pecrless" Not Registered—A variegated or hybrid variety. The acknowledged leader of all Alfalfas for general purposes in the United States and Canada. Grown in the Northwest continuously since 1858. Test∈d in every state and province and has conclusively demonstrated its superiority. The hardiest, most vigorous, drouth-resistant and high yielding Alfalfa in cultivation. We have only a limited quantity of this seed dry-land grown, and when this is exhausted we cannot obtain more until next season. We advise ordering early.

"LISCOMB" ALFALFA.

The type listed below as "LISCOMB" Alfalfa is one of the best that has yet been introduced. It possesses every requisite to be desired to place it in the front rank of Alfalfa varieties.

It is of the much to be desired branching root and many crowned type, with variegated flowers.

It is of the most hardy nature (46 below zero is known to not injure it in the least) yields enormously, and does well on dry and sub-irrigated lands.

It has received the highest commendation at the hands of the Extension Division of the Minnesota Experimental Station, and also from the officials of the Montana Stations.

The seed we offer was produced by plants that withstood 46 degrees below zero, per the official records of the nearest station of the U.S. weather bureau.

More than this can not be said or claimed for any brand or type of Alfalfa, and we confidently predict that as the merits of the genuine "Liscomb" Alfalfa become known, it will be in far greater demand than that of any other by growers desiring the best Alfalfa that can be obtained for the rigorous northwestern climate.

Liscomb "Peerless"—This is the highest grade of this variety that can be procured, most carefully selected, cleaned and recleaned by the most scientific machinery that can be procured for the purpose.

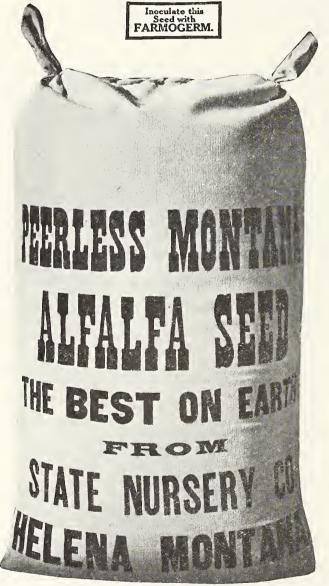

Liscomb "Placer"—This grade "Placer" is second only to our "Peerless" grade, and is of splendid quality.

SCARIFYING.

We have installed an up to-the-minute Ames Scarifying machine. Add \$1.00 per 100 lbs. if you desire your Sweet Clover or Alfalfa Seed Scarified.

Montana Ordinary Alfalfa Seed

is today acknowledged to be without a peer. Experiment Stations of several State Agricultural Colleges, bear out in every case the final superiority of Montana seed, for hardiness, vitality and productiveness. Located as we are, in the heart of the Rockies, we have facilities for the selection and acquisition of the highest grades of Alfalfa for the northwestern country that are not equaled by any other house, and our customers may rely on the assertion that seed secured from us is of the hardiest and best obtainable quality in the grade in which we class it.

ALFALFA—("Peerless) Best on earth, in Sealed Bags. The seed is large and of high germination. Our seed is obtained in those sections where plants have endured the extreme cold of winter and thrive at high altitudes. Our experience of several seasons has demonstrated the superiority of this seed under adverse climatic conditions throughout the entire Northwest. There is no better seed grown.

ALFALFA—(Continued.)

ALFALFA—(Placer) Experiments of many agricultural stations have established without a doubt the superior hardiness of Montana grown Alfalfa seed over that produced elsewhere. This grade is selected from among the best that grows, and is next only to our "Peerless." Samples cheerfully sent to intending purchasers; when writing for samples, please state what quantity you expect to use, so that we may quote you the best possible price on the quantity you need.

ALFALFA—(Quartz) An excellent grade of seed, but on account of unfavorable weather it has some discolored seed and therefore is not bright enough in color for our higher grades. We will be pleased to submit samples with tests and can quote on any quantity desired.

ALFALFA—(Turkestan) Imported. Some of our customers have had splendid success with this imported type of Alfalfa, and we list it for their benefit. The seed we offer is of the best quality obtainable. Samples and prices will be furnished on application, stating quantity desired.

Gold Medal Awarded Us for Alfalfa Seed at the Panama-Pacific Exposition, San Francisco, Cal.

Harvesting Registered Grimm Alfalfa.

CLOVERS

Inoculate this Seed with FARMOGERM.

Medium Red, "Peerless"—Looking to the future, no time should be lost in introducing the bacilli of the Red and Alfalfa Clovers. The use of nitro cultures may tend to hasten their establishment, but nature's way, and the best way, is to use a small quantity of seed, say a pound or two of Red and Alfalfa Clover to the acre with whatever crop you are seeding. After a little you have the prized bacilli in your land, then you may safely call your farm doubled in value from a producing standpoint. Red Clover is regarded as the most important of the whole genus for practical agriculture; valuable not only for forage, but also a fertilizer for the soil. Long, powerful tap-roots, which in decaying add largely to that black mass of matter we call soil.

Mammoth Red "Peerless Grade"—This variety of clover matures about two weeks later than the ordinary red clover, and will produce a heavier yield per acre than any other variety. It is also better adapted to poor sandy soil than other sorts Alsike included. On account of its vigorous heavy growth, it should be cut for hay before the bloom fully matures, otherwise the heavy growth will have a tendency to become woody. It is by far the best variety known where clover is desired for a hog pasture.

Alsike or Swedish "Peerless" Grade—This Clover originally came from the little Province of Alsike in Sweden. One of the hardiest varieties known, is perennial and does not winter kill; stands alike drouth or wet. We know of many who have used Alsike Clover to sow in boggy land, making this land produce a crop or pasturage and at the same time enabling it to be driven over, as the mass of roots make a heavy sod. Favorite with bee keepers. Flowers with sweet agreeable odor.

Alsike or Swedish "Placer" Grade-

White Dutch—Excellent for pasture, and when mixed with Kentucky Blue Grass, makes the finest and most nutritious food for sheep and cows, used universally for lawns in the United States. Sow 5 to 8 pounds to the acre, alone for pasture; for lawn, 1 lb. to 400 square feet.

Crimson Clover—An annual variety in common use in Italy and southern France for feeding green. Also grown largely in this country in Virginia, where it is called "German Clover," and we think would do well in our western states.

ADVANTAGES OF SWEET CLOVER.

Consider the following facts: 1. It is not a weed.

2. Like alfalfa it is rich in protein. 3. Will not bloat cattle or sheep. 4. Equal to alfalfa for pasture. 5. Is a great milk producer. 6. Furnishes early spring pasture. 7. Contains more protein than red clover. 8. Fits well in the crop rotation. 9. Is a great soil enriching crop.

10. Better than any of the common clovers as a green manure crop. 10. Better than any of the common clovers as a green manure crop. 11. Is a valuable plant for honey bees. 12. Prepares the soil for alfalfa. 13. Roots are soft and give no trouble in plowing. 14. Roots being tender, become inoculated more readily than alfalfa. 15. Never damages cultivated crops. 16. Its roots decay rapidly, adding much nitrogen and humus to the soil. 17. Grows and will produce a crop in all parts of the United States. 18. Seeds freely in both humid and dry sections. 19. Sweet Clover prevents erosion. 20. Will grow under conditions where clover and alfalfa fail; (a) on low, wet, alkali and acid soils; (b) on hard, compact soils; (c) on poor soil, especially where there is lime. cially where there is lime.

A special pamphlet on Sweet Clover and Its Uses, on application.

FOR PRICES SEE RED INSERT—PAGE 96.

Sweet White Blossom—As Sweet Clover can be grown under conditions which are unfavorable to most forage or grazing crops, it is destined to become quite popular in our non-irrigated pasture lands. This fact has caused our Agricultural Colleges to recommend it very highly. Inquiries for Sweet Clover Seed are yearly growing in number, as our farmers learn its true value.

Sweet White Blossom, "Placer" Grade—

Sweet White Blossom, "Quartz" Grade—This grade is un-

hulled Sced. Both high in Purity and Germination.

Sweet Yellow Blossom, "Peerless" Grade—The Yellow Blossom Sweet Clover belongs to the same family as the white blossom, not quite so vigorous in growth, but is at least 14 to 21 days earlier, and has yellow flowers.

Sweet Yellow Blossom, "Placer" Grade—

RED TOP

(Eight to ten lbs. to the Acre.)

Solid Seed, "Peerless"—A valuable grass for moist soils. It is a good permanent grass, standing our climate as It is a good permanent grass, standing our climate as well as any other, and consequently well adapted to our pastures, on which it should be fed close, for if allowed to grow up to seed the cattle refuse it. On moist, rich soil it will grow 2 feet, and on poor gravelly soil, about half that height. It has been grown successfully even on "alkali" bottom lands, where other grasses failed. We do not handle the chaffy grade of Red Top, and offer only along seed. only clean seed.

Solid Seed, "Placer"-Excellent quality. Second only to Peerless.

TIMOTHY

(Eight to Ten Lbs. to the Acre.)

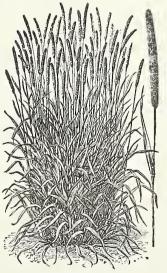

"PEERLESS" GRADE.

As a crop for hay, Timothy is probably unsurpassed by any other grass. It is greatly relished by all kinds of stock, especially horses. It yields more nutritive matter than any other grass or forage plant. It is not suited for a permanent pasture, as it will, in the course of a few years, run out. It is, however, well adapted to early spring grazing, as it starts up quickly in the spring and in favorable weather can be pastured in the autumn as well. The largest errors of hay are raised on rish land. well. The largest crops of hay are raised on rich land. It is not suited for light, sandy soil as well as some other grasses.

"Placer" Grade—This grade, like the above, is the plump native grown seed, unequaled by the stocks of most eastern firms. If you use large lots write for special price, stating quantity you expect to

Alsike Clover and Timothy Mixed — Where Alsike Clover and Timothy are grown together, and the seed is saved therefrom, it is impossible in cleaning to make a complete separation of the two. On this account we purchase the seed for less money and we can sell it for less money than would be the case if a perfect separation could be made. Those desiring to sow Alsike and Timothy together can save considerable money

Timothy.

BLUE GRASS

(20 to 25 Lbs. to the Acre.)

Kentucky "Peerless"—We wish to call particular attention to the cleanliness of our Blue Grass. As usually sold by most seedsmen it weighs 19 to 20 lbs, to the measured bushel. Our seed is thoroughly recleaned.

bushel. Our seed is thoroughly recleaned.

Kentucky "Placer" Grade—Used extensively for lawns and parking streets; also makes excellent pasture or hay.

Correspondence in English, German or Scandinavian.

BROME GRASS

(15 to 20 Lbs, Per Acre.)

Bromus Inermis, "Peerless" Grade
A wonderful drouth resister. A
grass for the stock raiser. All
cattle like it. Will drive out
Russian Thistle, also Black Mustard. Drouth defying, frost resisting. Yields enormous crops
of splendd hay and affords early
and abundant pasturage. We
have seen some very fine crops
of Brome Grass and Alfalfa
mixed, which makes an excellent
hay for horses and cattle. Try
it. These both mature and cure
at the same time. Our Peerless
grade of this magnificent grass
is unequaled for purity and high
germination, and less seed is required to the acre than any other
grade. From good seed, good
crops grow.

SLENDER WHEAT GRASS

(20 Lbs. Per Acre.)

Or Western Rye Grass—This is a valuable native grass, very hardy and makes good hay. Much valued for crop rotation. Seed about 20 lbs. to the acre, and do not cover too deeply. Some growers advise the mixture of Red Clover with this grass and for hay this assures easier handling in harvesting. It has proven a valuable crop in the Dakotas and also in Northwestern Canada. On account of the very short crop and scarcity of Brome Grass this season, Slender Wheat Grass will be used extensively.

ORCHARD GRASS

(20 to 25 Lbs. Per Acre.)

"Peerless" Grade—A valuable grass for pasture or hay land, and on account of its earliness is very valuable for a permanent pasture. It furnishes the first green grass in the spring and until late in the fall. When closely cropped it grows up very quickly and is ready for grazing again in ten to twelve days. When grown for hay, more than one crop can be obtained in one season, and when only one crop is cut the aftergrowth is very heavy and gives splendid and rich pasture till late in the fall. It will stand drouth and is hardy. It grows in tufts, and is therefore best sown with Red Clovers, rye grass etc. It is well suited for shady places, such as orchards and groves.

Do you wish your Clover or Alfalfa Seed Scarified? See Page 113.

PERENNIAL RYE GRASS

(25 to 30 Lbs. Per Acre.)

"Peerless" Grade—A strong growing, hardy perennial grass, valuable both for grazing and hay. Also makes a fine lawn and does not require the close care that Blue Grass does as it will flourish better under trees or in shady locations.

FOR PRICES SEE RED INSERT—Page 96.

SUDAN GRASS

One of the Most Remarkable New Forage Crops Grown.

SUDAN GRASS—The original form of the cultivated Sorghum. It was brought to the United States by the U. S. Department of Agriculture in 1909. It is a tall annual grass, and ranges in height from 4 to 8 feet. The stems are small and somewhat more leafy than Johnson Grass, which it most nearly resembles. Like the Sorghum crop, it must be planted each spring and dies when the first frost comes. It usually matures 90 days from planting. Its feeding value marks it easily as one of the dependable crops for the farm.

HOW TO PLANT.

Use 3 lbs. per acre if in cultivated rows; 5 lbs. per acre in drills, and 16 to 24 lbs. per acre broadcast. It should not be planted until all danger of frost is past and the ground thoroughly warm, as the young plant is more tender than Sorghum.

HARVESTING.

The crop should be cut as soon as the grass is fully headed and early cutting is advised where the crop is to be used for hay. If grown for seed it should be cut when the seed is ripe and fully matured. It may be harvested with a mower or grain binder. If planted in drills it can be readily harvested with a corn binder. When sown for seed it is best to bind it as it is much easier to handle it in threshing.

MILLETS

(3 Lbs. to Acre for Cultivated Rows; 5 Lbs. to Acre in Drills; 16 to 24 Lbs. Per Acre Broadcast.)

The yield of White Wonder Millet is extremely heavy, being fully half again as heavy as that of German Millet. Some growers of White Wonder Millet claim that it will outyield other millets three to one.

Another very desirable feature of White Wonder Millet is its earliness. This variety is much earlier than German Millet but not quite as early as the Siberian variety.

The foliage is very heavy, the leaves broad, and therefore it produces an immense amount of excellent fodder which cures very readily.

We believe that on account of the earliness, the immense yield of both grain and fodder, and the very vigorous growth which leave the ground clean, White Wonder Millet will soon take first place among the millets.

GERMAN—Tennessee Grown Seed—In the north Millet is sown almost altogether for hay and for that purpose southern grown seed is much the best. It grows taller than does that from northern seed, and that means more hay. It is finer than that from the northern seed, and that means better hay. In fact, it is our judgment based on an experience of many years that a farmer had better, from the standpoint of profit alone, pay \$2.00 a bushel for true southern grown German Millet than to sow the best northern Millet as a gift. Millet seed produced in the north, even from southern seed, becomes what we call Common Millet. Not only does the plant change in character, becoming coarser and much more dwarf, but the seed itself shows a change and is readily distinguished by those experienced in handling it.

SIBERIAN OR KURSK MILLET—This variety was first introduced into the United States from Kursk, Russia, in 1898. Extensive experiments were conducted at both the South Dakota trial stations which demonstrated the superiority of this new variety. As both a hay and seed producer it ranks very high. In dry seasons the weight and quality of the hay has been far ahead of German or Hungarian Millet. In favorable years the difference has not been so great, but the results have always been in favor of the Kursk Millet. We have a fine supply of excellent quality.

HOG OR BROOM CORN—This is grown for the same purpose for which other Millets are sown, but makes inferior hay unless cut very young. It yields enormously of seed, even 60 to 70 bushels to the acre, and this seed is very advantageously used for fattening swine and other stock, and is of special value for this purpose in sections where corn cannot be safely or cheaply grown. Seed also makes very fine feed for poultry or young chicks. It is very similar to the Early Fortune Millet except that the seed is yellowish white in color. It will mature in about two months from sowing the seed.

JAPANESE—Improperly called "Billion Dollar Grass"—
Entirely distinct from all other Millets. It grows from
6 to 9 feet high, stands up remarkably and yields enormous crops. When cured it makes good hay and in quality is superior to corn fodder. It is relished by all kinds
of stock. Sow 10 lbs. in drills; 15 lbs. broadcast to the
acre.

OUR GRADES "PEERLESS" "PLACER" "QUARTZ"

Are the highest and best obtainable anywhere LOOK FOR THEM

FETERITA

(3 to 4 Lbs. Per Acre in Drills.)

FETERITA—A wonderful new grain which has attracted considerable favorable attention in Kansas, Missouri and Oklahoma. It belongs to the Sorghum family. It was introduced from Africa by the United States Department of Agriculture. The advantages of Feterita ere its drouth resisting qualities, its heavy yield its earliness, its stooling propensities and its freedom from insect pests. It is of medium height and about equal to Kaffir Corn in feeding value. Feterita successfully withstood dry weather in Kansas and nearby states during 1913 and yielded more under these unfavorable conditions, it will yield 60 to 75 bushels to the acre. It branches very freely from the roots, making from three to eighteen heads from a single stool. It is from two to three weeks earlier than Kaffir Corn, and should successfully mature in the north. Culture same as for Kaffir. The chinch bugs will consume other crops, but seem to leave Feterita entirely alone.

LENTILS

Montana Grown—Lentils are again coming to the front in leguminous crops, and rightfully so. Inoculated with Farmogerm, they enrich the land with nitrogen, they produce a heavy crop on poor soils, the crop can be profitably used for any feed purposes either green or cured, and the ripened crop when threshed is in great demand for cooking purposes. Few of the legume family make as desirable a stock for soups as do the Lentils. Oriental countries have long used this as a chief article of diet, and its value in this country for that purpose is becoming better known.

FOR PRICES SEE RED INSERT—Page 96,

SORGHUM OR SUGAR CANE

(15 Lbs. Per Acre Drills; 50 Lbs. Broadcast.)

Sorghum—(Southern Seed)—This Sorghum, while not suited for syrup making purposes in this section, is of great value as a forage crop, whether to be cut and dried or for use in silos. It is very rich in feeding qualities and will yield heavily on irrigated or sub-irrigated lands.

Kaffir Corn.

affir Corn, White Seeded—An excellent Kaffir fodder plant, yielding two crops of fodder during the season. It grows 4 to 5 feet high. straight making a upright growth. The stem or stalk bears numerous leaves. The stalks are brittle and juicy, not hardening like other varieties of Sorghum. It makes excellent fodder, either green or dry, which is highly rel-ished by cattle and all kinds of stock. The seed crop is also heavy, sometimes 50 to 60 bushels to the acre. For grain, sow in rows 3 feet apart, 3 to 5 pounds to the acre. For fodder sow 40 to 50 lbs. either broadcast or in drills.

FIELD PEAS

Inoculate this Seed with FARMOGERM.

(60 to 75 Lbs. Per Acre in Drills; 75 to 100 Lbs. Broadcast.)

Here is a crop which is not only profitable, but will return to the land the much-needed nitrogen. Peas are second only to clover in their soil-enriching properties and can be grown under any conditions of soil or climate. There is always a ready market for peas, or they can be profitably ground and fed to stock. The vines make rich, nutritious hay. If fed to milch cows, when in a green state, pods, vines and all, the flow of milk will be almost doubled. Peas are a paying crop and can be profitably planted in many ways.

Canada—Canada Peas are one of the most useful and valuable legumes that can be grown by the northwestern farmer. Of a most hardy nature, they will thrive fairly well even on the poorest land, and aid most materially in bringing the land into a good condition for other crops, especially when the seed is inoculated with Farmogerm, which should be used with all leguminous crops to get the best nitrogen additions to the soil. They grow from 3 to 4 feet high and the crop can be used in any manner, as ensilage, or cured for hay of the highest quality, or as a hog pasture, or plowed under for a green manure. The ripe dry peas are much used for soups, and for that purpose when properly cleaned always bring a high price.

FOR PRICES SEE RED INSERT-Page 96.

FIELD PEAS—(Continued.)

White Marrowfat—These large handsome Peas are equally as profitable to grow as a field crop and on account of their size are salable at all times at the top of the market, as well as providing the table with an extra good pea during summer. Very heavy yielder, producing from 40 to 60 bushels per acre: these peas being softer than the Canada Pea, are preferred by hogs or stock. Many growers are increasing their acreage of these peas, considering this variety the best and most profitable.

Alaska—An early maturing Pea which is becoming quite popular because it stands up well in the field, and can be cut from either side, and is a heavy yielder. This is one of the varieties sought after by the canners.

Mixed—We have a good stock of these Peas which are a mixed lot (Canada, Marrowfat and Grey), suitable for hogging off or pea hay for soiling. Will mail samples on request.

Correspondence in English, German or Scandinavian.

Inoculate this Seed with FARMOGERM.

VETCHES

WINTER VETCH

(40 to 50 Lbs. to the Acre.)
Spring Vetch—Used for the same purpose as the Sand or Winter Vetch. This variety requires a good soil, is frequently sown with oats or barley, with which it makes excellent feed.
Sand or Winter Vetch (Vicia

Villosa)—Sometimes called Hairy Vetch. This is a very valuable forage plant and is rapidly becoming popular each year as the farmers are learning more of its great value for forage and fertilizing purposes. It succeeds well on nearly all soils and thrives surprisingly on poor light land, and well stands extreme of drouth, heat and cold. It improves the soil, being a great nitrogen gatherer. It belongs to the pea family, but the vines are much longer and the foliage is more abundant. May be May be sown with about half bushel of rye or oats for support. It grows rapidly and

is particularly valuable in sections where clover does not thrive.

FLAX

(16 to 20 Lbs. to the Acre.)

Russian—The standard sort used in the northwest. It requires special machinery to make seed of any grain and this is especially true of Flax. Cleaning Flax so as to make it "right" for seed is a somewhat expensive operation and involves a very considerable waste. But write for sample, use the magnifying glass, and compare it with flax from the farm or elevator and judge for yourself if our seed is worth to you all it costs. Spray your flax with formaldehyde before seeding.

South Dakota #114—This Flax comes to us highly recommended both as a seed and fibre producer. In the section where it originated it has proven under normal conditions wilt-resistant and of excellent value.

We Carry a Full Line of Poultry Remedies

Insecticides, Sprayers, Garden Requisites
Planet Jr. Tools

See Last Pages of This Catalog

SUNFLOWER

(8 Lbs. to the Acre.)

Mammoth Russian—Single heads measure 15 to 22 inches in diameter, and contain an immense amount of seed, which is highly valued by farmers and poultry breeders who have tried it as an excellent and cheap food for fowls. It is the best egg producing food known for poultry. It can be raised cheaper than corn, and is destimed to be an article of great value. Sunflower is being profitably grown as a fodder crop quite extensively in some parts of Montana.

RAPE

(Sow 2 to 3 Lbs. to the Acre in Drills; 5 Lbs. Broadcast.) Use of Dwarf Essex Rape—Dwarf Essex Rape thrives best on a good soil, rich in vegetable matter. Slough lands are excellent. This plant may be grown successfully in the following ways, viz: 1. In the early spring, to provide pasture. 2. In June or July, on well prepared land to provide pasture. 3. Along with grain using 2 lbs. of seed an acre, to provide pasture for sheep after harvest. 4. Along with grain using 2 lbs. of seed an acre, to provide pasture for sheep after harvest. 4. Along with peas, oats, clover seed, to provide pasture and to get a "catch" of clover. 5 As a cover in the orchard for winter protection to avoid root-killing. 6. In corn, sowing the seed with the last cultivation; the succulent feed produced may save the loss of cattle by corn stalk disease. Prevention is better than medicine in regard to this fatal disease. 7. Along with rye, sown in August, in sheep pasture. 8. On early plowed fields to shade the land and so that the soil will not leach, wash or drift. 9. To plow under as a green crop, adding humus to the soil, an element product in great green crop, against the soil, an element product in great green crop, and the soil and element product in great green crop, and the soil and element product in great green crops. ment needed in grain growing sections. When rape is sown broadcast, 5 lbs. of seed an acre will suffice. When sown in rows, say thirty inches apart and cultivated, from 2 to 3 lbs. an acre will be enough.

BUCKWHEAT

(35 to 40 Lbs, to the Acre.)
SILVER HULL BUCKWHEAT—This valuable variety originated abroad and is a decided improvement on the old black or gray sort. It is early, remains longer in bloom than other sorts. A fine variety for honey bees. The than other sorts. A fine variety for honey bees. The grain is of a beautiful light gray color, and has a thin husk. Millers prefer Silver Hull, there being less waste and it makes whiter, better and more nutritious flour than other varieties. Silver Hull is more productive and the grain meets with a more ready sale, bringing higher prices than the Japanese. Under favorable conditions it will yield 40 to 50 bushels an acre.

BIRD SEED

BIRD SEED MIXED—(S. N. & S. Co.'s) Lb. (Postpaid), 25c: by Express or Freight, 10 Lbs. \$1.50 Has become famous for its superior quality. We use nothing but the freshest high-grade seed free from mustiness and dust. These seeds are particularly relished by canary birds, etc. Put up in 1 pound lithographed cartons.

BIRD—(Hemp)—Best grade, Lb., 20c; (Postpaid) 25c
BIRD—(Canary)—Best Sicily, Lb., 20c; (Postpaid) 25c
BIRD—(Rape)—For birds Lb., 20c; (Postpaid) 25c
BIRD—(Millet)—Fancy, Lb., 12½c; (Postpaid) 18½c
BIRD—(Gravel)—Lb., 12½c; (Postpaid) 18½c

SEED GRAINS

WHEAT

(60 to 75 Lbs. to the Acre.)

SPRING DURUM-Durum or Kubanka Macaroni-In the rield this Wheat grows very strong and with surprising rapidity, so rapidly as to get well ahead of the weeds. It does not shell or bleach and is also hail proof owing to the tightness of the hull. The straw is very strong.

Marquis Wheat—The wheat you will eventually buy. Unquestionably the best wheat for the northwest. Matures a week to ten days earlier than Red Fife; yields 15 to 20 bushels to an acre more than Red Fife, and for milling purposes grades No. 1 hard. Kernel is hard and flinty, a little darker than Red Fife and more plump than that variety. It is beardless, having smooth yellow chaff, Marquis Wheat is the earliest, hardiest and heaviest yielding Spring Wheat adapted for northwestern conditions.

Soft Spring Club-An old favorite, grown especially for consumption at home for feeding purposes.

BURBANK SUPER WHEAT—See Page 121.

WINTER WHEAT—Kharkov or Improved Turkey Red— For delivery in July, write for Sample and price. The kernel is a little larger and berry a little lighter in color than the Turkey Red, of which this is an improvement. By various growers' reports the Kharkov is a better yielder by from 4 to 6 bushels per acre.

WINTER WHEAT—Turkey Red—For delivery in July, write for Sample and Price. We offer a True Strain of the Old Reliable Turkey Red. The Farmers' and Millers' Friend.

Winter Club-For delivery in July write for Sample and This Wheat is grown very successfully in many parts of the state, its yields are usually better than Turkey Red, the grain being a semi-hard, it is used in preference to Hard Wheat for feeding purposes.

OATS

(50 to 60 Lbs. to the Acre.)

Swedish Select—These originated in Sweden and they seem to be adapted to the growing conditions of the Great Northwest better than any other of the improved foreign Oats. They retain splendidly the vigor, hardiness and productivity that were bred into the original parents.

These Oats ripen fairly early, the straw is of medium height, strong and stiff. The grain is white, thin hulled, and plump. Weight per measured bushel, 46 lbs. The spikelets are small and usually two-grained. The shoots are abundant and the development in the field is strikingly regular and ample.

National—National Oats are claimed to be the heaviest yielders of the family. Yields have been reported from 60 to 150 bu. per acre. It stands drouth well, has a very strong stiff straw, with large long heads and kernels are large, full and white in color.

60 Day Oats-The Dry Land Farmers' Friend. This Oat is too well known in Montana to need any lengthy description. It is one of the best yielders in dry seasons, and does not lodge to any serious extent on irrigated lands.

FOR PRICES SEE RED INSERT-Page 96,

OATS—(Continued.)

Golden Rust Proof Oats—This Oat has been grown the past season (1917) in Yellowstone Co., Mont. with great success. The grower reports that it yielded 80 bushels to the acre, and not under the most favorable conditions, being over-irrigated. In spite of this it would not lodge at any part of the field, and no signs of rust appeared on any part of the crop.

SPELTZ or EMMER

Facts about Speltz—It resists drouth; thrives on poor lands, in stony ground, forest regions, on the prairies; makes a crop with almost any condition of soil and climate; endures a great deal of frost; is not readily damaged by harvest rains; is not susceptible to rust or smut; yields more than oats, wheat or barley; better feed than barley; the straw is used for fattening stock; stock eat both grain and straw. Ripens early.

Barley-White Hulless.

White Hulless—No Barley of which we have knowledge has proved so valuable to the stock raiser as the White Hulless. It is not a malting variety, but for feeding purposes there is no Barley raised its equal in earliness, yield and quality.

Its Valuable Properties—It is hulless, beardless, and early; it weighs over 60 pounds to the measured bushel; yields well on poor land; yields enormously on good land; makes better pork than corn; it is of inestimable value to every one who feeds stock. It is often grown for hay, coming very early and providing rich food. It should be cut just before it becomes ripe and while the straw is green. In this condition it is relished by all kinds of stock. The straw is stiff and straight, and seldom if ever does it lodge. Use 50 lbs, seed to acre on dry land for grain crop.

Two-Row—A bearded hulled variety which has shown in Montana experiment station very heavy yields. Straw rather short especially in dry seasons.

When grown without irrigation sow as early as the weather will permit.

Six Row—A well known and popular bearded and hulled variety, yielding heavily and with grain of the highest quality.

CORN-In Our Trial Grounds.

View of Speltz grown for Seed on Our Farm Which Yielded Over 50 Bu. Per Acre.

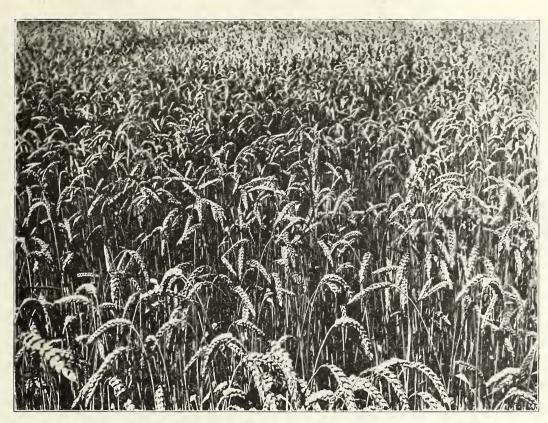

RYE

SPRING RYE—True stock. Spring Rye makes an excellent crop where winter grain has been killed out, or for sowing where a fall crop has not been planted. For the dry farmer needing a sure crop of hay, Rye can be depended on to produce a good tonnage of excellent hay. Does not grow quite so large straw as Winter Rye, but usually yields well and grain is of fine quality. We call particular attention to the fact that we offer genuine Spring Rye.

FALL RYE—Winter Rye is much hardier than wheat and can be grown on a greater variety of soils. It will thrive in dry seasons and on light sandy loam. It is grown for grain, fodder, soiling purposes and green manure. Sow Aug. 20th to Sept. 15th—1¼ bu. per acre if for grain, and 1½ to 2 bu. per acre for Fall pasture. If drilled 2 to 2½ in. deep there will be less danger of Winter killing. Ready for delivery in August.

FOR PRICES SEE RED INSERT—PAGE 96.

THE NEW BURBANK WHEAT

From Actual Photograph, 1917

The New Burbank Wheat

By Luther Burbank.

"It is with unusual satisfaction that I now offer, for the first time, a limited quantity of my new wheat; the best result of ten years of most careful and expensive experiments. It has been tested alongside of sixty-eight of the best wheats of the world, and has excelled them all in yield, uniformity, and other desirable characteristics; the growth is strong, four feet on good ordinary soil, tillers unusually well, and on ordinary valley soil, without special cultivation, care or fertilizing, this Summer produced at the rate of forty-nine and 88-100 bushels per acre, every plant and every kernel uniform, as this wheat was originally all grown from one single kernel. Even at present prices of ordinary wheat for milling purposes, it will be readily seen that the crop of each acre would purchase an acre of the best wheat land.

The small field of this new Wheat has been the wonder and surprise of thousands who have seen it; nothing like it in uniformity and beauty ever having been seen before. The cut shows the exact appearance of the

long, smooth, white, well-filled heads. Every kernel is guaranteed uniform and correct to type.

This, like all other wheats grown in California, is a Winter wheat and should probably be generally treated as such, and will, no doubt, thrive better in new localities after it becomes acclimated by one or two sea-

The quantity now on hand is extremely small compared with a most surprising and wholly unexpected de-

mand for it; no large lot can be supplied to any one.

For such valuable wheat, drilling in rows with hand drills and cultivating between the rows will of course be of great advantage, and it might be well to save part of your seed for spring sowing in Montana.

This is a great stooling wheat, and it does not shell out easily in the field.

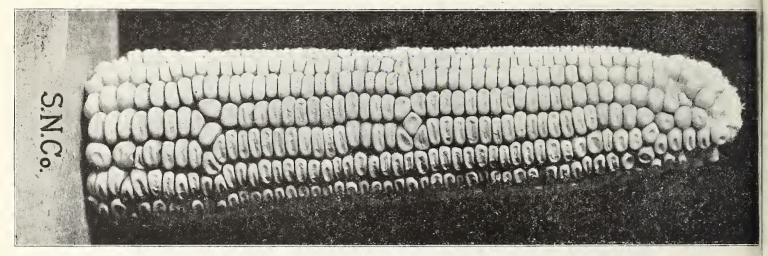

As will be noted in the above description this new wheat is a California product, and while essentially a winter wheat, Mr. Burbank recognizes the fact that it will be well to test it as a Spring Wheat in the climate of Montana, and we heartily endorse this view. Many of our customers are trying it out both as a Winter and also as a Spring wheat in this section, and we shall be very glad to receive full reports of the results obtained in different localities under varying conditions.

PRICE OF THE NEW BURBANK WHEAT—Per lb. F. O. B. Helena \$5.00
Order early—as all orders will be filled in strict rotation in the order of their receipt, and when the limited sup-

ply we have been able to secure is exhausted, it will be impossible to secure any more this season.

FIELD CORN

(15 lbs. will plant an acre in hills, 30 to 40 lbs. drilled for fodder.)

White Dent High Power.

WHITE DENT HIGH POWER—This well known Corn is one of the best for the northwest section, and has yielded as high as 65 bushels to the acre on dry land at an altitude of 2700 feet, and matured in 100 days.

BROWN COUNTY YELLOW DENT CORN—This variety of

BROWN COUNTY YELLOW DENT CORN—This variety of Corn has been grown in Rosebud County for several years. It is early maturing yet heavy yielding. It usually matures in from 90 to 95 days. The ears are from 7 to 8 inches long, and 12 to 14 rowed. Butts well rounded out; tips slightly tapering but well filled, kernels are fairly deep.

MINNESOTA NO. 13—Extra Early Yellow Dent—The commanding points of excellence which will place Minnesota No. 13 Corn at the head of all Yellow Dent varieties for northern planting are: Its clearness, its productiveness, its adaptability to a great variety of soils and climates. The ears average eight inches in length and are borne usually two on a stalk. Minnesota No. 13 thoroughly matures in 90 days when planted on favorable soil and in good location, but 95 to 100 days places it out of danger under average conditions.

Rustler White Dent—This Early White Dent (14 to 18 rows) was obtained from a few kernels in the autumn of 1885 by a Dakota farmer who stated that he had matured it in that state for seven successive years; that it was the only corn in his section that could show such a record. Admirably adapted to a northern climate. Average height of stalk, 8 feet; average distance base of car from ground, 3 feet, 6 inches.

Northwestern Dent—This is recognized as one of the earliest Dent Corns known.

Minnesota No. 23, or White Cap Yellow Dent—This Corn is very similar in all respects to Minn. No. 13, with the exception that it is a White Cap Corn. Many growers prefer it on this account, and it has proven an exceptionally good Corn in many sections of Montana.

North Dakota White Flint—A Pure Pearly White Flint
Corn, recommended very strongly for Montana farmers
by Mr. M. L. Wilson of the Montana Agricultural College.
This Corn is the result of careful selection from the Old
Squaw Corn for many years. Average height of stalk 5
feet, average distance of ears from the ground 1½ feet.
average length of ear 8 inches.

Smut Nose Flint—(8 rowed.) A yellow flint corn blazed with red at end of ear. Ears are large and round. This is a very early variety, and a great favorite in many localities. Our stock is very fine. Average length of ear 10 inches; average height of stalk 7 feet 6 inches; average distance base of ear from ground, 2 feet 11 inches.

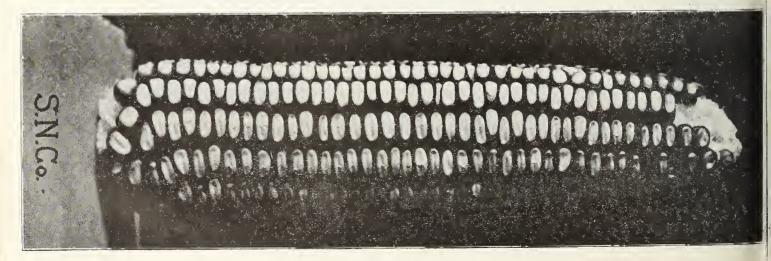

FODDER CORN.

Good Fodder Corn is rapidly becoming appreciated in the northwest, and the careful selection and attention of corn experts during the last decade have produced a type of low growing short-jointed corn bearing heavy foliage and also producing ears at an early stage, increasing the value enormously for green feed and ensilage purposes. YELLOW FODDER CORN—

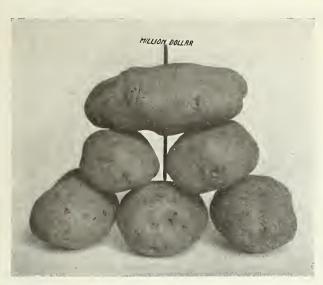

WHITE COB FODDER CORN— RED FODDER CORN—

For prices—see red insert—page 96

ALL SEED CORN OFFERED IS MONTANA GROWN EXCEPTING FODDER CORNS.

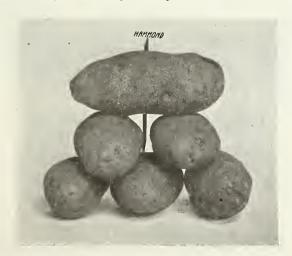

SEED POTATOES

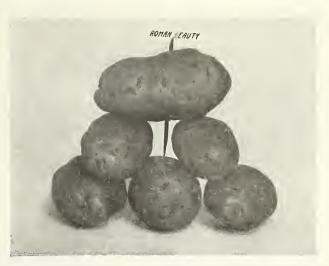

MILLION DOLLAR—(Howard Elliott)—50 Lbs., \$2.75; per

100 Lbs., \$5.00, at Purchaser's expense by Express or Freight. Write for prices on large quantities. This is a comparatively new introduction a wonderful yielder, and one that will prove a veritable gold mine to the potato growers of Montana. It is white potato, of good size, thin but tough skin, a splendid keeper, has no tendency to sprout too early when properly cared for, is most delieious when baked, and also a good potato for boiling. On our trial grounds last season was by far the heaviest yielder we grew. Especially adapted to irrigated lands, where its yield is phenomenal.

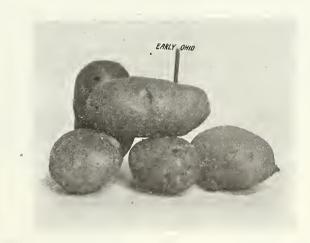

HAMMOND-50 Lbs., \$2.25; 100 Lbs., \$4.00, at purchaser's expense by freight or express. Also known as Rough Rider and Burbank Russett.

This is without question the best Potato for Montana growers especially on irrigated lands. Prof. Whipple of the Montana Agricultural Experiment Station at Bozethe Montana Agricultural Experiment Station at Bozeman reports that even with one irrigation in the season that a yield of from 12,500 to 15,000 lbs. per aere was produced. It is a very smooth shallow eyed Potato, very uniform in size, an ideal baking tuber, does not cook away when boiled without the jacket, is almost entirely seab proof, a splendid winter keeper, and shows very little inclination to sprout until planted in the soil. Its populiar russet cost render it easy to keep a pure stock peculiar russet coat render it easy to keep a pure stock of seed, and is of wonderful value as a protection from bruises in shipping, and thus lessening if not preventing the danger of rot when grown for the shipping trade.

ROMAN BEAUTY—25 Lbs., \$1.50; 50 Lbs., \$2.75; 100 Lbs., \$5.00, by express or freight at Purchaser's expense. We have given this potato a thorough test on our trial we have given this potato a thorough test on our trial grounds for the past four years, and it has proven itself well worthy as a market variety for Montana. It is very smooth Potato with eyes so shallow that it appears to be without them. Is a splendid baker, and is one of the best all round potatoes we have found for this section. Our supply of this fine variety is very limited, and intending purchasers will find it to their advantage to order early, before the stock is exhausted.

EARLY OHIO—25 Lbs., \$1.25; 50 Lbs., \$2.25; 100 Lbs., \$4.00, by freight or express at Purchaser's expense. This is a well known early variety, a good keeper and is grown most extensively for the market in all sections of the country.

EARLY SIX WEEKS—25 Lbs., \$1.25; 50 Lbs., \$2.25; 100 Lbs., \$4.00; by express or freight at Purchaser's expense. This is a well known early variety, a good keeper and is grown most extensively for the market in all sections of the eountry.

NORWEGIAN OR SWEDISH POTATO—10 Lbs., F. O. B. Helena, \$1.00. Only 10 lbs. to a eustomer.

This is a smaller type than the ordinary varieties of Irish Potato, and is especially suited for high altitudes, ripening early and being especially hardy. Requires but a short season to mature.

POULTRY FOODS and REMEDIES.

WE CARRY A COMPLETE LINE OF POULTRY REMEDIES, ETC., WHICH ARE ABSOLUTELY THE BEST THAT EXPERIENCE. CAN SUGGEST OR MONEY CAN BUY. IT WILL PAY YOU TO BUY THEM.

Pratt's Baby Chick Food

Should be fed the first three weeks. It is essential to the nourishment of chicks that they be fed with food that can be thoroughly and easily digested. Baby Chick Food is balanced to suit the needs of chicks from the day they emerge from their shells. It will raise more chicks than any other food. Price 3 lb. package, 30c: 6½ lb. package, 50c; 14 lb. bag, 34 20. If would by mail add neet and \$1.20. If wanted by mail add postage.

Pratt's Poultry Regulator

Contains all the necessary elements in accurate and scientific proportions that hens need for egg making. It builds up vitality and stimulates egg production. Poultry Regulator is used by the most successful poultry raisers everywhere. Perfectly pure and free from harmful substance. Price, 26 oz. 25c; 4 lbs. 50c; 12 lb. pail, \$1.25; 25 lb. pail, \$2.50. If wanted by mail add postage.

Pratt's Lice Killer Powder

One of the most perfect lice killers especially valuable for use on young chicks and setting hens. It rids horses, cattle, hogs, dogs and cats of lice, also ticks on sheep. tis thoroughly effective as a destroyer of vermin and absolutely harmless to the chick.

Price (Postpaid) 1 lb., 25c; 3 lbs......50c

Pratt's Head Lice Ointment

Thousands of little chicks are killed each year by head lice. Pratt's Head Lice Ointment is a carefully prepared nonpoisonous article and is instant death to the murderous lice, while it is absolutely harmless to the little chicks. It will pay for itself in saving one chick.
Price (Postpaid), 25c Box.

Pratt's Animal Regulator

It keeps horses well and strong, improves their wind and makes their coat sleek and glossy. Cows give better milk and their calves are strong and healthy, and steers fatten in half the

Price: 25c, 50c and \$1.00 packages. 12 lb. pails, \$1.75; 25 lb. pail, \$3.00 If wanted by mail add postage.

Healing Ointment

Injuries of any kind are healed naturally and permanently, and pain quickly relieved by applying Pratt's Healing Ointment. Sores, cuts, scratches, wounds, burns, barbwire cuts as well as skin eruptions, eczema and itching are quickly cured. Corns, harness and saddle galls disappear in short order. You should have this ointment handy at all times. Price (Postpaid), box 30c.

Pratt's Chicken Cholera Remedy

Cholera creates a continuous and violent desire for water.

For the treatment of cholera, indigestion, bowel trouble, and all kindred troubles in chicks or grown fowls this remedy is excellent. As cholera is very contagious it should be kept on hand by every one who raises little chicks.

Postpaid, 25c and 50c.

White Diarrhoea Remedy

This is one of the greatest chick life savers ever put on the market. Thousands and thousands of little chicks die each year from the fatal white diarrhoea. It carries off from 60 to 75 per cent of all chicks hatched.

Pratt's White Diarrhoea Remedy in the drinking water kills the specific organism which causes the discase, and saves the hatch. Used as a preventative when hens are laying, because it will prevent this deadly organism from developing in the egg. If a hen is used for hatching give her Pratt's White Diarrhoea Remedy in the drinking water so there will be no chance of infection from droppings. is preventive treatment.

Price 25c and 50c, postpaid.

Pratt's Roup Remedy

This wonderful remedy is used in every civilized country of the world. The reason is it cures. For fowls that sneeze, gasp and wheeze, also having a watery discharge from the nostrils and eyes. It prevents colds and is excellent for turkeys. Pratt's Roup Remedy will save your fowls and make them profitable.

Price (Postpaid) 25c and 50c. Tablets. Price (Postpaid) 25c and 50c.

Pratt's Healing Powder

A guaranteed antiseptic powder that forms a healthy dry coating over wounds and keeps out the cold. Just the thing for harness galls, sores, cuts and scratches. A

valuable remedy for home use, 4 ounce sifting top enameled can (Postpaid) 30c.

Pratt's Cow Remedy

Cow tonic, increases the milk supply and makes it rich in butter fat. Cow tonic enables the cow to turn more of the feed into milk and keep up the full flow for a much longer period. It is a positive remedy for scours. Price: 2 lbs. 50c; 12 lb. pail \$2.00; 25 lb. pail, \$3.50.

If wanted by mail add postage.

Pratt's Poultry Disinfectant

This disinfectant is a real wonder worker in the poultry yard. A sure deodorizer, germicide and liquid lice killer. Best disinfectant on the market today.

Price: Quart, 50c; ½ gal. 90c; gal., \$1.50.

Liquids Can Not Be Sent by Parcel Post.

Pratts

The Standard Inoculation

WHAT FARMOGERM IS:

Farmogerm is a pure culture or growth of nitrogen-fixing bacteria that have been selected and bred up to transform large amounts of nitrogen from the air into soluble nitrates. These bacteria are grown in a jelly, or food, in which they remain active for long periods of time, and sent out in a bottle which admits the necessary supply of pure air, yet keeps out destructive contaminators. If alfalfa can be grown on hot, sandy land of South New Jersey, why can't you grow it?

WHAT FARMOGERM WILL DO:

Unless the soil is very acid or wet, Farmogerm will:

1. Increase the yield and quality of legume crops, giving quicker growth and earlier maturity. 2. Increase the food value of legumes. 3. Make legumes grow in new localities where they cannot otherwise be grown successfully. 4. Supply nitrates to other crops growing with the inoculated legume crops. 5. Enrich the soil for future crops, thereby increasing the permanent value of the farm. Better crops—better soil—less fertilizer—less labor.

Increased Crops are a well established certainty in all instances where inoculations are used together with proper culture methods. Not only is the crop increased in weight, but in its richness. The United States Department of Agriculture Bulletin No 71, substantiates these statements, why not increase your farm yields without extra labor and at practically no extra cost?

Fertilizer Values of well-inoculated legumes have long been determined. It is shown in Bulletin No. 71, issued by the United States Department of Agriculture, that tests covering a large part of the country prove that legumes will deposit 1,000 lbs. of nitrates per acre. This means that your most expensive commercial fertilizer is absolutely unnecessary when you plant legumes, perfectly inoculated, sown and planted in properly prepared land.

Peas, Beans, Sweet Peas.
Yield earlier, longer and better when treated with Farmogerm. Farmogerm is endorsed by Farmers, Federal and State Agricultural Departments and private estates. It is delivered to you in bottles, ready for use. You can inoculate the seed for ten acres in ten minutes

The addition of nitrogen to the soil by inoculation of legume seed, is estimated where the system has been practiced for years, to be 200 lbs, per acre. The estimate of the U. S. Department of Agriculture compiled from 16 states in the same treatment is 122 lbs, of nitrogen per acre, equivalent to fertilization with 800 to 1000 lbs, of Nitrate of Soda per acre.

INSECTICIDES, ETC.

PARIS GREEN—(0ld Style)—Most effective Potato Bug killer known; sure death to all insects which eat foliage. Put up in sealed packages. Use 1 oz. to 3 gallons of water or 1 lb. to 50 for Potato bugs, or 1 oz. to 6 gallons of water, or 1 lb. to 100 for spraying trees. (Postpaid), ¼ lb. cans, 15c; ½ lb. cans, 30c; lb. can, 50c. Write for prices in larger quantities.

ARSENATE OF LEAD—(Dry Powdered)—This material contains from 31 to 33 per cent arsenic—the killing agent. Being light and fluffy it stays in suspension and covers the foliage evenly. Its adhesiveness is unsurpased. Growers appreciate its convenience, safety and economy.

TUBER TONIC—This material is a three-in-one spray for potatoes, designed to kill leaf-eating insects, prevent and eradicate blight and act as an indirect tonic to the plant. Tuber-Tonic will prove most economical to the farmer who has in the past sprayed with Bordeaux Mixture to which has been added either Arsenate of Lead or Paris Green. Growers will find Tuber-Tonic safe to use on the most delicate foliage. Fewer sprayings are necessary because of its great adhesiveness. Lb. glass jars.

Nicotine Sulphate 40% Nicotine

This is the insecticide that is so highly recommend-

ed by Experiment Stations. It destroys Aphis (plant lice), Thrips, Leaf-hoppers on all tree, bush and vine fruits, vegetables, field crops, flowers and shrubs; also Apple Red Bug, Pear Psylla and similar soft-bodied sucking insects—all without injury to foliage.

May be combined with other sprays. Highly concentrated. Soluble in water—easy to mix—does not clog nozzles.

You can not go wrong by ordering "Black Leaf 40" for sucking insects.

SHEARS

-(Superior)-A good article at a low price, per GRASS SHEARS-

HOSE

This season sees what to many will appear an innovation in the size of hose for ordinary garden use. Exhaustive tests have proven that % hose is more practical than ¼ inch hose for ordinary standard conditions. The fact that the ordinary standard service pipes are but ½ inch, and that the ordinary bibb or fawcet to which the hose is attached, has but an ½ inch outlet or valve opening should convince anyone that it is good policy to use a % inch hose. Also, % inch hose is lighter, and consequently suffers less from abrasive wear in use on concrete and gravel walks than the heavier ¾ inch hose, and while costing less, will last longer and deliver, under ordinary conditions, as much water. Another point in its favor is the fact that % inch hose of the same quality will withstand a greater pressure than ¾ inch, and can not kink as readily.

ELECTRIC HOSE

Electric Hose is acknowledged today to be the best Hose that can be procured at any price. It is made from the highest grade materials obtainable, is practically un-kinkable, and will give longer life and better satisfaction with proper care than any other make. Look for the sharp corrugations, the foot measurements in numerals at every foot length, and the brand shown in the above out

Our
Brands

They stand for highest development to be obtained in purity, Vitality, Hardiness and Germination.

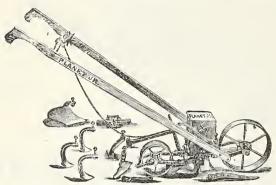

"PEERLESS"—The highest grade obtainable.

"PLACER"—Second only to our Peerless.

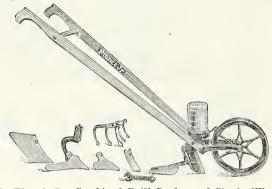

"QUARTZ"—An excellent grade, but containing discolored seeds which do not measure up to the high standard we require for "Peerless" and "Placer" yet of high Vitality, Purity and Germination.

The new "PLANET JR." Catalog is the handsomest, best, and most instructive book ever issued on a similar subject. Full of little points that bring profit. Full of true and handsome illustrations. We mail it free to any address on application.

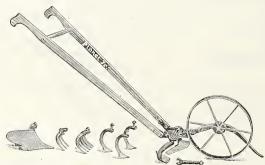

-Planet Jr., Combined Hill and Drill Seeder, Wheel Hoe, No. 4—Planet Jr., Combined Kill and Drill Seeler, Wheel Roe, Cultivator and Plow—Price complete (weight 50 lbs.).......\$17.00 No. 4 D—As a Seeler only (Holds 2½ Quarts of Seed)......\$13.50 This accurate, durable and easy-running tool sows all garden seeds from the smallest up to peas and beans in hills 4, 6, 8, 12 or 24 inches apart, or in drills at the proper thickness and depth; rolling down and marking out the next row all at one passage. No time is lost. No seed is wasted.

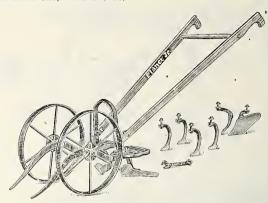

o. 31—Planet, Jr., Combined Drill Seeder and Single Wheel Hoe Price complete (Packed weight, 32 lbs.) \$11.50 No. 31 D—As a Drill Seeder only (Packel Weight, 26 lbs.) \$9.25 This new combined tool is of great value to thousands of gardeners who have never felt able to own, either a seed drill or a wheel hoe. It will sow even a small packet of garden seed with great precision in a narrow row from ½ to 2 inches deep. Quickly changed to a splendid wheel hoe. A special machine for the small gardener at a price he can afford to pay.

No. 1—Planet, Jr., Combined Drill, Seeder, Wheel Hoe, Cultivator and Plow—Price\$13.50

No. 16-Planet, Jr., Single Wheel Moe-Weight, 26 lbs. Price \$9.50

These Single Wheel Hoes are the highest type of their class. They have a great variety of attachments which adapt them to a large variety of work, and there is scarcely any garden cultivation they will not do.

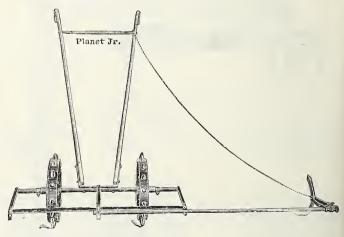

12-Combined Double and Single Wheel Hoe, Cultivator and

No. 13—Planet, Jr., Double Wheel Hoe—Steel Frame—Price, \$7.75
The greatest hand cultivating tool in the world for the onion and small sugar beet grower, and also for every grower of garden and market garden crops from drilled seed. They do more and do it better and easier than can possibly be done in any other way, where rows are too close for horse work.

No. 18—Single Wheel Hoe—Price \$5.50. This has one pair of 6-inch hoes only—the tools that are most useful throughout the season. Other attachments can be added as needed.

No. 17—Planet, Jr., Single Wheel Hoe—Price, \$7.50. You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth; an outfit sufficient for most garden work.

Two Row Marker.

A Field of Peas in Our Trial Grounds—Grown on Inoculated Ground. Note the Luxuriant Growth. A Most Convincing Argument for Inoculation. USE FARMOGERM—See Page 125.

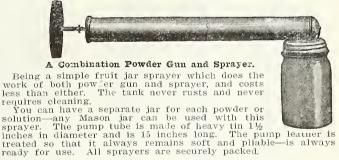

SPRAYERS

THE "PERFECTION" SPRAYER—The strongest and most powerful Sprayer is considered one of the strongest and most powerful of the high pressure class. The barrel is 7½ inches in diameter and 20 inches in height. The hose is 5-ply cloth inserted. Nozzle is of the Automatic type. Capacity of tank four gallons. Weights 9½ lbs. This Sprayer will handle Whitewash, Water, Paints, Bordeaux Mixture with equal facility. For heavy liquids use the extra nozzle cap which is furnished with the sprayer. May be used with extensioas—which come in two 18-inch pieces. One or both may be used. Furnished in Galvanized steel. Price. \$7.50

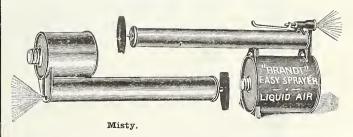

THE "BEANDT DAISY" is a labor saver. It works both ways sprays the same on the return stroke as on forward stroke, thus doing twice the work. Sprays straight up as well as down, a valuable feature in spraying poultry houses, etc. It speaks for itself, and needs no further description; is made with galvanized tank and holds 1 quart. Price, each (Postpaid) \$1.15

THE "MISTY" SPRAYER is used to apply all kinds of insecticies on plants, etc. Unsurpassed for applying all kinds of stock dips and fly killer on cattle and horses, also for disinfecting poultry houses, barns, etc. Made of good tin and holds 1 quart. Price, each (Postpaid) \$0.50

THE "BRANDT" BASY—The only one of its kind on the market. Strong, durable and attractive. Has a large and strong pump, automatic shut off nozzle, legs under tank. Can be used for whitewashing, disinfecting and cleaning chicken houses, and is very desirable for large gardens, etc. It is built of galvanized steel. Holds one gallon. Galvanized steel tank. (Postpaid) \$3.25

You Can Blow—Lice Powder, Insect Powder, Cabbage Worm Powder, Fly Powder, Hellebore, Healing Powder, Paris Green; in fact any powder that blows.

The presence of a select library of standard agricultural books in the home of a farmer lends a certain air of distinction and refinement and at once stamps the owner as alert, progressive and abreast of the times.

We present herewith a partial list of the best books treating on every phase of agricultural and rural life. They have been prepared by the most eminent authorities on their respective specialties, and are thoroughly practical, while at the same time scientifically accurate. To the progressive farmer who desires to keep posted upon the latest investigations of his chosen business these books are invaluable, and there is no investment that will pay such big returns as a few books that will give you information you need just when you want it. The prices are exceptionally low, when you consider their high character and the excellent manner in which they are printed, bound and illustrated. Prices are all Postpaid.
